RE: 1723 Fruitvale Ave.  
Oakland, CA

Dear Ms. Drogas:

VIA FAX & US. MAIL

I am writing this letter to ask for expedited review, in regards to the above property.

Our consultants, Mr. Marc Papineau, REA 791, and Mark Armstrong, RG 6134, have previously written to you, to summarize the matter and have advised Davis Realty that you could expedite the review if you are given information about the bank note held on the property.

The PCE on the property primarily is in the ground water, or, just above ground water. There is no detectable concentration of PCE in any of the soil samples collected from surface to 10 feet below grade surface. Data collected from LFR on the upgradient Charles A. Whitton School site proves that PCE is migrating onto 1723 Fruitvale from up the street.

Appreciate your prompt reply and closure to this situation.

Sincerely,

*Rosalie A. Guerrini*
