APPENDIX B

ERIIS Database Search Report

1.0 INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) of the Housewives Marketplace and retail/office space located north of 8th Street, south of 9th Street, east of Jefferson Street, and west of Clay Street in Oakland, Alameda County, California (the subject property) performed by SECOR International Incorporated (SECOR). This ESA was performed for the City of Oakland, Office of Public Works, Environmental Services Division at the request of Mr. Gary Galindo in support of a potential financial transaction regarding the subject property.

The Phase I ESA was completed by Mr. Gary Hennis and reviewed by Mr. Mark Becker. Each are experienced professionals in the field of Phase I ESAs and related environmental investigations.

1.1 Objective

The objective of this ESA was to perform appropriate inquiry into the past ownership and uses of the subject property consistent with good commercial or customary practice as outlined by the American Society of Testing and Materials (ASTM) in the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-94. The purpose of this assessment was to identify, to the extent feasible, recognized environmental conditions on the subject property or within the study area defined by the ASTM standard that potentially have and/or cause an adverse environmental impact to the subject property.

1.2 Scope of Work

The Phase I ESA was performed in accordance with the scope of work provided to the City of Oakland in SECOR's proposal dated April 30, 1997. This assessment consisted of a visual inspection of the subject property, interviews, a historical review, a review of the pertinent records of local, state and federal agencies, and review of previous investigation reports provided by the City of Oakland. The scope of services in the proposal did not include: radon sampling, evaluation of overall environmental regulatory compliance, or sampling and analysis of environmental media (i.e., soil and water). An asbestos survey was also conducted. The results of that survey are presented in a separate report.

HOUSWIFE RO. - 6 1 September 10: 1997 SECOR Joo No. 70,000-01 HJI

2.0 ENVIRONMENTAL SETTING

2.1 Regional Physiographic Conditions

The subject property is located in the City of Oakland, Alameda County, California. The United States Geological Survey (USGS) 7.5 Minute Topographic Map of the Oakland West Quadrangle (originally printed in 1959 and photo revised in 1980) was reviewed and is included as Figure 1. The USGS map does not depict any buildings located on the subject property, although the area is depicted as urban development. The map shows the subject property to be at an elevation of approximately 33 feet above mean sea level (msl). The area gently slopes to the west-southwest. The nearest water body is the Oakland Inner Harbor, which is part of San Francisco Bay. The Oakland Inner Harbor is located approximately one-half mile south of the subject property.

2.2 Regional Geology

The subject property is located within a large area of regional subsidence and sediment fill known as the San Francisco Bay trough. This trough extends from the Hayward fault westward across Oakland and San Francisco Bay. The bedrock block within this trough has been tilted to the east, causing the maximum subsidence and subsequent maximum accumulation of sediments to occur in the eastern part of the trough within an area including the present City of Oakland.

This subsidence and deposition of successive layers of sediments has been occurring since the start of Pleistocene time (about 2 million years ago). Development of the San Francisco Bay trough is directly related to the evolution of the San Andreas fault system, which contains the Hayward and San Andreas faults, as well as other faults to the east.

The subject property is directly underlain by three geologic units that are part of the sedimentary fill of the San Francisco Bay trough. These units are (from ground surface down) the Merritt Sand, the San Antonio Formation, and the Alameda Formation. These units are Pleistocene in age (Woodward-Clyde Consultants, 1991).

2.3 Regional Hydrogeology

Based on information gathered at sites in the vicinity of the subject property, groundwater likely occurs at depths of 25 to 30 feet below ground surface (bgs). Groundwater beneath the subject property appears generally to flow to the west-southwest towards the Oakland Inner Harbor.

HOUSWITE RO. - ()
September 10 1997
SECOR Job No. 2010(H), J-).

3.0 PROPERTY RECONNAISSANCE

SECOR performed a reconnaissance of the subject property on June 13, 1997. Information regarding the subject property and access to the property were provided by Mr. Gary Galindo of the City of Oakland, and representatives of the owner of the subject property. SECOR observed accessible interior and exterior common areas of the three buildings, tenant spaces, and interior storage areas. Weather conditions during the inspection were fair and sunny. No weather related restrictions were encountered.

The purpose of the reconnaissance was to note obvious current conditions and evidence of historical land uses that may suggest potential environmental impacts to the subject property. Examples of such conditions include storage, disposal and treatment of solid and/or hazardous waste, storage tanks and other chemical containers, odors, pools of liquid, staining, drains, sumps, pits, ponds, lagoons, septic systems, wells, unusual soil disturbance, stressed vegetation, and electrical transformers.

