**Re: Request for Response – No Further Action Request
ARCO Service Station No. 0374
6407 Telegraph Avenue
Oakland, California
ACEH Case No. RO0000078**

Dear Ms. Roe,

As you may be aware, Atlantic Richfield Company (ARC) has retained the services of Closure Solutions, Inc. in a statewide effort to identify environmental cases that appear to meet the State criteria for low-threat closure. Based on Closure Solutions' review, the above referenced case does not appear to pose a significant threat to human health, environmental receptors, or the reasonably anticipated beneficial uses of water, and a formal No Further Action Request (closure request) was submitted to your office on July 27, 2011 and a Conceptual Site Model also requesting closure was sent to your office on January 25, 2012.

Pursuant to California Code of Regulations (CCR) Title 23 §2814.6, if an agency does not respond to a closure request within 60 days, the closure request is considered to be in de facto denial. Because of the recent change in Alameda County Environmental Health oversight personnel for this case, ARC respectfully requests that you respond to the request for closure by June 29, 2012.

We are very interested facilitating your review of this closure request, and would be happy to meet with you to discuss the justification for closure at your convenience. If you have any questions, please feel free to contact me at (916) 760-7025.

Sincerely,

Closure Solutions, Inc.

Kathleen A. Waldo
Senior Project Engineer
