

3-28-01

Spoke to Major Summerside with Salvation
Army c Louise.

8-20-00

Robert Kilay, Aqua Science Engineers said he does not have the time to prepare a site summary report because of his workload. I told him I only asked for one to ~~report~~ expedite closure.

12-27-00

left msg. for Robert Kilay to file an ARF and to submit a copy of the well sampling report for the water sample collected on 7-19-2000.

1-6-2000

Faxed Max Diamond, new property owner copy
of soil and groundwater anal. from Aqua
Science Engineer Report dated 10-25-99
His phone # 415-346-9970
His fax # 415-292-6268

4-20-99

Spoke to Robert Kilay of Aqua Science. He informed me the work outlined in the workplan dated 4-5-99 has been completed. The boring was installed and across the street on clay, shaft could not be advanced ~~to~~ ^{below} 7'-8', therefore no soil or groundwater samples were taken down gradient. All soil and groundwater samples were ND with the exception of the boring nearest the corner of Clay and 8th St. The groundwater contained 3,100 ppb TPH(C), 1,000 ppb TPH(C1), 540 ppb benzene, 250 ppb ethylbenzene, 38 ppb xylene, ND toluene and ND MTBE. I told him because of the benzene conc., they would have to monitor for a year to verify the plume has stabilized. After that time frame, a request for closure maybe appropriate. He will submit the final report for this investigation.

3-15-99

Spoke with Robert Kilay of Aqua Science concerning the workplan he is preparing. He will submit in a workplan that will include advanced soil boring ~~around~~ around the perimeter of the building near SB-1. Groundwater will be taken from the borings and air sample will be taken using a summa canister.

4-2-99

Spoke to Kilay and asked him ~~to~~ how the U.G.T. locations was determined. He said because ~~of~~ SB-1 was hot, it was assumed the UGT had to be near that area, and it made sense to put a basement in the U.G.T. excavation after the UGT were removed. He is going to submit an amended workplan to ~~include~~ move the borings into the longitudinal direction.

2-22-99

Spoke to Robert Kiley @ Ague
Science and informed him this
office cannot work on this
case until it has been referred
by the City of Oakland.

I left a mes. with Gray
Griffin that a copy of this
report is coming his way.

2-25-99 Left another mes. for Gray.
Gray left mes. he will do the paperwork
to transfer case to us

2-26-99 Left mes. with Michael Dumbreda
to
