Subject: RE: Eagle Gas (RO0000096) Free Sample Analysis
Jim,

Your proposal to conduct chromatographic analysis on the free product sample is acceptable.

Regards,

Jerry Wickham

Subject: Eagle Gas (RO0000096) Free Sample Analysis

Greetings Jerry-

Regarding Eagle Gas (San Leandro Street and High Street) in Oakland, at our well sampling event yesterday, it was noted that well IS-5 had about 1-inch of floating free product. A sample of the product was placed with groundwater in a 40 ml VOA container. It is currently in a refrigerated environment pending your decision.

It does not look like "normal" free product and we wanted your permission and directive to send it to Friedman & Bruya (our choice) or other laboratory for chromatographic analysis and interpretation of what the LNAPL is. This will help us with our site conceptual model.

Please let me know if we have your permission and directive to send the sample for chromatographic analysis.

Sincerely,

Jim Jacobs
Clearwater Group
