Subject: CAP and work plan for RO134, Val Strough Chevrolet

Mehrdad,

Thank you for calling today to let me know that you are preparing a CAP and work plan for vertical delineation and installing an off-site well near S-10. As we discussed, this document will be submitted by August 11, 2008. You should also begin developing a site conceptual model (SCM) which evaluates preferential pathways, the vertical and horizontal extent of contaminants in both soil and groundwater both, and includes cross-sections at a minimum. ASTM has a draft document which describes what should be included in an SCM.

Regards,

Barbara Jakub, P.G.