3.1 Subject Property Description and Current Uses

The subject property is located in a retail/commercial area of Oakland, west of Clay Street, east of Jefferson Street, north of 8th Street, and south of 9th Street. Figure 1 (USGS map) depicts the location of the subject property.

The subject property consists of three individual, but contiguous buildings. The buildings are identified herein as the Housewives Marketplace building (single-story warehouse type building), a two-story retail/office building and a three-story retail/office building. The Housewives Marketplace building is identified as 819 and 825 Clay Street and 818 Jefferson Street. The two-story building is identified as 809 Clay Street. The three-story building is identified as 801, 805, and 807 Clay Street and 554, 556, and 558 8th Street.

All of the retail space within the Housewives Marketplace was occupied at the time of the reconnaissance. The retail tenants included: Young's Clothing and Jewelry, Helen's Fashions, Mr. Kick's Shoe Shine, Boughman's BBQ and Deli, Housewives's Liquor, Housewives Grocery Mart, Moura's Seafood, Taylor's Sausage Shop, and Jack's Meats. Each of these tenants conduct retail sales of food or clothing goods and related items. Chemicals observed within the Housewives Marketplace included janitorial supplies and related equipment.

The three-story building was occupied by Anna's Sewing Fashions, Seiko Construction, Sunlite Fashions, Paula Mock (the building owner), and KBM Corporation. Anna's Fashions, Sunlite Fashions, and KBM Corporation are all clothing manufacturers, that is, each facility is a sewing warehouse. Seiko Construction and Paula Mock use the space as office space.

The two-story building was occupied by Oriental Food Mart. The first floor of the building was used as a retail grocery store. The second level of the Oriental Food Mart was not accessible and was reported to be used for office/storage. The buildings and subject property features are depicted on Figure 2.

HOUSWIFE R01 - 6 1 September 10 1997 SECOR Joo No 70100-019-0. 3.1.1 Interior Storage Areas

Interior storage areas were observed during the reconnaissance of the subject property. The interior

storage areas were used to store personal belongings, equipment and supplies, and inventory such as

food and clothing material.

3.1.2 Interior Waste Disposal Areas

During SECOR's site visit, no interior waste disposal areas were observed except for sanitary waste

disposal. Additionally, no indication of hazardous materials/waste use or releases were observed or

reported during SECOR's site visit.

3.1.3 Interior Subsurface Structures

Interior discharge of waste is limited to domestic waste water that is discharged into the public sewer

system.

3.1.4 Exterior Storage Areas

No exterior storage of hazardous materials and/or petroleum products in connection with the subject

property operations were observed or reported during SECOR's site visit.

3.1.5 Exterior Disposal Areas

SECOR observed exterior disposal areas which consisted of rolling trash dumpsters. The trash

dumpsters appeared to be used for general trash disposal. No indication of disposal of hazardous

materials or petroleum products to the dumpsters was noted.

3.1.6 Exterior Subsurface Structures

No exterior subsurface structures were observed or reported.

3.1.7 Underground Storage Tanks

SECOR did not observe evidence (i.e., fill pipes, vent pipes, and dispensers) of underground storage

tanks (USTs) in connection with the subject property. Information obtained from review of Sanborn Maps revealed that gasoline stations were formerly located near the southwest and northeast corners

of the subject property. It is likely that USTs were located at the subject property at the time the gasoline stations were in operation, and there is a potential that the tanks were not removed when the

3-2

gasoline stations were demolished.

HOUSWIFE RO. - 61

September 10, 1997

SECOR Job No 20100-019-01

(6 70(00-01)-01

3.1.8 Surface Water

SECOR did not observe surface water during the site visit. Surface water appears to be diverted via gravity flow to storm drains located on 8th Street.

3.2 Polychlorinated Biphenyls (PCBs)

Three pole-mounted electrical transformers were observed along the west side of the subject property. Based on the probable time of installation, it is possible that the transformers on the subject property may contain PCBs. Transformers on the subject property are expected to be owned by, and the responsibility of, Pacific Gas and Electric Company. No indication of a release from the transformers (i.e., no staining) was observed during SECOR's site visit.

