

CONTACT LOG (5929 College Ave., Oakland)

08/12/99 cont... from having to investigate Chabot Rd. due to the contribution from other sources. Or, we could choose to assess levels along Chabot Rd. & determine the concentrations do not pose a threat regardless of the source. However, would really like to try some passive remediation because contaminants from site may continuously be discharged into Chabot & washed away in former creek.

Steps: 1) delineate extent of plume under roadways

- 2) Conduct a Tier 2 Risk Assessment
- 3) If it passes RA, propose closure for site
- 4) Due to holes in culvert, may want to sample water from culvert to see whether its contributing to the contam.

08/12/99 Called Bruce Bremer and discussed issues & concerns w/ him.

11/08/99 Called Bruce Bremer, Drugs, (510) 601-9351 and left message inquiring about the status of the submittal of the reports due to this office in October '99, per the Sept 30 '99 timeline.

11/08/99 Called Bruce Bahr, CET, (510) 243-9500, ext. 216 & left <sup>same</sup> message as I left Bruce Bremer

11/08/99 Above  
Bruce Bahr returned call & stated report would be in by next week.

CONTACT LOB (5929 College, Oakland)

08/12/99 Chuck Madlue, PWQCB, stated that if the residence at 5932 Chabot Rd. puts in a basement, any contaminated soils must be disposed of properly. Also, if they put in a sump pump, they will be required to obtain a discharge permit from the PWQCB.

08/12/99 Relayed the above info from Chuck Madlue to Rachel Heyman, property owner of 5932 Chabot Rd., and Jim Dewart her contractor. Rachel Heyman stated that there are a number of holes in the culvert down Chabot and she has a diagram of this from the Alameda Flood Control District. Also, Jim Dewart suggested that the former creek is acting as a French Drain for the area.

08/12/99 Left message for Wyman Hlong, Alameda County Flood Control District, to try to obtain map of Chabot Rd. culvert indicating holes in the culvert.

08/12/99 Left message for Grover Bahr, COT, letting him know about new info on holes in culvert down Chabot Rd. & requested he get more info on this before our meeting. We may need to take prevention measures & create barrier berm Dryans & Chabot Rd. to keep

CONTACT LOG (5929 College, Oakland)

- 08/11/99 They could just load <sup>soil</sup> directly onto trucks at time of work. He also inquired about whether his construction workers would need to be Hazardous Substance Removal Certified. They are planning to excavate 800 to 1,000 yards of soil.
- 08/11/99 Left messages for Bob Chamber, DA's office, and Chuck Headlee, RWQCB, asking whether the County could ask Drayus to pay for characterizing or hauling contaminated soil from the construction work at the residence at 5932 Chabot.
- 08/11/99 Left message for Gwen Brannan asking to set up meeting to discuss the next phase of required work. Also, I asked her to call me to discuss the off-site construction work concerns.
- 08/11/99 Gwen Brannan called. She stated that Drayus will not take responsibility for the construction work until it can be shown that Drayus is responsible for observed contamination across Chabot Rd.
- 08/11/99 Spoke to Grover Baker, COT, about site
- 08/11/99 Spoke to Chuck Headlee. He said that if we are uncertain about source of contamination we cannot ask Drayus to characterize & haul soil from excavation. However, he will ask around to see whether we can require contractors to test soil.

CONTACT COB (5929 College Ave, Oakland)

11/09/99 Gwen Brennan, Draper, (500) 601-4351, called & left message stating that her consultant, Bruce Bahr, CET, will get her all reports listed as due in Oct '99 in the timeline, & she will forward these reports to me by next week.

CONTACT LOG (5929 College, Oakland)

07/23/99 I left a message for Jim Duvall,  
Duvall Construction, Ph: (510) 507-7428

Ph: (510) 807-2864

He is the contractor for ~~Dreyer's~~ Heyman, who  
lives on Chabot and is planning to build a  
basement in the area of Dreyer's contaminant  
plume. I told Mr. Duvall that I need to  
know the details of construction, so I can  
coordinate any soil & H<sub>2</sub>O disposal w/  
Dreyer's H+S Plan, etc.

07/23/99 Left message for Allchain Madison, et al,  
to get back to me w/ an update on how  
the geoprobe sampling went in June 99 &  
whether the bores ever reached w/  
any g.w.

07/26/99 Jim Duvall, Duvall Construction, Pager: 510-807-2864  
called & left message re: Rachel Heyman's  
basement work

07/29/99 Grover Bahr called & stated that they got water  
in holes, but not much. High down cut-off  
sets which he feels is not attributable to Dreyer's  
Site. Will set up meeting w/ Gwen Brunner  
once she returns from vacation to discuss next  
steps. Will fax ~~me~~ results.

