Hello Jeremy,

I understand your dilemma as to whether you should renew the permit now or to let it lapse and then incur greater costs to obtain another permit in the future, if needed. However, these types of decisions must be made between you, your client and possibly the UST Cleanup Fund.

Sincerely,

Paresh

We recently received the BAAQMD permit renewal for the SVE system at the above referenced site. The total annual permit renewal costs are \$1,075. As you are aware, the previous consultant for the site removed the SVE system, therefore the SVE portion of the system is no longer at the site. I am currently working on the Pilot study addendum for the above referenced site. Currently, we do not have any short term plans to utilize SVE at the site, however I cannot rule out completely the possibility of using SVE, or some portion of vapor control, in the future. Therefore, my question is, from a budgetary standpoint (UST cleanup fund site), would you prefer that AEI renew this permit and pay the \$1,075 renewal fees? The other option is to terminate the permit, in which we will incur cost of ~\$3,000 to \$4,000 to obtain a new permit if one is needed in the future. Thanks for your thoughts regarding this. Please call with any questions.

Jeremy Smith  
Senior Project Manager
