Entry Type: Phone call

Start: Tue 11/4/2008 5:00 PM
End: Tue 11/4/2008 5:00 PM
Duration: 0 hours

Categories: Phone Calls

I called Bob Clark-Riddell (the environmental consultant) to verify whether he had received any comments during the public participation process for the subject site. He verified that no comments were received. He then stated that the site remediation strategy may be changed from using exclusively excavation (if sub-grade parking is proposed) or DPE with bio-spargers (if construction on grade is proposed). I informed Bob that no matter what redevelopment is pursued, the cleanup must continue. Bob stated that they are now looking to incorporate both remediation technologies in the case the excavation alone leaves behind residual soil contamination, DPE with AS may be able to remediate contamination that may have migrated off-site and out of reach for excavation.

Bob said that they would look at costs and prepare the final CAP.
