**Subject: Former Shell Service Station/Current KFC Restaurant**  
2800 Telegraph Avenue  
Oakland, California

Dear Ms. Garcia-LaGrille:

Attached for your review and comment is a copy of the *Groundwater Monitoring Report - Fourth Quarter 2004 and Notice of Intent to Implement Prior Recommendations* for the above referenced site. Upon information and belief, I declare, under penalty of perjury, that the information contained in the attached document is true and correct.

As always, please feel free to contact me directly at (559) 645-9306 with any questions or concerns.

Sincerely,

**Shell Oil Products US**

Karen Petryna  
Sr. Environmental Engineer

Re: **Groundwater Monitoring Report – Fourth Quarter 2004  
And Notice of Intent to Implement Prior Recommendations**  
Former Shell Service Station/Current KFC Restaurant  
2800 Telegraph Avenue  
Oakland, California  
Incident No. 97093398  
Fuel Leak Case No. RO0000009

Dear Ms. Garcia-LaGrille:

Cambria Environmental Technology, Inc. (Cambria) prepared this report on behalf of Equilon Enterprises LLC dba Shell Oil Products US (Shell) in accordance with the quarterly reporting requirements of 23 CCR 2652d.

#### **FOURTH QUARTER 2004 ACTIVITIES**

Blaine Tech Services, Inc. (Blaine) of San Jose, California gauged and sampled all site wells and prepared a summary table of field gauging and laboratory analytical data. Cambria prepared a site vicinity/well location map (Figure 1), and a groundwater contour/chemical concentration map (Figure 2), which includes a rose diagram of historical groundwater flow direction. Blaine's report, presenting the laboratory report and supporting field documents, is included as Appendix A.

#### **ANTICIPATED FIRST QUARTER 2005 ACTIVITIES**

Blaine will gauge and sample the wells in accordance with the established schedule and Cambria will prepare a report.

**Cambria  
Environmental  
Technology, Inc.**

## NOTICE OF INTENT TO IMPLEMENT RECOMMENDATIONS

In our November 30, 2004 *Groundwater Monitoring Report – Second and Third Quarter 2004 and Site Investigation Report*, Cambria recommended that:

- Wells S-1, S-4, S-5, S-10 and SR-1 be properly destroyed;
- Well S-3 be re-located, repaired, or replaced; and
- Sampling of wells S-6, S-8, and S-3 occur on a semi-annual schedule (high and low water table periods).

Given the lack of response in more than 90 days, Shell is assuming agency concurrence and does hereby provide a notice of intent to implement these recommendations

***Destruction of Wells:*** Groundwater monitoring wells S-1, S-5, S-10, and SR-1, have not indicated the presence of any chemical constituents since their installation. Well S-4 has had only two quarters when very low gasoline concentrations were detected (June 1993 and September 2003). The groundwater flow direction has been consistent to the southwest for more than 14 years, and is not expected to change in the future. Further gradient evaluation is not warranted at this site. Based on the lack of impact to these wells and also the extremely consistent groundwater flow direction at this site, further gauging and sampling of these wells adds no value to the investigation or remediation activities at this former gasoline station site. **Cambria will initiate permitting and scheduling for the proper destruction of wells S-1, S-4, S-5, S-10, and SR-1. We will provide one week notification to your agency prior to any field work.**

***Re-locate, Repair, or Replace S-3:*** To better assess the groundwater conditions on the southwest corner of the property, Cambria recommends that well S-3 be located and that it be repaired for use as a monitoring point, or properly destroyed. If it is destroyed, a new well should be installed at the approximate former location of well S-3. This well should be added to the periodic monitoring activities. **Cambria will initiate access and scheduling activities to re-locate well S-3. We will provide one week notification to your agency prior to any field work.**

***Modified Sampling Schedule:*** Based on a review of the historical depth-to-water level measurements in wells S-6 and S-8, the high water table season typically corresponds to the first quarter of the year, and the low water table season typically corresponds to the third quarter of the year. **Thus, a semi-annual monitoring schedule for existing wells S-6 and S-8 will occur during the first and third quarters of the year, beginning with the first quarter of 2005.**

Groundwater Monitoring Report **041117-MD-1**

This report covers the routine monitoring of groundwater wells at this Former Shell facility. In accordance with standard procedures that conform to Regional Water Quality Control Board requirements, routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated purge volume (if applicable), elapsed evacuation time (if applicable), total volume of water removed (if applicable), and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater (if applicable) is, likewise, collected and transported to the Martinez Refining Company.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL CONCENTRATIONS**. The full analytical report for the most recent samples and the field data sheets are attached to this report.

