ROSANA GARRISON
AUGEAS CORPORATION
799 MAIN STREET, SUITE A
HALF MOON BAY, CA 94019

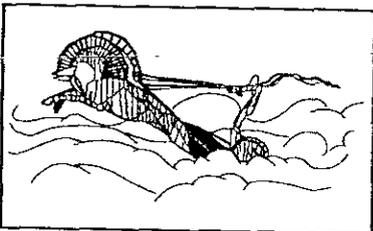

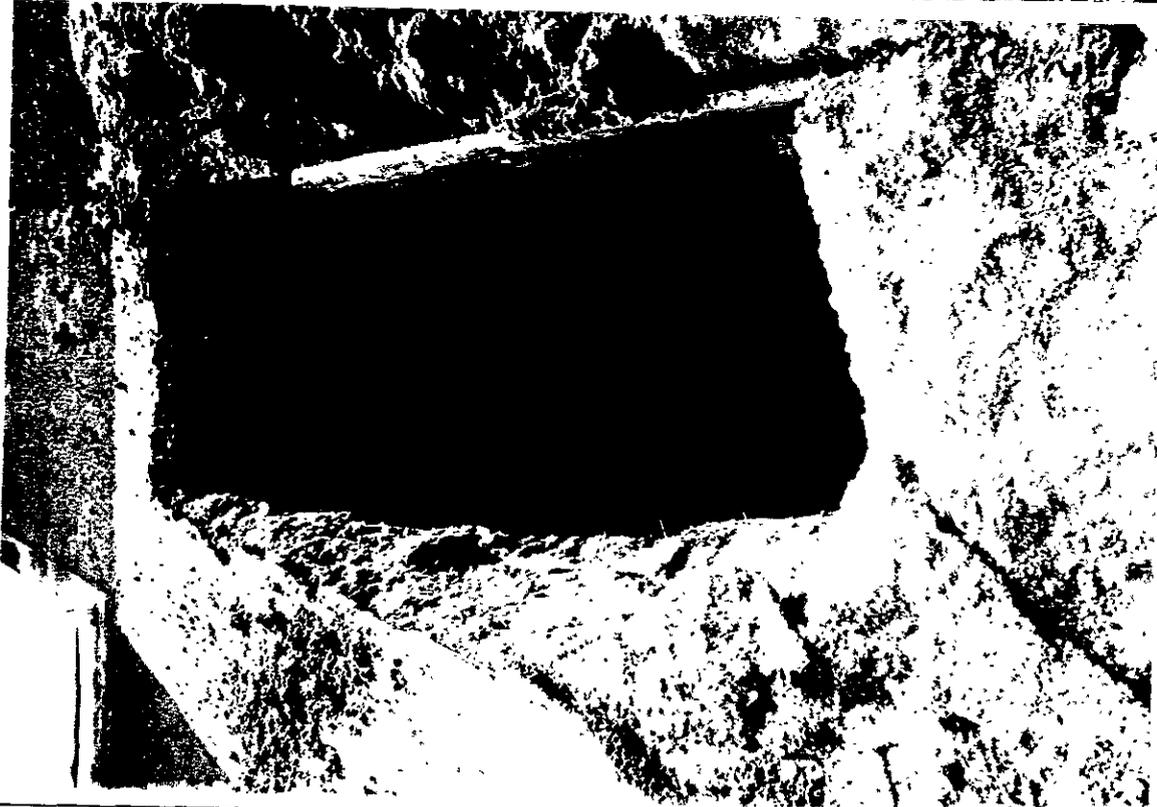

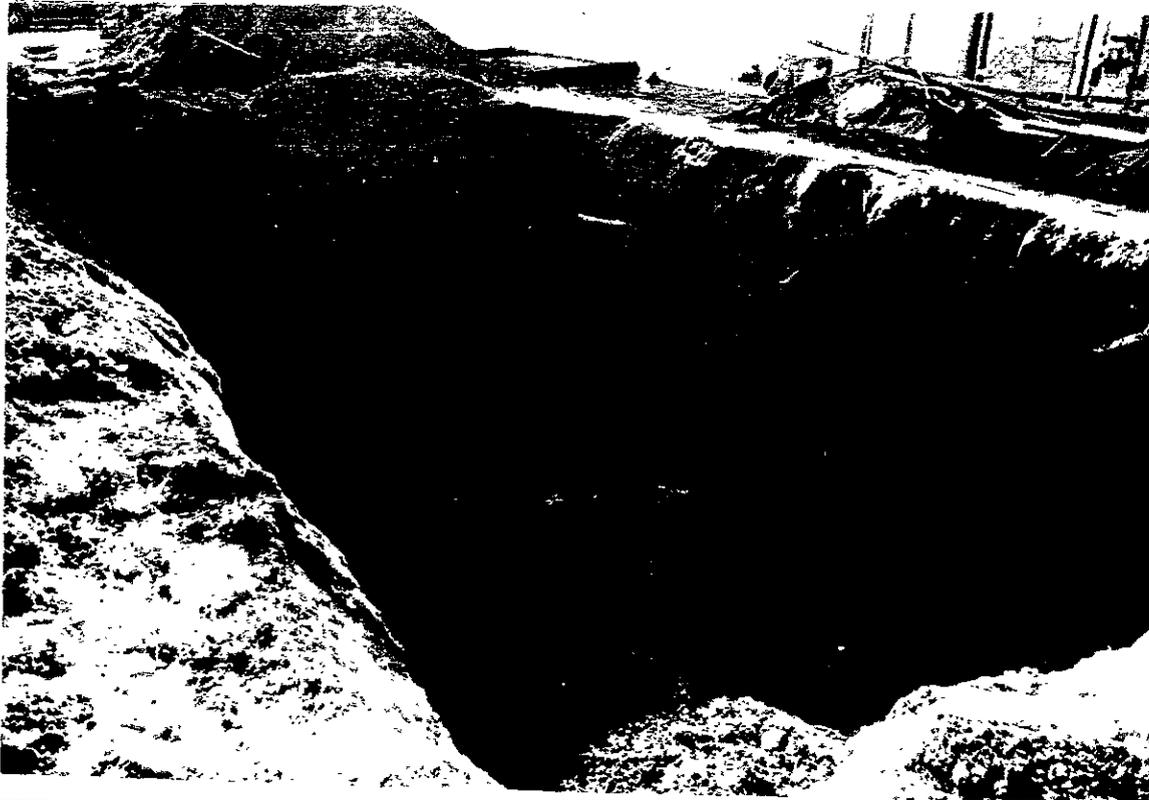

DEAR ROSANA:

I RECEIVED A LETTER FROM ALAMEDA COUNTY HEALTH CARE SERVICES WITH INQUIRES RE: UNDERGROUND STORAGE TANKS THAT WERE REMOVED IN 1991. I WAS ADVISED BY AMY LEECH OF ALAMEDA COUNTY TO SEND YOU A COPY OF THE LETTER TO SEE IF YOU CAN HELP IN THIS MATTER.

ENCLOSED IS A COPY OF THE LETTER FROM ALAMEDA COUNTY AND I APPRECIATE VERY MUCH ANY THING YOU CAN DO ON THIS MATTER.
THANK YOU.

SINCERELY,

MEL JOCSON

1.0 INTRODUCTION

1.1 Statement of Scope of Report

The purpose of this report is to define the physical and environmental setting of the site and vicinity, document tank removal, and to evaluate the necessity for remedial activities. Detailed analytical reports discussed herein are provided in Appendix 1. Manifests for the disposal of the tanks are in Appendix 2.

1.2 Site Location

The property is located at 17771 Meekland Avenue in Alameda County, in the central business district of Hayward. (See *Site Location Map* in Appendix 3, Location: Section 22, Township T14S, Range R2E.)

1.3 Background

Between 3 January and 4 January, four underground fuel storage tanks were removed from the *Jocson Auto Electric Site*. Tank abandonment was performed by SEMCO, Contractors License Number A48864. Excavation and transport of the tanks off-site for disposal was accomplished by Erickson, 255 Parr Blvd, Richmond, California. Ownership of the four tanks was transferred to the Erickson for offsite disposal.

An inspection of the excavation, following tank removal, revealed petroleum contamination on the south-east end of the excavation. (see Figure 1, Appendix 5, and Appendix 1)

1.4 Site History

The facility was originally built in approximately 1974.

Fuel inventory records and other pertinent information was not available from the current owner and operator.

2.0 SITE DESCRIPTION

2.1 Vicinity Description

The site consists of approximately 1950 square feet. Figure 1 is a plot plan of the site which shows the location of buildings, perimeter fencing, asphalt or concrete cover and the location of the former underground fuel tanks. The tanks were found to lie beneath the existing asphalt on the north-east side of the building.

