While a bit longer than most requests, this would be fine, but is unlikely to be further extended. Please use this email as acknowledgement of ACEH's acceptance of the revised Geotracker compliance schedule.

I'll see what I can do in regards to the note to Geotracker, although I think it would be obvious to those who'd look. Regardless, I'll check.

Subject: Update on RO0000042/RO0000043

Mark-

To follow up on our discussion last week, we are in the process of setting up a meeting with the parties associated with the adjacent 1650 65th Street to discuss the Geotracker uploading logistics and the follow-on work requested by ACEH. Given the need for this multi-party coordination (& we have to have the analytical laboratory split the electronic files), Sybase requests a 90-day extension to comply with the Geotracker upload request. We hope to be able to comply with the 5/27 deadline to submit the work plan for the vapor intrusion investigation, but it will depend, in part, on our ability to schedule a meeting with the adjacent property owner.

In addition, Sybase requests that ACEH add a note to Geotracker indicating that groundwater data for wells MW-3, MW-5, and MW-7 are located on the adjacent property (with the appropriate global ID).

Thanks,
Michelle
