Returned call from Derrick Lee with EBMUD. He said that he received the letter sent to Eileen (who left EBMUD) and wished to clarify certain issues. He said that there is one additional report they have that documents additional soil removal and that it may address concerns identified in our letter. I checked our files and confirmed that we do not have the report he mentioned. He asking for additional time to submit a work plan since he believes this additional report may address our concerns. I told him to submit the report for review and we can then re-assess whether the report addresses our concerns.
