Jerry,

I am writing to you on behalf of my client Mr. Joseph Williams who owns the property at 981 35th Street right next to the hazardous exclusion zone in question. Mr. Williams has stated to me that he was never informed to any UST remediation project in his near vicinity that may affect his property. As you are aware there may have been an underground plume which could have easily migrated over on his parcel. In the event that is correct

Mr. Williams is entitled to the cost required to cleanup this potential hazard if this plume has migrated onto his parcel! Please contact me ASAP to review this concern at 510-827-7684.

Thanks,

Louis H. Cherry, President
American Precision Builders
