Re: Greyhound Terminal

Location 8934

Oakland, California

Dear Ms. Hugo:

On behalf of Greyhound Lines, Inc., Engineering-Science, Inc. (ES) is pleased to submit the May 1993 monthly monitoring report for the Greyhound Terminal in Oakland. Attached you will find Table 1 which lists the measured water levels and free-product thicknesses from on-site wells monitored during our site visit. Figure 1 shows the locations of the monitoring wells.

During our site visit on May 6, free phase hydrocarbons were observed in recovery wells BC-1, ES-2 and ES-5. A hydrocarbon sheen was present in recovery well ES-1. The hydrocarbon recovery system in operation at this facility continues to work effectively, reducing product thicknesses in recovery wells ES-1, ES-2, ES-5 and BC-1 to 0.10 feet or less. A total of 615 gallons of diesel fuel and contaminated groundwater have been recovered to date. Our next site visit is scheduled during the week of June 7, 1993.

Greyhound awaits ACDEH approval and/or comments on the supplemental site assessment work plan, the closure documentation submitted in December 1992, and the current remediation program in progress at this facility.

If you have any questions or require additional information, please feel free to contact us at (315) 451-9560.

Sincerely,

ENGINEERING-SCIENCE, INC.
