Hi Hollis,

That seems reasonable. I show a two week extension to be August 7th, but the 21st is fine. I've updated Geotracker to reflect the revised date.

Mark:

We switched analytical laboratories on the BP portfolio and we got unusual data back during the SA event at 11126 (exceedances at wells that have historically been ND). Therefore we collected a split sample at the newly installed well and sent it off to both labs. Unfortunately the results came back quite different for DRO. We are now re-running the samples in both labs. Long story short, may I ask for another 2 week extension on the due date of the report while the labs run the samples and we can look at the data? This would push the due date of the report to August 21, 2015.

Hollis

Mark:

We will not get the groundwater sample results back for the new well until July 24, 2015, which is the due date of the Soil and Groundwater Report. Would it be possible to get a two week extension and submit the report on August 7, 2015?

Hollis
