Sven,

Thank you, Michael, and Peter for meeting with us yesterday. At the meeting Dilan had mention this case has a low case file number and has been opened for decades. My thought was that most of the information available for the case predates GeoTracker and has not yet migrated onto GeoTracker. Therefore, please look at the county website for more complete record of historic information.

<http://www.acgov.org/aceh/lop/ust.htm>

Also, when receiving your recent submittals to GeoTracker, I found the boring log for MW3 made for some very interesting reading. It appears to corroborate the relatively slow attenuation rate observed at MW3. Haley & Aldrich has submitted each of the MW bore logs as individual files and should be viewable on GeoTracker.

http://geotracker.waterboards.ca.gov/profile_report?global_id=T0600100466

The installation report for monitoring wells MW1 through MW3 is named SWI_R_1992-02-19 as is viewable on our county website.

I hope to get out my letter discussed at the meeting this week.

Regards,
Keith Nowell
