Subject: Soil & Groundwater Investigation Workplan_Due Date

Mr. Khatri,

Per our telecom today, we are requesting an extension of the due date for a Workplan to investigate the vertical extent of oxygenate impacts at depth in the downgradient vicinity of the subject Quik Stop 56 site, located at 3132 Beaumont Avenue in Oakland, CA. As discussed, we request that the due date be extended until September 12, 2011. The Workplan had been requested by August 19, 2011, in the ACDEH letter dated June 23, 2011 following your department's review of the Site Conceptual Model, previously submitted in February 2011. We are compiling available information from regional investigations to confirm anticipated depths of drilling to target in the requested deeper aquifer investigation.

Thank you for your attention to this matter.

Regards,

Jonathan Scheiner, TRC