3.3 Electro-Magnetic Field (EMF)

During the site visit and according to the topographic map of the Oakland West Quadrangle, no overhead power lines and/or towers were observed to be located near the subject property.

3.4 Water Supply and Sewage Disposal

Domestic water is supplied to the subject property by East Bay Municipal Utilities District (EBMUD). Sewage disposal services are also provided to the subject property by EBMUD. Sewage is treated at the Water Pollution Control Plant in Oakland. Following treatment, the effluent is discharged into San Francisco Bay.

3.5 Land Uses in the Vicinity of the Subject Property

The general area surrounding the subject property consists of commercial and retail uses. Across 9th Street, to the north, was a parcel which was under construction. The parcel was formerly used as a parking lot. To the east of the subject property, across Clay Street, are Chan's Trading Inc. (Imported goods) and a office building occupied by the Salvation Army. South of the subject property, across 8th Street, are a parking lot and two apartment buildings. Two floral supply operations are located to the west of the subject property, across Jefferson Street.

HOUSWIFE R01 - 6 1 September 10 - 1997 SECOR Joo No. 70100-019-01

4.0 HISTORICAL PROPERTY USE

Based on the historical information reviewed, the subject property was occupied by dwellings and/or boarding houses as early as 1889. The Rattan Works (furniture manufacturing) was located at the subject property as early as 1912. As early as 1951, auto service including oil and gas sales were conducted on the subject property. The existing buildings and uses (Housewives Marketplace, two-story and three-story retail/office) were depicted on 1957 Sanborn Maps, and have remained unchanged since that time.

4.1 Aerial Photograph Review

Aerial photographs were reviewed at Pacific Aerial Surveys in Oakland, California. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photograph. However, specific elements of a site's operations cannot normally be determined from the photographs.

A review of aerial photographs from the years 1950, 1957, 1963, 1969, 1975, 1981, 1985, 1990, and 1996 revealed the existing building on the subject property. The following presents the significant findings of the aerial photograph review.

- The 1950 aerial photograph showed the subject property developed with several commercial/industrial buildings. The specific use of the buildings could not be ascertained by review of the photograph. The property in the vicinity of the subject property was completely developed with commercial/industrial and retail uses.
- The 1957, 1963, 1969, 1975, 1981, 1985, 1990, and 1996 aerial photographs showed the subject property developed with the buildings observed during SECOR's site visit, that is, the Housewives Marketplace, and the two-story and three-story retail buildings, and associated parking lot. The property in the vicinity of the subject property was completely developed with commercial/industrial and retail uses. A gas station was observed to the east-southeast of the subject property at the northeast corner of Clay Street and 8th Street (where the Salvation Army is currently located). The property immediately north of the subject property (currently under construction) appeared as a parking lot in the 1975 through 1996 photographs.

4.2 Sanborn Fire Insurance Map Review

Sanborn Fire Insurance Maps were available for the subject property for the years 1889, 1902, 1912, 1951, 1952, 1957, 1958, 1961, 1967, and 1970.

HOUSWIFE R01 - 6.1 September 10, 1997 SECOR Job No 70100-019-01 The Sanborn Map from 1889 depicted three dwellings and an outhouse on the subject property. The 9th Street Livery and Feed was located north of the subject property. Dwellings were located east, west, and south of the subject property.

The Sanborn Map from 1902 depicted the same three dwellings and an outhouse on the subject property; however, one of the dwellings was named "The Lorne Building" (boarding house). The uses of the properties in the vicinity remained the same as in 1889.

The 1912 Sanborn Map indicated the same residential use of the subject property. In addition, the Rattan Works (furniture assembly) was present in the southeast corner of the subject property (current three-story building, two stores were depicted in the current location of the two-story building, and a carpenter shop was depicted in the central portion of the subject property.

The Sanborn Maps from 1951 and 1952 depicted a "Gas and Oil" (auto service) station along Jefferson Street (west side of the subject property). A second "Auto Service" station was observed on the subject property at the corner of 9th Street and Clay Street. Gasoline and oil tanks were depicted at each facility. The furniture assembly described above, one boarding house, and a single-family dwelling remain on the subject property. The central portion of the subject property was described as auto parking. A gasoline station was depicted offsite to the east-southeast of the subject property.

