Subject: RE: Oakland Truck Stop

Tom,

I will not be on site for well destruction. Alameda County Public Works oversees well decommissioning; therefore, they would be the agency to answer the question regarding grouting inspection. I would like to come out to the site when the initial excavation is near completion.

Thanks,

Jerry Wickham

Subject: Oakland Truck Stop

Hello Jerry,

Matriks and Gregg Drilling will be at the Oakland Truck Stop on July 2, 2008 to drill out monitoring wells MW-1, MW-3 and MW-6 in accordance with the work plan. We will be starting at 8am and will continue until completion. Will you require a grouting inspection? We applied for the well destruction permits with Alameda County Public Works two weeks ago. I will be in their office tomorrow to pick up copies of the permits. The site was USA marked for both the well destruction and UST removal with over excavation.

The site dismantle will begin on July 7, 2008. I expect to have the USTs removed on July 8. We will be implementing the work plan immediately upon UST removal. We expect to install the new USTs the following week. Our geologist, David Janney will be onsite for the UST removal and initial excavation phase. Please call me with any questions or comments.

Regards,

Tom Henderson
