Dear Mr. Gholami:

Delta Environmental Consultants, Inc. (Delta) is pleased to submit this Quarterly Groundwater Monitoring Report. This report presents groundwater monitoring results for the subject site and recommends future work.

If you have any questions regarding this report please contact me at (916) 638-2765.

Sincerely,

DELTA ENVIRONMENTAL CONSULTANTS, INC.

James R. Brownell
California Registered Geologist No. 5078

QUARTERLY GROUNDWATER MONITORING REPORT
FOURTH QUARTER 2004

**FORMER RPMS (E-Z SERVE) LOCATION 100877
525 WEST A STREET
HAYWARD, CALIFORNIA**

1.0 INTRODUCTION

1.1 Purpose

The purpose of this Quarterly Groundwater Monitoring Report (QGMR) is to present the groundwater monitoring results completed by Delta Environmental Consultants, Inc. (Delta) at former RPMS (E-Z Serve) Location 100877 located at 525 West A Street in Hayward, California.

1.2 Scope of Services

The scope of services provided by Delta on the project consisted of the following:

- Gauged groundwater monitoring wells.
- Sampled groundwater monitoring wells.
- Analyzed groundwater samples for selected hydrocarbon constituents.
- Prepared this Quarterly Groundwater Monitoring Report.

1.3 Site Location

The site is a former E-Z Serve convenience store and retail gasoline station located at 525 West A Street in Hayward, California. The site is located in an area of commercial and residential properties.

2.0 GROUNDWATER MONITORING DATA

2.1 Groundwater Gauging and Sampling

Delta subcontracted Doulous Environmental, Inc. (Doulous) to perform groundwater monitoring activities at this site. On December 23, 2004, Doulous personnel mobilized to the site to conduct groundwater monitoring activities. Prior to purging, the monitoring wells were gauged for liquid phase hydrocarbons (LPH) and depth to water utilizing an oil water interface probe. Groundwater ranged from 15.99 feet to 17.53 feet below top of casing. No LPH was detected in any of the monitoring wells during the December 23, 2004 gauging activities. Monitoring wells MW-7, MW-12, MW-13 and MW-14 were not gauged or sampled during the December 23, 2004 gauging event due to being unable to locate the monitoring wells. Depths to groundwater and groundwater elevations are presented in Table 1, Groundwater Analytical Data.

Prior to sampling, the monitoring wells were purged utilizing a centrifugal pump by removing approximately three well volumes of water. Once the wells had been purged, they were sampled utilizing disposable polyurethane bailers. The groundwater samples collected were decanted into properly labeled, laboratory prepared sample containers and placed on ice for storage prior to transporting to the laboratory. The samples were transported, under strict chain-of-custody protocols, to *Kiff Analytical LLC of Davis, California*, for analysis for benzene, toluene, ethyl-benzene, total xylenes (BTEX), total petroleum hydrocarbons (TPH) in the gasoline range, methyl tert butyl ether (MTBE), diisopropyl ether (DIPE), ethyl tert butyl ether (ETBE), tert-amyl methyl ether (TAME) and tert butyl alcohol (TBA) by EPA Method 8260B.

2.2 Analytical Data

Laboratory chemical analysis on the groundwater samples collected on December 23, 2004 indicate that benzene concentrations have increased in monitoring wells MW-1, MW-1A, MW-2, MW-3, MW-4, and MW-5, and have decreased in monitoring wells MW-6, and EX-1. Benzene concentrations ranged from below reporting limits to 860 µg/L in monitoring well MW-1. MTBE concentrations have remained the below laboratory reporting limits in monitoring wells MW-1A, MW-3 and EX-1, have decreased in monitoring wells MW-5 and MW-6, and have increased in monitoring wells MW-1, MW-2 and MW-4. MTBE concentrations ranged from BRL below reporting limits to 16 µg/L in monitoring well MW-1.