The remaining Sanborn Maps (1957, 1958, 1961, 1967, and 1970) revealed the subject property with the buildings which were observed during the site visit by SECOR. The Housewives Market was situated on the northern half of the subject property. A cold storage shed was connected to the southeast corner of the building along with a meat-cutting room. A building occupied by a store and two dwellings (the two-story building) was depicted adjacent to the meat-cutting/cold storage areas. Adjacent to the two-story building was the three-story furniture assembly building. The Sanborn Maps are included as Appendix A.

4.3 City Directories

SECOR also reviewed available Polk and Haines Directories for the City of Oakland. Directories were available for the years: 1967, 1975, 1980, 1985, and 1990.

The 1967 Directory identified the subject property occupied by the Housewives Market. The tenants of the Housewives Market included: Allen's Ham & Bacon, Baughman's Donut Shop, Bean Bag Bulk Foods, Chizie Liquors, Myron Coleman-Chiropractor, Contessa Jewelry, Eggway Creamery, Farm Produce, Grandma's Dairy, Mrs. Horowits Cut Rate Bakery, Housewives Groceria, Inc., Housewives Market Shoe Repair, Jack's Meats, Moura's Fish Market, Myron's Delicatessen, Parenti Poultry, Rico's Produce, Taylor's Sausage Shop, and Mrs. Linda Welch.

The 1975 Directory identified the following tenants at the subject property: Baughman's Donut Shop, HM Stores, Inc., Housewives Market, Income Tax Service Center, Moura's Fish Market, Pats Wig Shop, and Taylor Sausage Shop.

The 1980 Directory identified the following tenants at the subject property: HM Stores, Inc., Moura's Fish Market, Oriental Lucky Mart, Pats Wig Shop, and Taylor Sausage Shop.

The 1985 Directory identified the following tenants at the subject property: HM Stores, Inc., Moura's Fish Market, Oasis Enterprise Company, Oriental Lucky Mart, Pats Wig Shop, and Taylor Sausage Shop.

The 1990 Directory identified the following tenants at the subject property: HM Stores, Inc., Moura's Fish Market, Oasis Enterprise Company, Oriental Lucky Mart, Pats Wig Shop, and Taylor Sausage Shop.

HOUSWIFE R01 - 6 1 September 10, 1997 SECOR Job No. 70100-0.9-0

5.0 REGULATORY AGENCY LIST REVIEW AND FILE RESEARCH

SECOR contracted with Environmental Risk Information and Imaging Services (ERIIS) to search databases maintained by various federal and state environmental agencies and provide a report documenting their findings. The purpose of the review was to identify reported listings for the subject property or other properties in the vicinity. Databases reviewed included federal and state lists of known or suspected contaminated sites, known handlers or generators of hazardous waste, known waste disposal facilities, and permitted USTs. The databases which were researched and the searched distances for each database are described below.

- U.S. Environmental Protection Agency (EPA): National Priorities List (NPL), Federal Superfund List, February 1997.
- EPA: Comprehensive Environmental Response, Cleanup and Liability Information System (CERCLIS), February 1997.
- EPA: Resource Conservation and Recovery Act (RCRA): Facilities that Report Generation,
 Storage, Transportation, Treatment or Disposal of Hazardous Waste (TSD), October 1996.
- EPA: RCRA: Facilities that Report the Generation of Small and Large Quantities of Hazardous Waste, October 1996.
- Emergency Response Notification System (ERNS): Report of Reported Releases of Oil and Hazardous Substances, March 1997.
- California Environmental Protection Agency (Cal-EPA): Calsites List of Annual Work Plan (AWP) Sites, March 1996.
- California Integrated Waste Management Board (CIWMB): Solid Waste Information System (SWIS), Active Landfills, Closed and Inactive Landfills, Incinerators and Transfer Station Lists, February 1997.
- Cal-EPA: Leaking Underground Storage Tank (LUST) Information List, January 1997.
- Regional Water Quality Control Board (RWQCB): Facilities With Underground/ Aboveground Storage Tank Information List, March 1994.
- Cal-EPA. Department of Toxic Substances Control: Report of Facilities with Likely or Threatened Releases of Hazardous Substances, Medium/Low Priority and No Further Action Sites (including ASPIS), February 1997.

The complete database search report prepared by ERIIS and a map showing the location of listed sites relative to the subject property are presented in Appendix B. The subject property was not included on any of these databases. SECOR's review of the database search report is summarized and discussed below.

5.1 National Priority List

The National Priorities List (NPL) is a list of contaminated sites which have been assigned for cleanup under the Federal EPA Superfund program. No NPL facilities were identified in the database search report within a one mile radius of the subject property.

