Re: Third Quarter 2007 Ground-Water Monitoring Report, Former Atlantic Richfield Company (a BP affiliated company) Station #6002, 6235 Seminary Avenue, Oakland, Alameda County, California; ACEH Case #RO0000163

Dear Mr. Supple:

Attached is the *Third Quarter 2007 Ground-Water Monitoring Report* for Former Atlantic Richfield Company Station #6002 (herein referred to as Station #6002) located at 6235 Seminary Avenue, Oakland, California (Site). This report presents a summary of results from ground-water monitoring and sampling conducted during the Third Quarter of 2007.

Should you have questions regarding the work performed or results obtained, please do not hesitate to contact us at (530) 566-1400.

Sincerely,

BROADBENT & ASSOCIATES, INC.

STATION # 6002 QUARTERLY GROUND-WATER MONITORING REPORT

Facility: <u>#6002</u>	Address: <u>6235 Seminary Avenue</u>
Environmental Business Manager:	<u>Mr. Paul Supple</u>
Consulting Co./Contact Persons:	<u>Broadbent & Associates, Inc.(BAI)/Rob Miller & Tom Venus</u> <u>(530) 566-1400</u>
Consultant Project No.:	<u>06-08-634</u>
Primary Agency/Regulatory ID No.:	<u>Alameda County Environmental Health (ACEH)</u> <u>ACEH Case #RO0000163</u>
Facility Permits/Permitting Agency:	<u>NA</u>

WORK PERFORMED THIS QUARTER (Third Quarter 2007):

1. Prepared and submitted the Second Quarter 2007 Ground-Water Monitoring Report.
2. Conducted ground-water monitoring/sampling for Third Quarter 2007. Work performed by Stratus Environmental, Inc. (Stratus) on 8 August 2007.

WORK PROPOSED FOR NEXT QUARTER (Fourth Quarter 2007):

1. Prepare and submit Third Quarter 2007 Ground-Water Monitoring Report (contained herein).
2. Conduct ground-water monitoring/sampling for Fourth Quarter 2007.

QUARTERLY RESULTS SUMMARY:

Current phase of project:	Ground-Water Monitoring/Sampling
Frequency of ground-water monitoring:	Quarterly: Wells MW-3, MW-4, MW-5, MW-6, MW-7, MW-8, VW-1, VW-3, VW-4
Frequency of ground-water sampling:	Quarterly: Wells MW-5, VW-1, VW-4 Annually (3Q): Wells MW-3, MW-4, MW-6, MW-7, MW-8
Is free product (FP) present on-site:	No
Bulk Soil removed to Date:	Approximately 370 cubic yards of TPH-impacted soil
Current remediation techniques:	NA
Depth to ground water (below TOC):	7.01 ft (MW-6) to 12.95 ft (MW-4)
General ground-water flow direction:	West
Approximate hydraulic gradient:	0.05 ft/ft

DISCUSSION:

Third quarter 2007 ground-water monitoring and sampling was conducted at Former ARCO Service Station #6002 on 8 August 2007 by Stratus personnel. Water levels were gauged in seven of the nine wells associated with Station #6002: A depth to water measurement was not taken from well MW-8 because it could not be located due to overgrown vegetation, vehicles, and vehicle parts near its location; A depth to water measurement could not be taken from well MW-7 as it was dry. No other significant irregularities were noted during water level gauging. Depth to water measurements ranged from 7.01 ft at well MW-6 to 12.95 ft. at well MW-4. Resulting ground-water surface elevations ranged from 250.93 ft above mean sea level (msl) in up-gradient well MW-6 to 235.67 ft above msl at down-gradient well MW-4. Water level elevations were within the historic minimum and maximum ranges, with the exception of a recorded historic minimum value of 243.16 ft above msl in well VW-3. Water level elevations yielded a potentiometric ground-water flow direction and gradient to the west at approximately 0.05 ft/ft, generally consistent with the historical data (see Table 3). Ground-water monitoring field data sheets are provided within Appendix A. Measured depths to water and respective ground-water elevations are summarized in Table 1. Potentiometric ground-water elevation contours are presented in Drawing 1.

Ground-water samples were collected from wells MW-3, MW-4, MW-5, MW-6, VW-1, and VW-4. Samples were not collected from well MW-7 due to dry conditions or well MW-8, which was obstructed by vehicles and overgrown vegetation. No other irregularities were noted during sampling. Samples were submitted under chain-of-custody protocol to Test America Analytical Testing Corporation (Morgan Hill, California) for analysis of Gasoline Range Organics (GRO, C4-C12) by LUFT GCMS method; Benzene, Toluene, Ethylbenzene, and Total Xylenes (BTEX) by EPA Method 8260B; and tert-Amyl methyl ether (TAME), tert-Butyl alcohol (TBA), Di-isopropyl ether (DIPE), 1,2-Dibromomethane (EDB), 1,2-Dichloroethane (1,2-DCA), Ethanol, Ethyl tert-butyl ether (ETBE), and Methyl tert-butyl ether (MTBE) by EPA Method 8260B. No significant irregularities were noted during analysis of the samples by the laboratory. Ground-water sampling field data sheets and the laboratory analytical report, including chain-of-custody documentation, are provided in Appendix A.

