**Subject:** 3744 Depot Road schedule

Dear Paresh -

This email is to notify you that PIERS is scheduled to complete the field work outlined in our work plan dated August 28, 2008, for the 3744 Depot Road, Hayward site. The work plan was approved in your letter of September 18, 2008. The geologist on site is Joel Greger. He can be reached at (510) 593-5382.

Your review letter asked for completion of field work by October 30, and completion of the report by December 5. The field work was delayed slightly by getting cost approval from the owner and drill rig availability. The drill rig is now scheduled for November 13th. PIERS therefore would like to request an extension on the field work due date to November 13, and for the report, to December 31, 2008. Thank you in advance.

Regards,  
Kay Pannell, COO  
PIERS Environmental Services, Inc.