5.2 CERCLIS

The Comprehensive Environmental Response, Cleanup, and Liability Information System (CERCLIS) List is a historical database list of contaminated sites that the EPA has or will evaluate to determine whether a particular site merits placement on the NPL. The database search report contained no EPA CERCLIS facilities located within a one-half mile radius of the subject property.

5.3 RCRA-Treatment, Storage and Disposal Facilities List

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD list identifies facilities that treat, store, or dispose of hazardous waste. The database search report identified two RCRA-TSD facilities located within a one mile radius of the subject property. The facilities are identified below.

- Safety Kleen Corp.
 404 Market Street
 0.332 mile southwest
- US Navy-Supply Center
 2155 Mariner Square Loop
 Alameda, California
 0.923 mile southwest

Based on the distance of these sites from the subject property, and since they are not listed as release sites, neither of them are expected to adversely impact the subject property.

5.4 RCRA Large and Small Quantity Generators

The EPA's RCRA Large and Small Quantity Generator List identifies and tracks hazardous waste from the point of generation to the point of disposal. This list includes large and small quantity generators of hazardous wastes. The database search report identified one Large (LQG) and five Small Quantity Generators (SQG) of hazardous waste within a one-eighth mile radius of the subject property. The facilities located within a one-eighth mile radius of the subject property are identified below.

- Texaco Service Station (SQG)
 424 Martin Luther King Jr. Way
 0.116 mile southwest
- PG&E Substation (SQG)
 100 Martin Luther King Jr. Way
 0.134 mile southwest
- PG&E Power Plant (SQG)
 Martin Luther King Jr. Way
 0.136 mile southwest
- Francis Plating (LQG)
 785 7th Street
 0.180 mile northwest
- CMA Asset Management (SQG)
 500 12th Street
 0.231 mile northeast
- Guarantee Forklift (SQG)
 699 4th Street
 0.244 mile southwest

Only one of these sites is listed as a release site, Guarantee Forklift; and that site is not expected to adversely impact the subject property. Thus, none of these sites are expected to adversely impact the subject property.

5.5 Emergency Response Notification System

The Emergency Response Notification System (ERNS) is a national database system that collects information on reported releases of oil and hazardous substances. This database includes information reported to the EPA, the U.S. Coast Guard, the National Response Center, and the Department of Transportation). The database search report contained no ERNS List facilities located within a one-eighth mile radius of the subject property.

5.6 Cal-EPA Annual Work Plan Sites (AWP) List

The Cal-EPA Calsites Annual Work Plan Sites (AWP) List contains sites identified on the NPL List and/or Bond Expenditure Plan (BEP) List which are currently undergoing various stages of remediation. This list includes all sites which were historically identified on the Cal-EPA BEP (Superfund) List. The database search report identified is Cal-EPA AWP List facilities located within a one mile radius of the subject property. None of these facilities are located within one-quarter mile of the subject property. Thus, the Cal-EPA Calsites listed in the database search report are not expected to adversely impact the subject property.

5.7 CWMB Solid Waste Information System List

The Solid Waste Information System (SWIS) List is a list of active and inactive landfills, incinerators, and transfer stations. The database search report contained no SWIS facility located within a one-half mile radius of the subject property. The facility is the Port of Oakland at 530 Water Street, approximately 0.474 mile southwest of the subject property. Based on the distance of this facility from the subject property, it is not expected to adversely impact the subject property.

5.8 Cal-EPA Leaking Underground Storage Tank List

The Cal-EPA Leaking Underground Storage Tank (LUST) List is a list of facilities which are known to have had a release of petroleum hydrocarbons to soil and/or groundwater. The database search report contained 47 LUST facilities located within a one-half mile radius of the subject property. Sixteen of the facilities are located within a one-quarter mile radius of the subject property. Five of the facilities are located within a one-eighth mile radius of the subject property. Files for one facility considered to have the greatest potential to impact the subject property based on distance and direction from the subject property was reviewed at the RWQCB offices in Oakland.

