Mr. Mark Detterman  
Alameda County Environmental Health  
1131 Harbor Bay Parkway, Suite 250  
Alameda, CA 94502

Dear Mr. Detterman:

Attached for your review is the *Second Semi Annual 2017 Groundwater Monitoring Report* for Former Chevron Service Station 97127, which is located at 10 Grant Line Road, Tracy, California (**Case #:** RO185). This report was prepared by Stantec Consulting Services Inc. (Stantec), upon whose assistance and advice I have relied. I declare under penalty of perjury that the information and/or recommendations contained in the attached report are true and correct, to the best of my knowledge.

If you should have any further questions, please do not hesitate to contact me or the Stantec project manager, Eva Hey, at (925) 296-2101, or [eva.hey@stantec.com](mailto:eva.hey@stantec.com).

Sincerely,

A handwritten signature in blue ink that reads "Carryl MacLeod".

**Carryl MacLeod**  
Project Manager

Former Chevron Service Station 97127  
10 Grant Line Road  
Tracy, California 95376  
Alameda County Case No. RO0000185

Dear Mr. Detterman:

On behalf of Chevron Environmental Management Company (CEMC), Stantec Consulting Services Inc. (Stantec) is pleased to submit the *Second Semi Annual 2017 Groundwater Monitoring Report* for Former Chevron Service Station 97127, which is located at 10 Grant Line Road, Tracy, California (the Site; shown on **Figure 1**). This report presents a summary of the Second Semi Annual 2017 Groundwater Monitoring and Sampling Program with Conclusions and Recommendations.

## **SECOND SEMI ANNUAL 2017 GROUNDWATER MONITORING AND SAMPLING PROGRAM**

Gettler-Ryan, Inc. (G-R) performed the Second Semi Annual 2017 groundwater monitoring and sampling event on September 22, 2017. G-R's standard operating procedures (SOPs) and field data sheets are included in **Attachment A**. G-R gauged depth-to-product (DTP) and depth-to-groundwater (DTW) in 19 Site wells (MW-1 through MW-7, MW-9 through MW-16, AS-1, and PZ-1 through PZ-3) prior to collecting groundwater samples for laboratory analysis. Site wells MW-3, MW-4, MW-6, MW-9, MW-10, and MW-12 through MW-16 were purged and sampled. Separate phase hydrocarbons (SPH) were observed in wells MW-1 and MW-11 at a thickness of 0.48 and 0.94 feet, respectively. Well MW-8 was inaccessible due to a damaged stovepipe and an obstruction in the well, therefore, the wells were not monitored or sampled during the Second Semi Annual 2017 groundwater monitoring and sampling event.

Investigation-derived waste (IDW) generated during this event was transported by Clean Harbors Environmental Services to Seaport Environmental in Redwood City, California.

### **Groundwater Elevation and Gradient**

Soil boring and well construction details for each Site well are presented in **Table 1**. Groundwater concentration and elevation contour maps (based on September 2017 data) are shown on **Figure 2**. The direction of groundwater flow at the time of sampling was primarily to the east at approximate gradient of 0.002 feet per foot (ft/ft). The historical directions of groundwater flow from First Quarter 2005 to present are shown by the rose diagram on **Figure 2** and **Table 4**.

### **Schedule of Laboratory Analysis**

Groundwater samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline range organics (TPH-GRO) using United States Environmental Protection Agency (US EPA) Method 8015B). Benzene, toluene, ethylbenzene, and total xylenes (BTEX compounds), and methyl *Tertiary*-butyl ether (MtBE) were analyzed using US EPA Method 8260B.

# THIRD QUARTER 2017 GROUNDWATER MONITORING REPORT

Former Chevron Service Station 97217

Page 2 of 4

## Groundwater Analytical Results

During September 2017, groundwater samples were collected from 10 Site wells (MW-3, MW-4, MW-6, MW-9, MW-10, and MW-12 through MW-16). Current and historical groundwater analytical results are included in **Table 2** and **Table 3**. Current groundwater analytical data are also shown on **Figure 2**, and isoconcentration maps for TPH-GRO, benzene, and MtBE are included on **Figure 3**, **Figure 4**, and **Figure 5**, respectively.

Certified laboratory analysis reports and chain-of-custody documents are presented as **Attachment B**. A summary of September 2017 groundwater analytical results are presented in the following table:

Well ID	TPH-GRO (µg/L)	Benzene (µg/L)	Toluene (µg/L)	Ethylbenzene (µg/L)	Total Xylenes (µg/L)	MtBE (µg/L)
MW-1	Not Sampled – LNAPL Present					
MW-2	Not Sampled – Monitor only					
MW-3	22,000	4,700	670	470	390	<10
MW-4	710	13	4	3	6	<0.5
MW-5	Not Sampled – Monitor only					
MW-6	<50	<0.5	<0.5	<0.5	<0.5	1
MW-7	Not Sampled – Monitor only					
MW-8	Not Sampled – Obstruction in Well at 3.15 feet bgs					
MW-9	<50	10	<0.5	<0.5	<0.5	<0.5
MW-10	39,000	3,600	4,700	710	3,700	<10
MW-11	Not Sampled – LNAPL Present					
MW-12	270	0.7	<0.5	<0.5	<0.5	<0.5
MW-13	200	4	<0.5	<0.5	<0.5	2
MW-14	13,000	2,900	92	240	340	<5
MW-15	37,000	16,000	190	670	950	<25
MW-16	<50	<0.5	<0.5	<0.5	<0.5	<0.5
LNAPL = light non-aqueous phase liquid µg/L = micrograms per liter < = Analyte was not detected above laboratory method detection limit noted						

## CONCLUSIONS AND RECOMMENDATIONS

Groundwater elevations are consistent with the previous monitoring and sampling event and are within historical range for each respective well (as shown in **Table 3** and in **Attachment C**). The product thicknesses observed in wells MW-1 and MW-11 during this event were within the historical range for each well. Well MW-3 did not contain a measurable product thickness for the fifth straight monitoring event. Other groundwater concentrations in perimeter wells indicate stable to decreasing concentrations trends across the Site. Stantec recommends maintaining the current monitoring and sampling schedule. Due to the low dissolved MtBE concentrations present at the site, Stantec will cease creation of the MtBE isoconcentration map from future groundwater reports (see **Figure 5**).