08/11/99 Jim Duvall, contractor for Rachel Heyman, would  
like to know when they can conduct excavation work under  
5932 Chabot. They will go down to 8 feet bgs. Mr.  
Duvall suggested that we characterize soil first so that

CONTACT LOG (5929 College, Oakland)

- 06/04/99 Spoke to ~~Cover~~ Bahr, CGT, (510) 243-9500 #216.  
He wanted more info on the Sanborn Maps  
and info indicating that there was a garage  
located on the Dreyer's property in 1932.  
Apparently, Brown Brunnau's boss was questioning  
the need to adduce the area d.g. of the  
former northern parking lot. I related  
to Mr. Bahr that the d.g. investigation  
was based on the testimony of John Accocian  
and the garage on the Dreyer's property  
(and Showroom) in 1932. Mr. Bahr  
requested that I go out to site to over-  
see the geoprobe investigation on  
Tues. June 15 '99 at 8AM. I agreed.  
He also requested that I fax him a  
copy of my sketches of the Sanborn Maps.
- 06/11/99 Cover Bahr, CGT, (510) 243-9500 #216 called to  
say that the planned field work for June 15 '99  
had to be rescheduled to Tues, June 22 '99 -  
same time same place.
- 06/11/99 Called Mr. Bahr and told him I could make  
it out to site on June 22 '99 for field work.
- 07/23/99 → Rachel Heynen, resident near MU-5, wants to know  
whether she can put in a basement below her house  
down to 10' bgs. I said she would probably run into  
contamination & that <sup>we have to coordinate w/</sup> ~~she has to speak to~~ Dreyer's to  
handle any pumped water or excavated soil. She will  
have Tom Dorrell, her contractor, contact me.
- 597-0645

CONTACT LOG (5929 College, Oakland)

- 05/06/99 Called Gwen Brannan, Dreyers, 510-601-4351, to say that, contrary to what I told her in the past, she has records of groundwater investigations being conducted out at the site in 1996 & 1997.
- 05/10/99 Returned Gwen Brannan's call and left message stating that, per our Sept 29 '98 letter to her, our office has no reports between the June 27 '95 sampling event & the Oct 27 '98 report. This was confirmed by CET in my Sept 29 '98 mtg. with Grover Buhr and Terry Carter. If she does have reports for that period, she needs to submit them to our office.
- 05/19/99 Called Gwen Brannan, Dreyers, 510-601-4351, discussed my notes on May 3 '99 Monitoring report & workplan. Scheduled meeting.
- 05/26/99 Met w/ Gwen Brannan, Dreyers, and Grover Buhr, CET. Refer to Meeting Notes.
- 05/26/99 Called Gwen Brannan and requested that an additional hydroprobe be placed behind Dreyers Bldg to address the area immediately downgradient of the alleged gas contamination & former gas pumps in Dreyers former northern parking lot, per my discussion w/ John Accadian at Scheels'. Also requested that I get copies of the laboratory analyticals for sampling in 1996, since Ms. Brannan stated that no monitoring reports were prepared.
- 05/26/99 Called Grover Buhr, & requested same as above conversation w/ Gwen Brannan.

CONTACT LOG (5929 College, Oakland)

243-9500 #216

- 02/11/99 Grover Bahr, CET, called, 510-~~601-4351~~, to state that they re-developed two wells at Dryans in the week of Feb 15-19<sup>99</sup> and will be sampling all the wells in the next week.
- 02/21/99 Returned Grover Bahr's call to confirm that I received his message. Left him message stating that all info requested in Jan 19 99 letter should be submitted w/ most gassy report due in April 99.
- 05/03/99 Called Gwen Brennan, Dryans, 510-601-4351 to remind Dryans that a groundwater monitoring report was due to the County by the end of April 99 and that the County did not receive this report or any communication on the status of this report. I reminded Ms. Brennan that ultimately Dryans is responsible for keeping in compliance w/ required work & due dates & that it is Dryans that will be issued a Notice of Violation for in compliance & not CET. Requested she contact me w/ status of report.
- 05/04/99 Gwen Brennan, Dryans, 510-601-4351, called to say that CET will bring her the g.w. monitoring report today. CET had some problems w/ a computer virus. Discussed site requirements, anticipated work, & status of site w/ Ms. Brennan. She will mail report today. I reminded her that addit. info outlined in Jan 19 99 report is expected w/ this monitoring report.

## CONTACT LOG (5929 College, Oakland)

- 02/01/99 Obtained copy of utility line plans for College Ave., adjacent to site, from Eva Chu, who is overseeing investigations for the site at 5930 College Ave. Discussed w/ Ms. Chu.
- 02/01/99 Left message for Frank Cod, County Public Works Agency, (510) 670-5783, inquiring about date & definitions of terms used for utility line maps. Requested that he return my call.
- 02/01/99 Left Human Comedy, City of Oakland, 510-238-7253, a message asking whether he could find any information on a tank removal that occurred in the late 1980's across the street from 5930 College Ave and adjacent to the Dryden site. According to the RP for 5930 College John Sheaff, (510) 658-3070, he stated that he witnessed a tank removal across from his site and in the sidewalk in the 1980s. This area was never noted to have had tanks in any of Dryden's reports.
- 02/01/99 Mr. Human Comedy called back and stated that he would try and find some info on the referenced tank removal.
- 02/01/99 Left Gwinn Branman, Dryden, a message at (510) 601-4351 letting her know about the suspected tank removal and told her I would call her back when I got more info.