1/3/ -150

Bramalea USA 901-999 Jefferson Street - This site is located 1,500 feet northeast and upgradient of the subject property with respect to expected groundwater flow. Review of information in the file for this site indicated that four 550-gallon USTs were removed from the site in 1953. A gasoline station was demolished from the site over 30 years ago. As of December of 1996, the Alameda County Environmental Health Department (ACEHD) prepared a letter indicating that no further work was required at the facility. According to a report prepared by Woodward-Clyde Consultants, a groundwater contamination plume which is approximately 4 feet thick and 3,000 square feet, exists at approximately 28 feet bgs. The report also indicated that up to 26,000 microliters per liter or parts per billion (ppb) of total petroleum hydrocarbons as gasoline (TPHg) have been identified in groundwater. It was not clear why Woodward-Clyde Consultants recommended nor why ACEHD granted case closure. Based on the analytical report and the reported groundwater flow direction, it is possible that this facility could impact the subject property.

18 mg/l @closure

5.9 RWQCB Underground Storage Tank List

The California State RWQCB maintains an inventory of registered USTs and ASTs. The database search report contained the names of four UST/AST facilities located within a one-quarter mile radius of the subject property. The facilities are identified below.

- Oakland Parking Structure
 585 7th Street
 0.044 mile southwest
- Oakland-Piedmont Municipal Court
 661 Washington Street
 0.143 mile southeast
- Guarantee Forklift
 699 4th Street
 0.244 mile southwest
- Oakland Federal Building
 1301 Clay Street
 0.247 mile northwest

Based on the distance and/or crossgradient position of the remaining facilities, none of these sites are expected to impact the subject property.

5.10 Cal-EPA Medium/Low Priority Sites

The Cal-EPA Department of Toxic Substances Control (DTSC) Abandoned Site Program Information System (ASPIS) List is a list of facilities compiled by the Cal-EPA subject to investigations concerning likely or threatened releases of hazardous materials. This list identifies Medium/Low Priority and No Further Action sites and inclusion of a facility on this list does not necessarily indicate that contamination exists at a particular property. The database search report identified one ASPIS facility located within a one-half mile radius of the subject property. The facility is Francis Plating of Oakland at 785 7ht Street, approximately 0.180 mile northwest of the subject property. Based on review of the database search report, it does not appear that groundwater contamination has been identified at this facility. Thus, impact to the subject property is not likely from this facility.

6.0 SUMMARY AND CONCLUSIONS

SECOR performed a Phase I Environmental Site Assessment of the Housewives Marketplace and associated retail/office space in Oakland, California. The assessment consisted of a site reconnaissance of the tenant space, interior and exterior common areas of the subject property, interviews, and a search and review of pertinent local and regional agency records. The site visit was conducted on June 13, 1997.

The subject property consists of three contiguous buildings occupied as follows: a retail market space located within a warehouse; office space located within a three-story building; and the Oriental Lucky Mart located within a two-story building.

In general, the subject property appeared to be fairly well maintained. Chemicals observed on the subject property were limited to small quantities of janitorial, cleaning and maintenance compounds, and paint.

Based on the historical information reviewed, the subject property was developed with two gasoline stations, one in the southwest corner and one in the northeast corner of the parcels, from at least 1951 to some time prior to 1957.

The general area of the subject property has been developed since the late 1800s. Several facilities in the vicinity of the subject property have been documented as using chemicals or having had releases of chemicals to soil and/or groundwater. It is possible that contamination from at least one of these facilities (Bramalea Pacific) may impact the subject property.

The results of an asbestos survey conducted by SECOR are presented in a separate report. Asbestos was detected in vinyl floor tile and mastic, sheet vinyl flooring, drywall and joint compound, roofing materials, sprayed-on acoustic ceiling material, and exterior stucco. Generally, the materials were in good condition. Prior to demolition, the asbestos-containing materials (ACMs) will require removal.

The scope of Phase I ESA performed by SECOR did not include any material or significant deviations from or exceptions to the scope of work outlined by ASTM Practice E1527-97. The information obtained and reviewed by SECOR revealed no evidence of recognized environmental concern except for the following:

- Two former gasoline stations on the subject property identifies the subject property as a potential source of soil/groundwater contamination.
- ACMs which will require removal prior to planned demolition.
- Off-site sources may impact the subject property soil and or groundwater.

