Subject: Soil & Groundwater Investigation Report_Due Date

Mr. Khatri,

Per our discussion today, we are requesting an extension of the due date for submittal of the requested Supplemental Soil and Groundwater Investigation Report summarizing our recent investigation of the vertical extent of oxygenate impacts in the downgradient vicinity of the subject Quik Stop 56 site (3132 Beaumont Avenue in Oakland, CA). As discussed, we request that the due date be extended one month - until January 20, 2012. The report had been requested by December 19, 2011, in the ACDEH letter dated September 21, 2011, following your department's review of the Site Conceptual Model, previously submitted in February 2011. We are collecting laboratory results for sample analyses from our late November field work, and will use the period of time requested to compile and analyze these data.

Thank you for your attention to this matter.

Regards,

Jonathan Scheiner, TRC
