RE: WELL DECOMMISSIONING REPORT

Dear Ms. Detterman:

On behalf of Quik Stop Markets (Quik Stop), TRC submits this Well Decommissioning Report documenting the proper abandonment of the seven (7) groundwater monitoring wells at the subject site, located at 3132 Beaumont Avenue in Oakland, California (Site) (Figure 1). On December 30, 2013, the Alameda County Health Care Services Agency, Department of Environmental Health (ACDEH) issued a Public Notification of Potential Case Closure. On March 11, 2014, the ACDEH, in an electronic correspondence, notified TRC that the public comment period ended with no comments on February 27, 2014 and formally requested the site monitoring wells be abandoned.

Well Destruction Activities

All seven groundwater monitoring wells were destroyed on March 24, 2014, in accordance with applicable regulatory guidelines for abandoning wells. The destruction of the wells occurred pursuant to regulatory site closure and approval by the ACDEH.

Prior to mobilization, a well destruction permit was obtained for each well from the Alameda County Public Works Water Resources Section (ACPWWRS). In addition, Excavation and Obstruction permits were obtained from the City of Oakland for the three wells located on City right-of-way (MW-4, MW-5, MW-6). Copies of the permits are included in Appendix A. Figure 2 shows the locations of the former monitoring wells.

Monitoring wells MW-1 through MW-7 were properly abandoned by pressure grouting using neat cement. Wells MW-4 through MW-6 located in the City right-of-way were also overdrilled to five feet below grade per the City regulations. The well boxes were removed and the remaining void space was backfilled with concrete and the surface dyed to match the surrounding surface. The concrete backfill on wells MW-4 through MW-6 is only temporary and will be replaced with a hot asphalt patch once scheduling with the contractor is finalized. An inspector from the ACPWWRS was onsite to observe and approve the grouting process. Well abandonment details are summarized in Table 1.

Since the wells were pressure grouted per local regulatory guidelines, no waste was generated.

Well completion reports documenting the destruction of the seven monitoring wells were prepared and submitted to the California Department of Water Resources (DWR) Central District and Alameda County Public Works Water Resources Section on March 26, 2014. Copies of the well completion reports (DWR-188 Forms) are included in Appendix B.

Should you have any questions regarding this report, please contact Jonathan Scheiner at (925) 688-2473.

Sincerely,

Rachelle Clair, P.G.
Project Geologist