HOUSWIFE R0, - C1 September 10, 1997 SECOR for No. 20100-019-0

7.0 LIMITATIONS

The conclusions presented in this report are professional opinions based on data described in this report. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location and are subject to the following inherent limitations:

- SECOR derived the data in this report primarily from visual observations, review of records in the
 public domain, and interviews with individuals having information about the site. The passage of
 time, manifestation of latent conditions, or occurrence of future events may require further exploration
 at the site, analysis of the data, and re-evaluation of the findings, observations, and conclusions in the
 report.
- 2. The data reported and the findings, observations, and conclusions expressed in the report are limited by the scope of work. The scope of work was defined by the request of the client, the time and budgetary constraints imposed by the client, and availability of access to the site.
- 3. Because of the limitations stated above, the findings, observations, and conclusions expressed by SECOR in this report are not, nor should not be, considered an opinion concerning the compliance of any past or present owner or operator of the site with any federal, state, or local law or regulation.
- 4. No warranty or guarantee, whether expressed or implied, is made with respect to the data reported of findings, observations, and conclusions that are based solely upon site conditions in existence at the time of investigation.
- 5. SECOR Phase I ESA Reports present professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report shall not be construed to offer legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of federal, state, or local government agencies. Any use of the Phase I report constitutes acceptance of the limits of SECOR's liability. SECOR's liability extends only to its client and not to any other parties who may obtain the Phase I report. Issues raised by the report should be reviewed by appropriate legal counsel.
- 6. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, site location, and project indicated. This report is not a definitive study of contamination at the site and should not be interpreted as such. No sampling or chemical analyses of ACMs was completed as part of this study unless explicitly stated.
- 7. This report is based, in part, on unverified information supplied to SECOR by third party sources. While efforts have been made to substantiate this third party information. SECOR cannot guarantee its completeness or accuracy.

OVERVIEW OF THE ERIIS CITY DIRECTORY SEARCH

City Directories have been published for many cities and towns across the United States since the 18th Century. Originally a list of town residents, the City Directory became a tool for locating individuals and businesses in a particular urban or suburban area. For each address within an area, City Directories list the name of each resident or, if a business operates from that address, the name and type of business. This historic overview of occupants of a given property is a valuable tool for companies involved in assessing the historic prior use of any residential or commercial property.

While the geographic coverage of City Directories is comprehensive for most major cities, many rural areas and small towns may not be covered. ASTM E1527-94 specifies that a "review of City Directories at less than approximately five year intervals is not required by this practice." (ASTM E1527-94, Section 7.3.2.1, page 11.) In accordance with the above ASTM guidelines, the ERIIS City Directories Search provides information for the area of interest at five year intervals.

ERIIS City Directory Searches include the subject property address and the addresses of surrounding properties. In rural areas, these adjacent properties may be undeveloped. In such cases, where no address has been assigned to the adjacent properties, only the subject property address will be searched. In all ERIIS City Directory Searches, the subject property will be highlighted for easy reference through the years of research.

The ERIIS City Directory Search includes the following:

- Title page (identifying the subject property searched)
- Overview of the ERIIS City Directory Search
- Copies of City Directory pages for your subject property and adjacent properties

The ERIIS City Directory Search reviews the following resources:

- Polk City Directory
- Cole City Directory
- Haines Criss Cross Directory
- Bressers City Directory
- Wrights City Directory
- Luedders City Directory
- Johnson City Directory
- Prince & Lee City Directory
- Fritzgeralds City Directory
- Robinsons City Directory
- Various County Specific Directories

TOPO QUAD: Oakland West

Radon Zone Level: 2

Zone 2 has a predicted average indoor screening level >= 2 pCi/L and <= 4 pCi/L

A Radon Zone should not be used to determine if individual homes need to be tested for radon. The EPA's Office of Radiation and Indoor Air (202/233-9320) recommends that all homes be tested for radon, regardless of geographic location or the zone designation in which the property is located.

^{**}A target area is defined as a .02 mile buffer around the site's latitude and longitude.

A blank radius count indicates that the database was not searched by this radius per client instructions.

NR in a radius count indicates that the database cannot be reported by this search criteria due to insufficient and/or inaccurate addresses reported by a federal/state agency.

National Priorities List

The NPL Report is an EPA listing of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980. In addition, the NPL Report includes information concerning cleanup agreements between EPA and Potentially Responsible Parties (commonly called Records of Decision, or RODS), any liens filed against contaminated properties, as well as the past and current EPA budget expenditures tracked within the Superfund Consolidated Accomplishments Plan (SCAP).

Comprehensive Environmental Response, Compensation, and Liability Information System

The CERCLIS Database is a comprehensive listing of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the U.S. EPA for the release, or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation, and ultimately placed on the National Priorities List (NPL). In addition to site events and milestone dates, the CERCLIS Report also contains financial information from the Superfund Consolidated Accomplishments Plan (SCAP).

