Subject: RO138 monitoring and sampling

Hello James,

ACEH has reviewed your request for a change in the monitoring to onsite wells MW-1 and MW-2. As noted in your April 24, 2009 correspondence, dissolved phase contamination has not been detected in these wells since they were installed in 1998.

ACEH concurs that groundwater sampling from MW-1 and MW-2 is no longer required. Please continue to collect groundwater elevation data from these two wells, as the GW elevation data will be used to prepare potentiometric surface maps.

Should you have any questions, please feel free to contact me.

Sincerely,
Steven Plunkett
