Hi Toni,

Yes you are correct. ACEH is in agreement that soil and groundwater data from B-MW-9 may not provide clarity due to the Huynh Property site. It becomes more critical to the investigation that B-MW-7 sample groundwater in an effort to determine concentrations that might be contributed from the site to the storm drain in that vicinity.

Hi Mark,

Thank you for the email. I'd also like to clarify that we agreed that B-MW-9 can be removed from the investigation as well, and that MW-7 will likely pick up the data we are looking for in terms of how the plume is migrating off-site.

We will keep you updated on the progress of obtaining the permits.

Thank you!
Toni

Toni,
As we just discussed CRA will attempt to relocate B-11 to the inside corner of the sanitary sewer bend just east of the location depicted on Figure 2, and will attempt to relocate B-MW-8 to the east of the storm drain line depicted on Figure 2, between the SD and the electric line. Otherwise the locations appear to be reasonable alternatives for the intended work.

Due to the difficulty in obtaining permits from the city of Oakland, and the need to gain access to Mills College property for B-MW-8, I have extended the report submittal date two months, or until 10/29/2014. You can use this email to document the change.

Good luck with permitting!

Hi Mark

I sent you memo yesterday regarding the site investigation status and a request for an extension of the report, but I neglected to send a site map which illustrates our well and boring locations. I've attached the memo and the figure for your convenience.

Thank you,
Toni

Hi Mark,

The memo attached serves as a follow up with a conversation between ARCADIS and the ACEH on Thursday, July 10, 2014, and a status of the site investigation at the Former Chevron Service Station, located at 5910 MacArthur Blvd., in Oakland, CA.

Please let me or Taura know if you have any questions.

Thank you!
Toni