Gasoline Range Organics were detected above the laboratory reporting limit in three of the six wells sampled this quarter at concentrations up to 4,100 micrograms per liter ($\mu\text{g}/\text{L}$) in MW-5. Ethylbenzene was detected above the laboratory reporting limit in one of the six wells sampled at a concentration of 4.1 $\mu\text{g}/\text{L}$ in well MW-5. Total Xylenes were detected above the laboratory reporting limit in one of the six wells sampled at a concentration of 1.3 $\mu\text{g}/\text{L}$ in well MW-5. TBA was detected above laboratory reporting limits in one of the six wells sampled at a concentration of 1,300 $\mu\text{g}/\text{L}$ in well VW-4. ETBE was detected above the laboratory reporting limits in one of the six wells sampled at a concentration of 1.2 $\mu\text{g}/\text{L}$ in VW-4. MTBE was detected above the laboratory reporting limit in three of the six wells sampled at concentrations up to 11 $\mu\text{g}/\text{L}$ in MW-5. The remaining fuel additives and oxygenates were not detected above their laboratory reporting limits in the six wells sampled this quarter.

Detected analyte concentrations were within the historic minimum and maximum ranges recorded for each well with the exception of a recorded historic minimum MTBE value at 1.9 $\mu\text{g}/\text{L}$ in well VW-1. Historic laboratory analytical results are summarized in Table 1 and Table 2. The most recent GRO, Benzene, and MTBE concentrations are also presented in Drawing 1. A copy of the Laboratory Analytical Report, including chain-of-custody documentation, is provided in Appendix A. Ground-water monitoring data (GEO_WELL) and laboratory analytical results (EDF) were uploaded to the GeoTracker AB2886 database. Upload confirmation pages are provided in Appendix B.

CLOSURE:

The findings presented in this report are based upon: observations of Stratus field personnel (see Appendix A), the points investigated, and results of laboratory tests performed by Test America. Our services were performed in accordance with the generally accepted standard of practice at the time this report was written. No other warranty, expressed or implied was made. This report has been prepared for the exclusive use of Atlantic Richfield Company. It is possible that variations in soil or ground-water conditions could exist beyond points explored in this investigation. Also, changes in site conditions could occur in the future due to variations in rainfall, temperature, regional water usage, or other factors.

SYMBOLS AND ABBREVIATIONS:

-- = Not analyzed/applicable/measured/available
< = Not detected at or above laboratory reporting limit
BTEX = Benzene, toluene, ethylbenzene and xylenes
DO = Dissolved oxygen
DTW = Depth to water in ft bgs
ft bgs = feet below ground surface
ft MSL = feet above mean sea level
GRO = Gasoline range organics
GWE = Groundwater elevation measured in ft MSL
mg/L = Milligrams per liter
MTBE = Methyl tert butyl ether
NP = Well not purged prior to sampling
P = Well purged prior to sampling
TOC = Top of casing measured in ft MSL
TPH-g = Total petroleum hydrocarbons as gasoline
µg/L = Micrograms per liter

FOOTNOTES:

a = SPH detected and GWE corrected: Corrected elevation (Z') = $Z + (h * 0.73)$ where: Z: measured elevation, h: floating product thickness, 0.73: density ratio of oil to water.
b = MTBE analyzed by EPA method 8240.
c = MTBE, sample also analyzed for fuel oxygenates.
d = Well was decommissioned on 2/12/1996.
e = Well inaccessible.
f = Duplicate
g = Well was dry.
h = Insufficient water to sample.
i = Well is not part of the sampling program and therefore was not sampled.
j = Sheen in well.
k = Could not locate well.

NOTES:

Wells surveyed to NAVD'88 datum on 1/27/2004.

Beginning on the first quarter 2003 sampling event (2/10/2003), TPH-g, BTEX and MTBE analyzed by EPA method 8260. Prior to 2/10/2003, BTEX by EPA method 8021B from 10/29/99 to 2/10/03, and 8020 prior to 10/29/99.

Beginning in the fourth quarter 2003, the laboratory modified the reported analyte list. TPH-g was changed to GRO. The resulting data may be impacted by the potential of non-TPH-g analytes within the requested fuel range resulting in a higher concentration being reported.

Beginning in the second quarter 2004, the carbon range for GRO was changed from C6-C10 to C4-C12.

