Dear Jennifer,

Here is the survey data on the Douglas Parking wells. I do apologise for not responding sooner, however, (by choice) we are no longer the consultant of record for this client. We have forwarded all data to the owner. Please feel free to call me if you have any questions.

Very truly yours,

Stuart G. Solomon

Subject: Monitoring Wells, Douglas Parking, 1721 Webster Street
Oakland, California

Gentlemen,

At your direction we determined the locations and elevations of the 3 monitoring wells at the Douglas Parking Garage, 1721 Webster Street, Oakland, California. The locations and elevations of the wells are shown on the attached sketch along with the calculated distances between the wells. The elevations of the wells are also listed below.

MW-1	29.73' 29.50'	Top of Handhole PVC Casing
MW-2	27.41' 27.10'	Top of Handhole PVC Casing
MW-3	29.59' 29.25'	Top of Handhole PVC Casing

Elevations were determined to Mean Sea Level (MSL) utilizing as a benchmark the top of curb at the easterly end of the northerly curb return at the intersection of 17th Street and Webster Street. The elevation of the top of curb, 30.97 ft. was provided by the Public Works Department of the City of Oakland.

All the PVC casings were marked with a black marker at the locations where the elevations were taken. All the wells were accessible and no problems or difficulties were encountered.
