**Attachments:** RO0092\_Closure Summary and Att 1-5.pdf; RO0092\_Boring Logs.pdf; RO0092\_deed restriction and SMP.pdf

Hi Cherie,

I am attaching a closure summary for the AB&I Foundry at 7825 San Leandro Street in Oakland. We are planning to close this case with a deed restriction and Risk Management Plan. The case deals with USTs in several areas of the site. The closure summary is large enough that I am sending it in three different files.

There is a second inactive case listed on GeoTracker for this site with the Water Board listed as the lead (SL18298719). There is no information in GeoTracker to explain what the case is or why it was created. Could you check and see if the second case can be closed out so that aren't left with an open case on GeoTracker for the site.

Thanks,  
Jerry Wickham
