Phone call with Sandy regarding the Invitation to Comment – Potential Case Closure. Her brother lives in a trailer on the site and is the caretaker, performing landscaping and other maintenance. She asked if working on the site was hazardous. I indicated that the fuel leak case had been open for approximately 20 years. The case was recently evaluated and found to meet the criteria for case closure under the State Water Resources Control Board Low-Threat Closure Policy. Sites that meet the criteria are assumed to not pose a risk to human health; therefore, we do not see a reason to keep the case open.
