Subject: RO 14 SWI Report Due Date

Hello Paresh,

This email is in response to the original letter from ACEH dated 4/16/2009 and email correspondence dated 9 June 2009 regarding former BP Station #11132 at 3201 35th Avenue, Oakland, Alameda County, California (ACEH Case #RO0000014). Specifically this email requests an extension of the most recent due date of 7/17/2009 (email correspondence) for submittal of the Soil & Ground-Water Investigation Report (containing Dual-Phase Extraction Pilot Testing Results as well as Vapor Intrusion Assessment).

Stratus Environmental Inc. (Stratus) completed DPE testing field work during 5/11-19/2009. Stratus completed vapor intrusion assessment activities on 6/8/2009. BAI did not receive the vapor intrusion assessment data package until 7/8/2009, approximately one week prior to the due date of 7/17/2009. Due to the late receipt of this data package, we respectfully request an extension of the report due date from 7/17/2009 to 8/7/2009

(approximately 30 days following receipt of the data package) in order to incorporate the results of field work and complete internal and BP review of the draft SWI report prior to submittal of the final report to ACEH.

The favor of a reply approving this extension request for the report to 8/7/2009 would be greatly appreciated. Thank you. Take care.