2.2 Adjacent Land Use

Land use surrounding the site is predominantly residential and light industrial. The property is bordered on the north by Shasta Street. Meekland forms the eastern boundary.

2.3 Surface Water Characteristics

The site lies approximately 124 feet above mean sea level. The subject property is level and slopes gently to the east and north, toward storm sewers. Surface drainage on the property appears to be good.

The present day drainage system includes the storm drains surrounding the property.

2.4 Excavation and Removal of Fuel Storage Tanks

Four underground fuel storage tanks were excavated and removed from the site between 3 January and 4 January in accordance with proper procedures for tank abandonment. The tank contents were as follows:

two (2) 3,000-gallon fuel;
one (1) 5,000-gallon fuel; and

one (1) 300-gallon waste oil.

The installation date of the tanks is unknown.

It was determined that the tanks were dry before removal procedures were begun. Solid carbon dioxide (dry ice) was placed in the tanks followed by a water rinse before removal to eliminate any explosive vapors that may have existed. The tanks appeared to be in fair condition. The south tank had a few small holes on the top west end and several holes on the bottom. The two other tanks had no apparent holes. The piping and filler vents were not deteriorated.

Two Alameda County representatives were present at the time of tank removal. A copy of their site logs are included in Appendix 4. Soil samples were collected with a drive sampler, contained in sealed brass tubes, labeled, then stored in an iced container. Chain-of-custody procedures were observed. Locations of the former tanks are shown in Figure 2. Sampling locations are shown in Figure 1. On 4 January, SEMCO delivered the samples to Superior Analytical Laboratories, Inc. in Martinez, California for analysis. SEMCO requested the laboratory to analyze samples from the base of the excavation for total petroleum hydrocarbons as gas and diesel (EPA Method 8020/EPA Method 5030), and BTEX. The waste oil tank sample was run for the same as above plus Metals (EPA-846) and Total Oil and Grease (SM-5520).

Material excavated from around and beneath the tank was stockpiled on site. The spoils were then placed back in the excavation and the remainder

of vacant space was filled with 3/4 inch pea gravel.

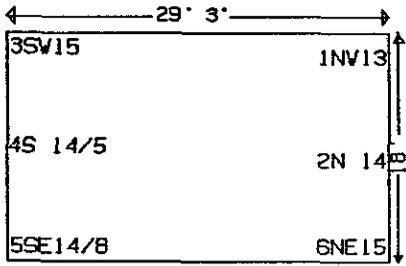

RESULTS

A summary of the analytical results are presented in Appendix 1.

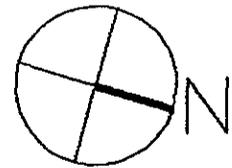

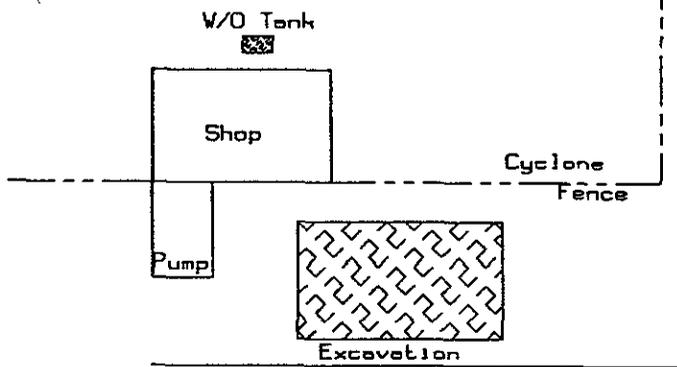

Following tank removal and receipt of the analytical results, it was determined that the south-east side of the excavation was contaminated. Further work will need to be initiated to render the site clean by current industry standards.

