Subject: Site Status for RO# 0000127

Re: Alaska Gasoline, 6211 San Pablo Ave., Oakland, CA

RO# 0000127

Mr. Wickham,

I'm writing to check on the status of several ongoing issues with the investigation at the above site. My last correspondence with you (1/31/2007) referenced a few documents where some requests were made with regards to the current investigation. I was wondering if you had a chance to review those items. As a quick reference, of the request for a modification to a Direct Push workplan (original date is from Nov. 8, 2006, modification request date is from August 29, 2007).

Also, in the *Site Update* report (Aug. 29, 2007) HerSchy also requested a meeting with your staff as well as the property owner in order to address several outstanding issues. I'm not sure if you've had enough time to conduct a file review within your continual workload, but some of these issues could use some attention sooner rather than later.

We are in the midst of preparing the report for the dual phase extraction test conducted on site and should have that to you in the 30-60 day time frame mentioned in the last correspondence.

Thanks again for your time with this matter, it is greatly appreciated.

Reijo