Quarterly Groundwater Monitoring Report

Former E-Z Serve Location 100877

525 West A Street

Hayward, California

Delta Project No. RPMS0-877

Page 3

The analytical data for the December 23, 2004 sampling event are presented in Table 1, Groundwater Analytical Data. Field sampling information sheets are presented in Appendix A. Laboratory analytical results, chain-of-custody documentation and graphs are presented in Appendix B.

3.0 CONCLUSIONS AND RECOMMENDATIONS

3.1 Conclusions

Groundwater table elevation data were used to approximate the flow direction and gradient across the site on December 23, 2004 by contouring. Based on the contours presented on Figure 2 – Groundwater Contour Map, the flow direction was toward the southwest at a hydraulic gradient of approximately 0.02.

Reported analytical data for the groundwater samples collected on December 23, 2004 indicate that benzene concentrations have increased in six of the eight monitoring wells sampled. Reported MTBE concentrations increased in three monitoring wells, two of which are downgradient from the UST location. The three upgradient monitoring wells have remained below laboratory reporting limits (BRL).

3.2 Recommendations

Delta recommends continued quarterly groundwater monitoring and sampling. Delta also recommends attempting to locate well heads of monitoring wells MW-8 through MW-11.

4.0 REMARKS

The recommendations contained in this report represent Delta's professional opinions based upon the currently available information and are arrived at in accordance with currently acceptable professional standards. This report is based upon a specific scope of work requested by the client. The Contract between Delta and its client outlines the scope of work, and only those tasks specifically authorized by that contract or outlined in this report were performed. This report is intended only for the use of Delta's Client and anyone else specifically listed on this report. Delta will not and cannot be liable for unauthorized reliance by any other third party. Other than as contained in this paragraph, Delta makes no express or implied warranty as to the contents of this report.

This report was prepared by **DELTA ENVIRONMENTAL CONSULTANTS, INC.**

If you have any questions, please call Jim Brownell at (916) 638-2765.

Notes: No known groundwater monitoring or sampling was conducted between June 1, 1998 and June 14, 2001 and June 14, 2001 and November 7, 2001. Wellhead elevations resurveyed on January 30, 2002.

Explanations:

msl = mean seal level

(µg/L) = micrograms per liter

TBA = Tertiary butyl alcohol

MTBE = Methyl tertiary butyl ether

DIPE = Di-isopropyl ether

ETBE = Ethyl tertiary butyl ether

TAME = Tertiary amyl methyl ether

EDB = 1,2-Dibromoethane

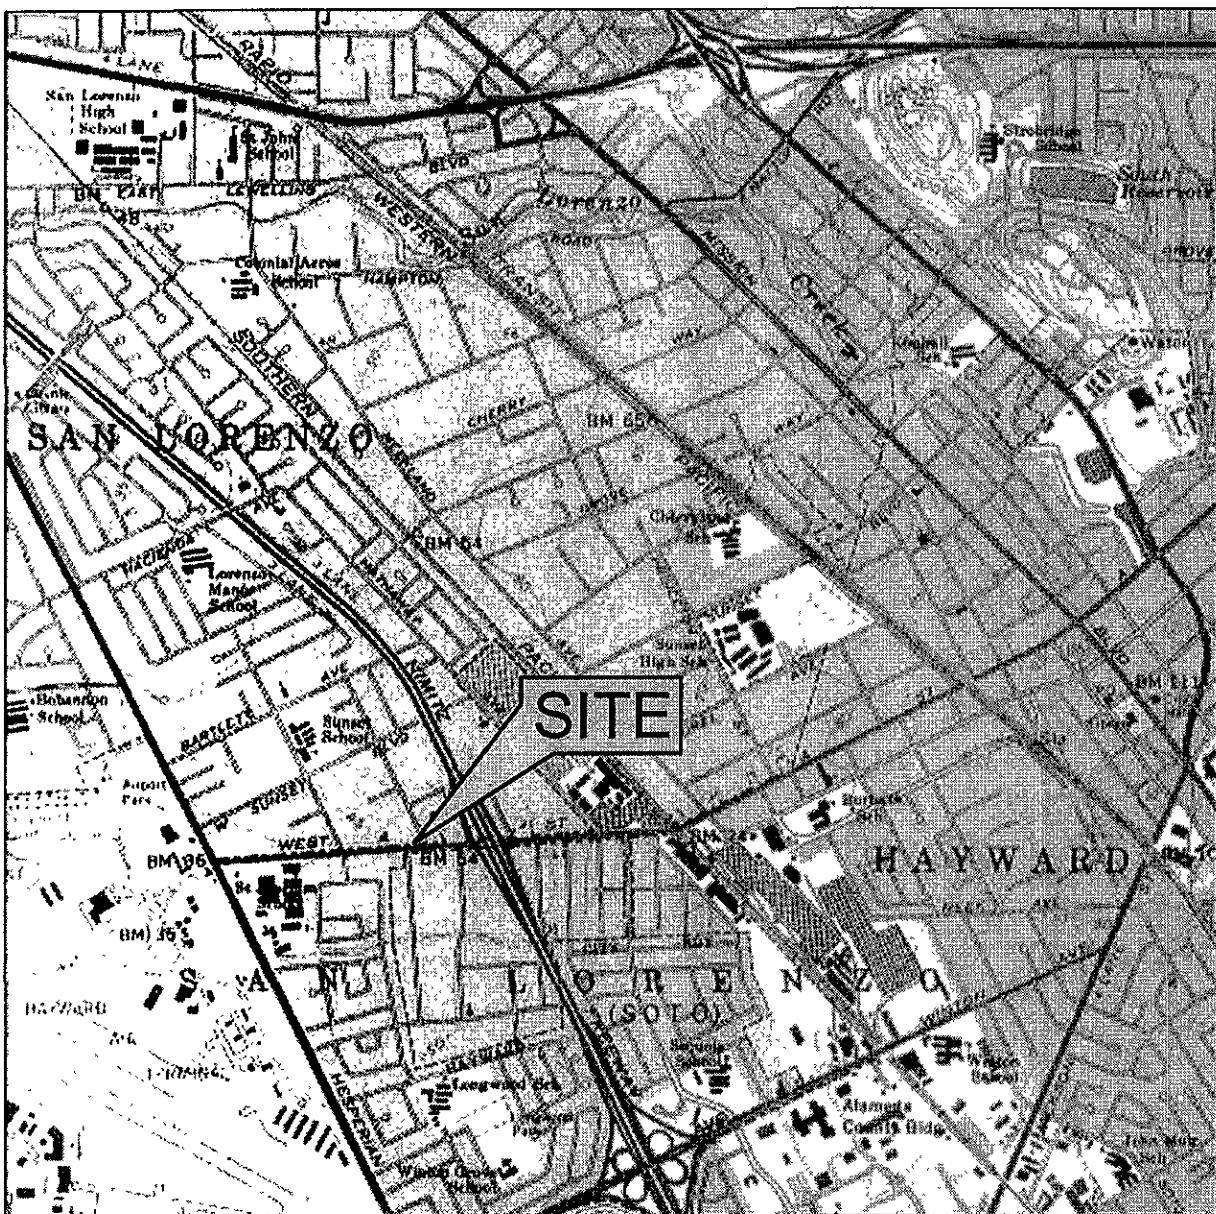

-- = Not measured, or analyzed

DRY = Insufficient water to sample

TPHg = Total Petroleum Hydrocarbons as gasoline (EPA Method 8015).

SHEEN = Discontinuous, non-measurable thickness of PSH.

< = Sample reported as "not detected," in previous tables, reporting limit not known.

APPENDIX B
Groundwater Laboratory Analytical Data

Report Number : 41727
Date : 1/5/2005

Jim Brownell
Delta Environmental Consultants, Inc.
3164 Gold Camp Drive, Suite 200
Rancho Cordova, CA 95670

Subject : 8 Water Samples
Project Name : EZ Serve #100877
Project Number :
P.O. Number : RPMS0877

Dear Mr. Brownell,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff". The signature is fluid and cursive, with a large, stylized "J" on the left and "Joel" followed by "Kiff" on the right.