Values for DO and pH were obtained through field measurements.

Note: The data within this table collected prior to April 2006 was provided to Broadbent & Associates, Inc. by Atlantic Richfield Company and their previous consultants. Broadbent & Associates, Inc. has not verified the accuracy of this information.

8/8/2007	<300	1,300	5.4	<0.50	1.2	<0.50	<0.50	<0.50	

SYMBOLS AND ABBREVIATIONS:

-- = Not analyzed/applicable/measured/available

< = Not detected at or above the laboratory reporting limit

1,2-DCA = 1,2-Dichloroethane

DIPE = Di-isopropyl ether

EDB = 1,2-Dibromoethane

ETBE = Ethyl tert-butyl ether

MTBE = Methyl tert-butyl ether

TAME = tert-Amyl methyl ether

TBA = tert-Butyl alcohol

µg/L = Micrograms per Liter

FOOTNOTES:

a = Calibration verification for ethanol was within the method limits but outside the contract limits.

b = The initial analysis for TBA was within holding time but required dilution.

NOTES:

All volatile organic compounds analyzed using EPA Method 8260B.

The data within this table collected prior to August 2002 was provided to URS by RM and their previous consultants. URS has not verified the accuracy of this information.

Note: The data within this table collected prior to April 2006 was provided to Broadbent & Associates, Inc. by Atlantic Richfield Company and their previous consultants. Broadbent & Associates, Inc. has not verified the accuracy of this information.

Re: Groundwater Sampling Data Package, BP Service Station No. 6002, located at 6235 Seminary Avenue, Oakland, California

General Information

Data Submittal Prepared / Reviewed by: Sandy Hayes / Jay Johnson

Phone Number: (530) 676-6000

On-Site Supplier Representative: Jerry Gonzales

Sampling Date: August 8, 2007

Arrival: 11:50 *Departure:* 14:20

Weather Conditions: Clear

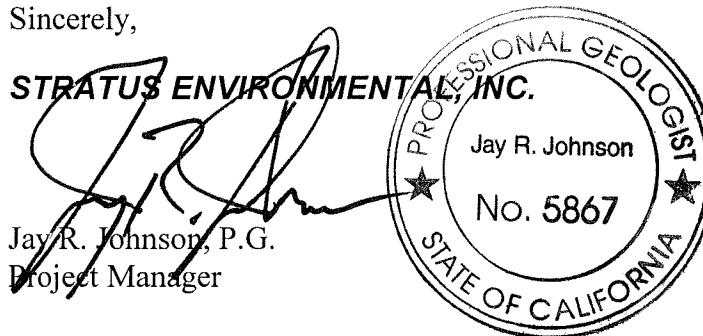

Unusual Field Conditions: None

Scope of Work Performed: Quarterly monitoring and sampling

Variations from Work Scope: Well MW-7 was dry. Well MW-8 is on a residential property behind the station. Due to several vehicles and vehicle parts along with overgrown grass and ivy in the yard where the well is, the well could not be located.

This submittal presents the tabulation of data collected in association with routine groundwater monitoring. The attachments include field sheets, non-hazardous waste data form, chain of custody documentation, and certified analytical results. The information is being provided to BP-ARCO's Scoping Supplier for use in preparing a report for regulatory submittal. This submittal is limited to presentation of collected data and does not include data interpretation or conclusions or recommendations. Any questions concerning this submittal should be addressed to the Preparer/Reviewer identified above.

Sincerely,

Attachments:

- Field Data Sheets
- Non-Hazardous Waste Data Form
- Chain of Custody Documentation
- Certified Analytical Results

cc: Mr. Paul Supple, BP/ARCO

RE: ARCO #6002, Oakland, CA
Work Order: MQH0364

Enclosed are the results of analyses for samples received by the laboratory on 08/10/07 19:40. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Lisa Race
Senior Project Manager

CA ELAP Certificate # 1210

The results in this laboratory report pertain only to the samples tested in the laboratory. The analyses contained in this report were performed in accordance with the BPGCLN Technical Specifications, applicable Federal, State, local regulations and certification requirements as well as the methodologies as described in laboratory SOPs reviewed by the BPGCLN. This entire report was reviewed and approved for release.

Stratus Environmental Inc. [Arco]

VW-1	MQH0364-05	Water	08/08/07 13:41	08/10/07 19:40
VW-4	MQH0364-06	Water	08/08/07 13:31	08/10/07 19:40
TB 6002	MQH0364-07	Water	08/08/07 05:00	08/10/07 19:40

The carbon range for the TPH-GRO has been changed from C6-C10 to C4-C12. The carbon range for TPH-DRO has been changed from C10-C28 to C10-C36. EPA 8015B has been modified to better meet the requirements of California regulatory agencies.

These samples were received with no custody seals.