At a minimum, Blaine Tech Services, Inc. field personnel are certified on completion of a forty hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. Our activities at this site consisted of objective data and sample collection only. No interpretation of analytical results, defining of hydrological conditions or formulation of recommendations was performed.

Please call if you have any questions.

Yours truly,

Leon Gearhart  
Project Coordinator

---------	------	----------------	-------------	-------------	-------------	-------------	------------------------	------------------------	----------------	----------------	----------------	---------------	-------------------	---------------	-------------------	--------------	----------------------------	--------------------------	---------------------------

**Abbreviations:**

TPPH = Total petroleum hydrocarbons as gasoline by EPA Method 8260B; prior to September 29, 2003, analyzed by EPA Method 8015.

BTEX = Benzene, toluene, ethylbenzene, xylenes by EPA Method 8260B; prior to September 29, 2003, analyzed by EPA Method 8020.

MTBE = Methyl tertiary butyl ether

DIPE = Di-isopropyl ether, analyzed by EPA Method 8260

ETBE = Ethyl tertiary butyl ether, analyzed by EPA Method 8260

TAME = Tertiary amyl methyl ether, analyzed by EPA Method 8260

TBA = Tertiary butyl alcohol, analyzed by EPA Method 8260

1,2-DCA = 1,2-dichloroethane, analyzed by EPA Method 8260

EDB = 1,2-dibromomethane or ethylene dibromide, analyzed by EPA Method 8260

TOC = Top of Casing Elevation

TOB = Top of Wellbox Elevation

SPH = Separate-Phase Hydrocarbons

GW = Groundwater

ug/L = parts per billion

MSL = Mean sea level

ft. = Feet

<n = Below detection limit

(D) = Duplicate sample

NA = Not applicable

**Notes:**

a = Chromatogram pattern indicated the presence of an unidentified hydrocarbon.

b = This sample analyzed outside of EPA recommended hold time.

c = The concentration reported reflects individual or discrete unidentified peaks not matching a typical fuel pattern.

Ethanol analyzed by EPA Method 8260B.

Prior to September 18, 2003, depths to water and groundwater elevation referenced to Top of Box elevation.

Active wells surveyed July 29, 2002 by Virgil Chavez Land Surveying of Vallejo, CA.

Dear Mr. Gearhart,

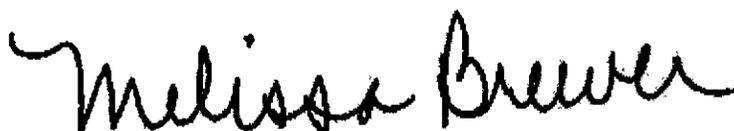

Attached is our report for your samples received on 11/18/2004 14:29  
This report has been reviewed and approved for release. Reproduction of this report  
is permitted only in its entirety.

Please note that any unused portion of the samples will be discarded after  
01/02/2005 unless you have requested otherwise.

We appreciate the opportunity to be of service to you. If you have any questions,

You can also contact me via email. My email address is: [mbrewer@stl-inc.com](mailto:mbrewer@stl-inc.com)

Sincerely,

Melissa Brewer  
Project Manager

**Legend and Notes**

**Sample Comment**

Lab ID: 2004-11-0611 -2

Siloxane peaks were found in the sample, which are not believed to be gasoline related. If they were to be quantified as gasoline, the concentration would be 51ug/L

Lab ID: 2004-11-0611 -7

Siloxane peaks were found in the sample, which are not believed to be gasoline related. If they were to be quantified as gasoline, the concentration would be 94ug/L.

**Analysis Flag**

L2

Reporting limits were raised due to high level of analyte present in the sample.

**Result Flag**

Q6

The concentration reported reflect(s) individual or discrete unidentified peaks not matching a typical fuel pattern.
