Subject: Fwd: Oakland Targeted Site Investigation Application for 3860-3884 MLK

ENVISION: 3884 MLK
(Grove St. Wash Rack)
R027
Status "1"

Oakland
Targeted Site Invest

The City of Oakland has applied for a targeted site investigation (see attached), to be done by a DTSC contractor using USEPA brownfield grant funds ... RB staff will be collaborating with staff at other RBs and at DTSC to select up to 12 projects to receive TSIs ... I notice that one of the two parcels in the city's proposal is listed in LUSTIS and Geotracker as an LOP-lead case (01-2290 Grove Street Wash Rack at 3884 Martin Luther King Way in Oakland, status = 3B, your file #4371) ... the City's TSI application says the case was closed, but that seems incorrect ... can you tell me what if anything you guys are doing with this case? ... has the LOP issued any investigation or cleanup directives and if so has the City complied? ... this will affect the project's eligibility to receive a TSI ... we want to make an eligibility determination by Oct 31 ... cheers