Comments:

all single walled tanks
 4 tanks removed. 3 former fuel tanks and 1 waste oil.
 6-55 gal drums of liquid waste were removed from tanks, hauled by Allied Petroleum. Tanks hauled by Irident Trucklines to Erickson.
 Middle fuel tank was removed first. No visible holes.
 North tank had a few small holes on top of tank, w. end, also a few on bottom.
 South tank - no apparent holes.
 Waste oil tank - no obvious holes aside from those made during excavation.
 20' of piping to island - 1 sample under former connection to pump. Hole is to be visqueen'd, refilled with stockpiled soil, visqueen'd and covered with pea gravel, once tanks are out and sampling is completed.
 Stockpiles:
 Product piping removed today.
 Tank removal not completed until 5:2 p.m.
 Scott Seery to over see sampling phase on 1/4/91

Comments:

9:00 — 10:30
On-site to witness sampling following removal yesterday of 4-USTs which includes one (1) w.o. tank. Upon arrival, the backhoe operator was busy removing sandy backfill. Pit sidewalls are stained a blue grey color. Only the southern-most tank location still had the tank depression intact. An "exploratory" pocket was excavated below the west end of the north tank upon arrival. Apparently the northern-most tank had holes observed top & bottom upon its removal. Mr. Joe Erdie of AUGER'S Env. was the sample collector. Six (6) sidewall samples were also collected (see map above). Native material appears to be a silty-sand/sandy-silt, with common organic material and rootlet holes (?). Samples were collected from both ends of each fuel tank, from below the w.o. tank, and along the product piping trench adjacent to the fuel dispensers. VISQUEEN will be used to separate clean from "dirty" fill as it is temporarily placed into pit pending sample analysis.

5. EPA I.D. No. * CAC 00549004
6. Contractor SEMCO
 Address 1741 Leslie Street
 City Tam Water Phone 572-80
 License Type A,B Cld 12-40 ID# 449864
7. Consultant N/A
 Address _____
 City _____ Phone _____

8. Contact Person for Investigation

Name Chuck Kipow Title Vice-President
 Phone 572-8033

9. Total No. of Tanks at facility 4

10. Have permit applications for all tanks been submitted to this office?
 Yes [] No []

11. State Registered Hazardous Waste Transporters/Facilities

a) Product/Waste Transporter

Name Allied Petroleum EPA I.D. No. CA098065675
 Address P.O. Box 193
 City Delmar State CA zip 95327

b) Rinsate Transporter

Name Allied Petroleum EPA I.D. No. CA098065675
 Address P.O. Box 193
 City Delmar State CA zip 95327

c) Tank Transporter

Name Erickson EPA I.D. No. CA000946637
 Address 255 Parr Blvd.
 City Richmond State CA zip 94801

d) Tank Disposal Site

Name Erickson EPA I.D. No. CA000946637
 Address 255 Parr Blvd.
 City Richmond State CA zip 94801

e) Contaminated Soil Transporter

Name Oillard Trucking EPA I.D. No. CA098169250
 Address Route 1 Box 73
 City Byron State CA zip 94514

Collector
 Name Chuck Kiper
 Company Chemco
 Address 1741 Haskell Street
 City San Mateo State CA zip 94402 Phone 572-803

13. Sampling Information for each tank or area

Tank or Area		Material sampled	Location & Depth
Capacity	Historic Contents (past 5 years)		
5000	GASOLINE	SOIL/WATER	2 feet below each end of tank
3000	↓	↓	↓
3000	↓	↓	↓
APX 300	WASTE OIL	soil	FILL or Pump end of tank
Piping		soil	1/20 linear feet
Stackpile soils			Depends upon intended use disposition of stackpile soil

14. Have tanks or pipes leaked in the past? Yes [] No [✓]

If yes, describe. _____

15. NFPA methods used for rendering tank inert? Yes [✓] No []

If yes, describe. High pressure hot water
detergent wash; 20 lbs per 1000 gallons
dry ice; final surge with air

An explosion proof combustible gas meter shall be used to verify tank inertness. Gasstech 1314

16. Laboratories

Name Superior Analytical
 Address 1555 Burke Unit 1
 City San Francisco State CA zip 94124
 State Certification No. 220 & 319

17. Chemical Methods to be used for Analyzing Samples

Contaminant Sought	EPA, DHS, or Other Sample Preparation Method Number	EPA, DHS, or Other Analysis Number
<u>Unleaded Gas</u>	TPH G BTX&E GC/FID(5030) 8020 or 8240	TPH G BTX&E 602 or 624
<u>Waste Oil or Unknown</u>	TPH G&D O & G BTX&E CL HC ICAP or AA TO DETECT METALS: METHOD 8270 FOR SOIL OR WATER TO DETECT: PCB* PCP* PNA CREOSOTE	TPH G&D O & G BTX&E CL HC 601 or 624 Cd, Cr, Pb, Zn PCB* PCP* PNA CREOSOTE

18. Submit Site Safety Plan

19. Workman's Compensation: Yes No Copy of Certificate enclosed? Yes No Name of insurer Sturmont20. Plot Plan submitted? Yes No 21. Deposit enclosed? Yes No

22. Please forward to this office the following information within 60 days after receipt of sample results.

- Chain of Custody Sheets
- Original Signed Laboratory Reports
- TSD to Generator copies of wastes shipped and received
- Attachment A summarizing laboratory results

TO SEMCO MODESTO

P. 01

I declare that to the best of my knowledge and belief the statements and information provided above are correct and true. I understand that information in addition to that provided above may be needed in order to obtain an approval from the Department of Environmental Health and that no work is to begin on this project until this plan is approved.

