Sure, give me a call next week and we can discuss this site. I have meetings this afternoon and a couple of deadlines for tomorrow so next week will be better. Is there anything in specific that you want to talk about?

Specific items that I see from a preliminary review of the files are the culvert and if contaminants are migrating via this to Glen Echo Creek. The disappearance of the free product in 2006 and Geotracker compliance.

Ms. Jakub:

Please note that the above-referenced report has been posted to your ftp site.

I would greatly appreciate the chance to speak to you regarding this site and, in particular, our recent supplemental site investigation results (submitted in April, 2008). Per Donna's request, we are wrapping up our preparation of a CAP, which also includes additional investigation to vertically characterize the extent of residual hydrocarbons in the source area. I would greatly appreciate your input in this effort.

I know how busy you are, but please let me know if you may have a few minutes to discuss the above. I'm happy to call or meet with you at any time that is convenient for you.

Regards,