## Contact Log (5929 College)

10/21/98

[REDACTED] CET, called, [REDACTED] to say that they will be sampling wells at Drayna site on Oct 28 '98, Wednesday.

I requested that they re-schedule so that I could be out there to examine condition of wells. We re-scheduled to Tues Oct 27 '98.

Mr. Bahr mentioned that the lowest detection limits available for TCE analyses, w/o a significant increase in price, is 1,000 ppb. I stated that that would be acceptable.

11/09/98

Grover Bahr, CET, called a left message.

They have obtained groundwater analytical results from last sampling event. Wants to meet

to discuss results w/in next couple of weeks.  
The wells will be re-surveyed this week.

They have received historical info on former wells from Drayna, which will be submitted to County.  
Left message for Grover Bahr, CET, to let him know that the site across College Avenue, in the upgradient direction has a soil & g.w. contamination problem.

12/21/98

Called Grover Bahr, CET, to find out status of the submission of the Groundwater Monitoring Report. He stated that it shall be completed this week & then submitted to Gwen Brannon at Drayna for her signature.

Meeting Notes

09/29/98

Attending: Grover Bahr, RG w/ CET (510)243-9500  
Terry Carter, CET Environmental (510)243-9500  
Juliet Shin, Alameda County Health Dept.

According to Mr. Bahr and Mr. Carter, no additional work has been conducted out at the site since the work contained in the Aug 11 '95 Monitoring Report - the exception being that ORC soke were placed in wells on site at some point between '95 and present. I requested that Mr. Carter submit any and all info on the ORC work.

Discussed the content of my notes on site and gave both Mr. Bahr and Mr. Carter a copy of my notes regarding additional work and information.

Discussed need for additional g.w. monitoring to resume as a p., which will include analyses for MTBE & oxygenates using Method 8260 and lead scavengers and 8270, in addition to THg/TPHs/BTEX.

Notes →  
Attached

NOTES  
5929 College Avenue

- Per the letter from the Rockridge Community Planning Council, dated April 2, 1990, there was once a stream channel flowing along Chabot Road. Reviewed Oakland Watershed map and found that Claremont Creek flows into a culvert that runs along Chabot Road once it hits College Avenue. Check to see whether the plume is being intercepted by the culvert or storm drain lines/utility lines.
- MTBE and oxygenate analyses required for future groundwater samples (including analysis for lead scavengers). EDC was identified in the waste oil tank pit soil samples. Method 8260 must be utilized.
- Why weren't groundwater samples collected from Well MW-2 analyzed for semi-volatiles (8270), since naphthalene was identified at 25ppm in soil.
- Detection limit used for TOG, of 5,000ppb, was too high.
- Where is the well installation report for Wells MW-4 through MW-6 and B-1?
- Assess whether current concentrations pose a risk to workers onsite and possibly residents off site.
- Where are proposed cross sections?
- Delineate extent of the plume.
- Missing lab analysis results of 3<sup>rd</sup> Qtr 92 and 4<sup>th</sup> Qtr 92. Missing monitoring reports after the 1<sup>st</sup> Qtr 94 up to the Summary report dated April 25, 1995.
- What was the depth of the excavations conducted in the former two UST pits?

*where soils from gas tank excavation handled off site?*

# Contact Log (5929 College Ave.)

- 09/15/98 Called William Collatt, Dreyer's Grand  
Ice Cream, (510)652-8187, to find out  
whether investigation at site have continued  
since Aug 1995, which is the date of the last  
report submitted to the County office. Mr.  
Collatt stated that he believed investigations  
were still in progress and that he thinks  
CET is still their consultants (However,  
I tried contacting CET at their former  
Emeryville location and phone # was no  
longer active). Mr. Collatt stated that the  
new Dreyer's contact for the investigations  
is Bren Brannan. Her direct line is  
(510) 601-4351 and her address is the same  
as the site: 5929 College Ave., Oakland, 94618.  
He stated that he would have Ms. Brannan  
contact me soon.
- 09/15/98 Called and left message for Bren Brannan,  
(510)601-4351.
- 9/16/98 Toni Carter, CET, (510)243-9500, called. CET are  
still the consultants for site. Work has been on-going.  
We will meet on 9/23/98 @ 10AM to discuss site.
- 9/16/98 Bren Brannan, Dreyer, returned call and left  
message.
- 9/21/98 Called Toni Carter, CET, to reschedule meeting  
for 9/29/98 @ 10AM due to trial for another case.