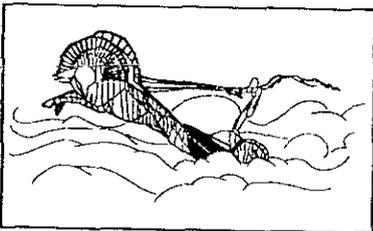

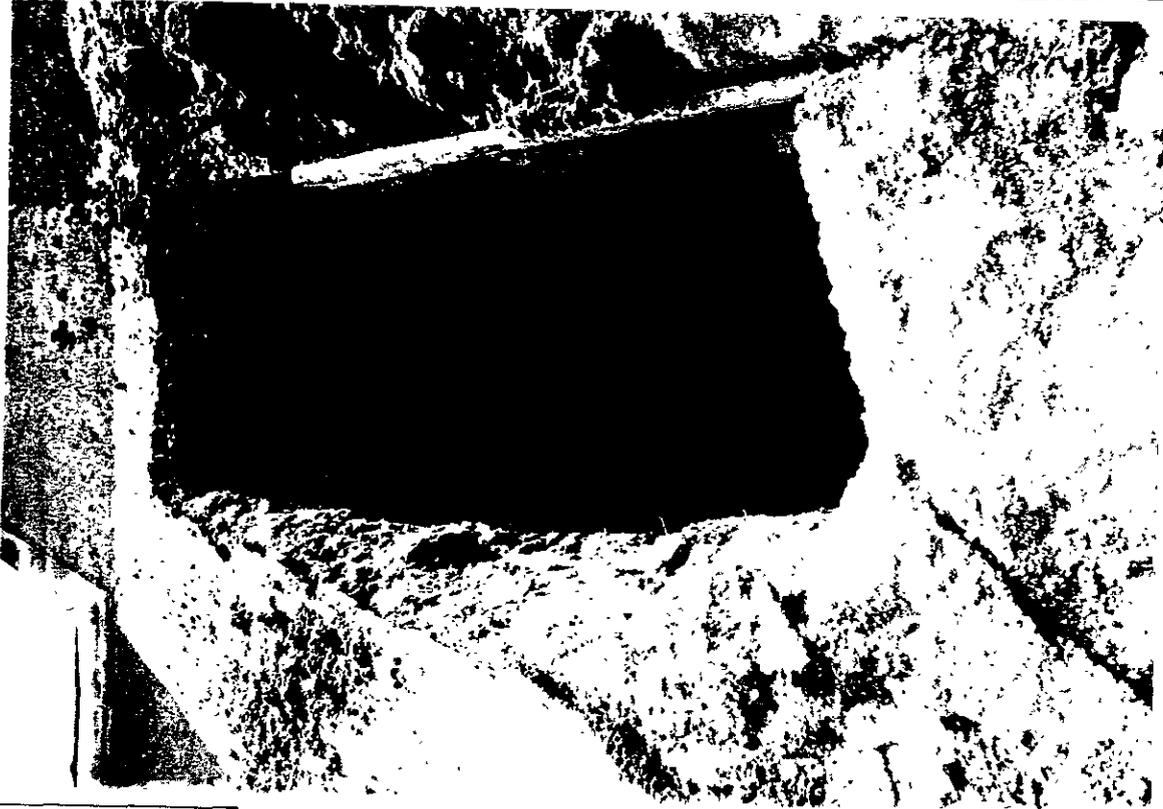

I understand that any changes in design, materials or equipment will void this plan if prior approval is not obtained.

I understand that all work performed during this project will be done in compliance with all applicable OSHA (Occupational Safety and Health Administration) requirements concerning personnel and safety.

I will notify the Department of Environmental Health at least two (2) working days (48 hours) after approval of this closure plan in advance to schedule any required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of Alameda.
