Letter Report
Disposal of Soil
Cademartori Trucking
1833 Peralta Street
Oakland CA

Dear Mr. Aten:

This letter report summarizes our disposal of soil that was stockpiled on your property. The stockpiled soil resulted from tank removal and contaminated soil overexcavation conducted in 1990 and 1991, at 1833 Peralta Street, Oakland CA (Figure 1).

BACKGROUND

The property is currently operated as a motor-freight facility.

In July 1990, two gasoline tanks and a waste oil tank were removed. During tank removal, approximately 40 cubic yards of contaminated soil were excavated and stockpiled at the property.

In January 1991, approximately 50 cubic yards of contaminated soil were overexcavated from the tank excavations and stockpiled at the property.

Since excavation, the soil has been stockpiled onsite and aerated occasionally by Cademartori Trucking using a backhoe.

CHARACTERIZATION

At the request of the Alameda County Department of Environmental Health, Streamborn collected three composite samples from the stockpile in August 1993. The samples were analyzed for the following compounds:

- Total Petroleum Hydrocarbons as Diesel
- Total Petroleum Hydrocarbons as Motor Oil
- Total Petroleum Hydrocarbons as Gasoline
- Benzene, Toluene, Ethylbenzene, and Xylenes
- Reactivity, Corrosivity, and Ignitability (1 of the 3 samples)

Analytical results are summarized in Table 1.

In March 1998, after being funded by the California Underground Storage Tank Cleanup Fund, Cademartori Trucking elected to dispose of the soil at a landfill.

On 2 April 1998, in accordance with profiling requirements of Vasco Road Landfill, Streamborn collected a composite sample from the stockpile. The sample was analyzed for the following compounds:

- Total Petroleum Hydrocarbons as Gasoline
- Volatile Organic Compounds
- Semivolatile Organic Compounds
- CAM 17 (total) Metals

The analytical results (Table 1) met Vasco Road Landfill acceptance criteria.

Documentation for the sampling and analysis, conducted in August 1993 and April 1998, is attached. The chain-of-custody forms are included in Attachment 1, the laboratory data reports are contained in Attachment 2, and the landfill waste profile is presented in Attachment 3.

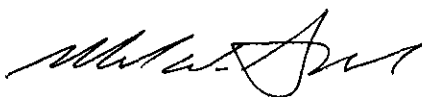

DISPOSAL

On 12-13 May 1998, the stockpiled soil (approximately 93 cubic yards/120 tons) was transported to Vasco Road Landfill for disposal. Transportation was performed under nonhazardous waste manifest (Attachment 4) by N & J Trucking (Hayward CA) and Michael Stoner (Castro Valley CA).

If you have any questions, please call.

Sincerely,

STREAMBORN

Mark W. Buscheck
Geologist

Zinc (mg/kg)	Not measured			96

General Notes

- (a) TPH = total petroleum hydrocarbons. BTEX = benzene, toluene, ethylbenzene, and xylenes.
 (b) < denotes parameter below detection limits (shaded values). Detection limits for Volatile Organic Compounds (EPA Method 8240) and Semivolatile Organic Compounds (EPA Method 8270) varied by compound, as is normal.
 (c) Laboratory analyses performed by Chromalab (Pleasanton CA).

Dear Mr. Wright:

Attached is our analytical laboratory report for the samples received on April 10, 1998. Also enclosed is a copy of the Chain-of-Custody record acknowledging receipt of these samples.

Please note that any unused portion of the samples will be discarded after May 14, 1998, unless you have requested otherwise.

We appreciate the opportunity to assist you. If you have any questions concerning this report, please contact Client Services at (510) 426-2657.

Sincerely,

Ly Phan

ATTACHMENT 3

Waste Profile for Vasco Road Landfill

This attachment does not repeat information found elsewhere in the report.

David Schoenherr
BFI Waste Systems
4001 North Vasco Road
Livermore CA 94550

16 April 1998

Project No. P015

Disposal of Soil
1833 Peralta Avenue
Oakland CA

Dear Mr. Schoenherr:

The attached waste profile has been prepared on behalf of Pat Cadematori (subject property owner), who proposes to dispose of approximately 50 cubic yards of stockpiled soil. The soil was derived from excavations performed in 1990, during removal of two gasoline tanks and waste oil tank, at the property.

In August 1993, Streamborn collected three composite samples from the stockpile for landfill profiling. The samples were analyzed for the following compounds:

- Total Petroleum Hydrocarbons as Diesel
- Total Petroleum Hydrocarbons as Motor Oil
- Total Petroleum Hydrocarbons as Gasoline
- Benzene, Toluene, Ethylbenzene, and Xylenes
- Reactivity, Corrosivity, and Ignitability (1 of the 3 samples)

Analytical results are summarized in Table 1.

In accordance with profiling requirements discussed with you, Streamborn collected an additional composite sample of the soil, on 2 April 1998. The sample was analyzed for the following compounds:

- Total Petroleum Hydrocarbons as Gasoline
- Volatile Organic Compounds
- Semivolatile Organic Compounds
- CAM 17 (total) Metals

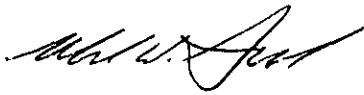

Analytical results (Table 1) meet the criteria for disposal at the Vasco Road Landfill, Livermore CA.

We have enclosed the following documents:

- Waste characterization form
- Copy of laboratory analytical reports for the August 1993 and April 1998 sampling events
- Copy of chain-of-custody forms for the August 1993 and April 1998 sampling events

If you have any questions, please call.

Sincerely,
STREAMBORN

Mark W. Buscheck
Geologist

WASTE CHARACTERIZATION DATA Petroleum Contaminated Soils

IMPORTANT: This form is to be used to describe contaminated soils resulting from the release of petroleum products only and is not to be used for hazardous waste or PCB's regulated by a federal or applicable state, provincial or local authority.

INSTRUCTIONS: Information for physical completion of this form must be obtained from an authorized representative of the generator. Please be thorough in your answers. The entire form must be completed, answers must be legibly printed in ink or typewritten, and the completed form must be signed and dated. Please attach any additional relevant information such as analytical data that will help to describe the waste and expedite its review. Use the form only one time since this form has a unique WCD number assigned.

1. GENERATOR INFORMATION

Type and concentration

See attached table of analytical results, laboratory data reports, and chain-of-custody forms.

4. SPECIAL WASTE COMPOSITION

Description of the waste:

- Soil contaminated with leaded gasoline
- Soil contaminated with unleaded gasoline
- Soil contaminated with diesel fuel
- Soil contaminated with heating oil
- Soil contaminated with vehicle drain oil
- Soil contaminated with other petroleum products

Specify: _____

5. GENERATOR'S CERTIFICATION

I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability to determine, that no deliberate or willful omissions of composition or properties exist, that all known or suspected hazards have been disclosed, analytical results submitted are accurate and representative of the waste (per SW846), and that the waste is not a regulated hazardous waste by the USEPA, by an applicable State or Provincial authority, or by any applicable local authority, and does not contain PCBs regulated by TSCA (i.e., 40 CFR 761) or any Provincial authority.
