Subject: RO139- Mehdizadeh Property
Entry Type: Phone call
Company: Pangea

Start: Tue 9/4/2012 11:30 AM
End: Tue 9/4/2012 11:35 AM
Duration: 5 minutes

Received a call from Bob Clark- Riddell re the Mehdizadeh property, RO139 (5175 Broadway). Mr. Clark- Riddell called for the status of his WP reviews. I said that, based on our previous discussions, that I was comfortable with his off-site soil-gas sampling plan. I had not reviewed his onsite locations. He discussed his selection rational for the on site locations. I mentioned that the DTSC had revised the soil-gas sampling protocols in 2011 and mentioned some discrepancies between his WP and the DTSC guidelines- a specific example was the time between probe placement (direct push) and the initiation of the sampling process- 2 hrs v. his 30 minutes. Mr. Clark- Riddell said that all the probes were in and that several days will have elapsed between probe placement and sampling. Mr. Clark- Riddell said they were tentatively performing the soil gas sampling this Thursday, should I have an opportunity to get to the WP review, and call him.