Resource Conservation and Recovery Information System -Treatment, Storage, And Disposal Facilities

The RCRIS_TS Report contains information pertaining to facilities which either treat, store, or dispose of EPA regulated hazardous waste. The following information is also included in the RCRIS_TS Report:

- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS) - Inspections & evaluations conducted by federal and state
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties Information pertaining to corrective actions undertaken by the facility or EPA
- A complete listing of EPA regulated hazardous wastes which are generated or stored on-site

Resource Conservation and Recovery Information System - Large Quantity Generators

The RCRIS_LG Report contains information pertaining to facilities which either generate more than 1000kg of EPA regulated hazardous waste per month, or meet other applicable requirements of the Resource Conservation And Recovery Act. The following information is also included in the RCRIS_LG Report:

- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS)
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties Information pertaining to corrective actions undertaken by the facility or EPA
- A complete listing of EPA regulated hazardous wastes which are generated or stored on-site

Resource Conservation and Recovery Information System - Small Quantity Generators

The RCRIS_SG Report contains information pertaining to facilities which either generate between 100kg and 1000kg of EPA regulated hazardous waste per month, or meet other applicable requirements of the Resource Conservation And Recovery Act. On advice of the U.S. EPA, ERIIS does not report so-called "RCRA Protective Filers." Protective Filers, commonly called Conditionally Exempt Small Quantity Generators (CESQG's), are facilities that have completed RCRA notification paperwork, but are not, in fact, subject to RCRA regulation. The determination of CESQG status is made by the U.S. EPA. The following information is also included in the RCRIS_SG Report:

- Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS)
- Inspections & evaluations conducted by federal and state agencies
- All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties Information pertaining to corrective actions undertaken by

Emergency Response Notification System

the facility or EPA

ERNS is a national computer database system that is used to store information concerning the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The ERNS Reporting System contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party. Please note that the information in the ERNS Report pertains only to those releases that occured between January 1, 1997 and March 20, 1997.

California Solid Waste Information System

The California Solid Waste Information System Report, commonly known as the SWIS Report, contains information pertaining to all permitted and unpermitted active and inactive solid waste landfills, proposed disposal sites, transfer stations, and materials recovery facilities located within the State of California.

California Calsites

The California CalSites Report contains information pertaining to potentially contaminated hazardous waste sites. Sites formerly listed in the Annual Workplan (AWP), the Abandoned Sites Project Information System (ASPIS), and the Bond Expenditure Plan (BEP) are now included in the CalSites Database. Of the 26,000+ sites listed within CalSites, approximately 16,000 sites are listed as "No Further Action". Further, only about 300+ sites listed within the CalSites database are confirmed and active hazardous substance release

sites.

No Further Remedial Action Planned Sites

The No Further Remedial Action Planned Report (NFRAP), also known as the CERCLIS Archive, contains information pertaining to sites which have been removed from the U.S. EPA's CERCLIS Database. NFRAP sites may be sites where, following an initial investigation, either no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL

consideration.

SEARCH RESULTS ERIIS HISTORICAL MAP COLLECTION

PERTAINING TO:

Oakland Houswives

800 Jefferson Street Oakland, CA 94612

REPORT NUMBER:

164946A

Preliminary research of the ERIIS Historic Map Collection indicates that historic map coverage may be available for this site. If more detailed research shows that coverage is not, in fact, available, you will be sent a version of this page indicating "No Coverage Available". If historic maps are found, you will receive them according to the terms of of your ERIIS service and delivery agreement.

The ERIIS Historic Map Collection is the largest and most extensive private collection of prior-use maps in the United States, thereby affording the greatest degree of historic due diligence. ERIIS' inventory includes images from the following publishers:

- · Bromley
- · Dakin

433

- · Hexamer
- · Hopkins
- · Manufacturers Mutual Fire Insurance Maps
- · Nirenstein Real Estate Atlases
- · Sanborn Fire Insurance Map Collections
- Scarlett and Scarlett
- Rascher
- · William G. Baist

Note: Electronic delivery may not be available for some historic maps. If you requested electronic delivery of maps for a site where this service is not available, paper copies of all maps for your subject property will be sent via overnight carrier to arrive within your delivery time at no additional charge.