## LIMITATIONS

This report was prepared in accordance with the scope of work outlined in Stantec's contract and with generally accepted professional engineering and environmental consulting practices existing at the time this report was prepared and applicable to the location of the Site. It was prepared for the exclusive use of CEMC for the express purpose stated above. Any re-use of this report for a different purpose or by others not identified above shall be at the user's sole risk without liability to Stantec. To the extent that this report is based on information provided to Stantec by third parties, Stantec may have made efforts to verify this third party information, but Stantec cannot guarantee the completeness or accuracy of this information. The opinions expressed and data collected are based on the conditions of the Site existing at the time of the field investigation. No other warranties, expressed or implied are made by Stantec.

Notes:

TPH-GRO = Total petroleum hydrocarbons as gasoline range organics

B = Benzene

T = Toluene

E = Ethylbenzene

X = Total xylenes

MTBE = Methyl tertiary butyl ether

SPH = Separate phase hydrocarbons

TOC = Top of casing (surveyed)

MSL = Mean sea level

µg/L = Microgram per liter

< = Analyte was not detected above laboratory method detection limit

- = Not measured or analyzed

Calc. GW Elev. = Calculated groundwater elevation = TOC - Depth to Water + 0.75\*(Measured SPH Thickness); assuming a specific gravity of 0.75 for SPH

ANN = An approved annual sampling program was in place at this time; the well was not scheduled for sampling during this event

DEST = Well destroyed

INA = Well inaccessible

SA = An approved semi-annual sampling program was in place at this time; the well was not scheduled for sampling during this event

SPH = Well not sampled due to presence of separate phase hydrocarbons (SPH)

\* = TOC elevations are relative to msl.

\*\* = GWE has been corrected for the presence of SPH, correction factor = [(TOC - DTW) + (SPHT x 0.80)].

TOC elevations were surveyed on September 6, 2011, by Virgil Chavez Land Surveying and was provided on October 28, 2011.

1 = ORC present in well.

2 = ORC Installed.

3 = Confirmation run.

4 = Due to the presence of Separate Phase Hydrocarbons results for EPA 8015/8020 do not represent true values for TPH-Gasoline, BTEX, or MTBE. The results were reported = respectively as 24,000, 140, 830, 210, 1,500, and <0.05 mg/Kg.

5 = Estimated Groundwater Elevation.

6 = Well was not sampled due to damaged casing and debris in well. Ground water elevation is an estimate.

7 = Laboratory report indicates gasoline C6-C12.

8 = Laboratory report indicates gasoline C6-C12 + unidentified hydrocarbons <C6.

9 = Laboratory report indicates result exceeds the linear range of calibration.

10 = Laboratory report indicates gasoline.

11 = Laboratory report indicates the results for this hydrocarbon is elevated due to the presence of single analyte peak(s) in the quantitation range.

12 = Chromatogram pattern indicates an unidentified hydrocarbon.

13 = Product + Water removed.

14 = MTBE by EPA Method 8260 was analyzed outside the EPA recommended holding time.

15 = Skimmer in well.

16 = ORC not present in well.

17 = MTBE by EPA Method 8260.

18 = 4.5 liters of SPH removed from skimmer and 2.5 liters of SPH removed from well.

19 = BTEX and MTBE by EPA Method 8260.

20 = Removed ORC from well.

21 = Area inaccessible to truck; unable to purge.

22 = TOC has been altered; unable to determine GWE.

23 = Product only removed from well.

24 = Skimmer removed from well.

25 = Depth to water and analytical data provided by CRA.

26 = Well development performed.

## **STANDARD OPERATING PROCEDURE GROUNDWATER SAMPLING**

Gettler-Ryan Inc. (GR) field personnel adhere to the following procedures for the collection and handling of groundwater samples prior to analysis by the analytical laboratory. All work is performed in accordance with the GR Health & Safety Plan and all client-specific programs. The scope of work and type of analysis to be performed is determined prior to commencing field work.

Prior to sampling, the presence or absence of free-phase hydrocarbons is determined using an interface probe. Product thickness, if present, is measured to the nearest 0.01 foot and is noted in the field notes. In addition, all depth to water level measurements are collected with a static water level indicator and are also recorded in the field notes, prior to purging and sampling any wells. Total well depths are measured annually.

After water levels are collected and prior to sampling, if purging is to occur, each well is purged a minimum of three well casing volumes of water using pre-cleaned pumps (stack, peristaltic or Grundfos), or disposable bailers. Temperature, pH and electrical conductivity are measured a minimum of three times during the purging (additional parameters such as dissolved oxygen, oxidation reduction potential, turbidity may also be measured, depending on specific scope of work.). Purging continues until these parameters stabilize.

Groundwater samples are collected using disposable bailers. The water samples are transferred from the bailer into appropriate containers. Pre-preserved containers, supplied by analytical laboratories, are used. When pre-preserved containers are not available, the laboratory is instructed to preserve the sample as appropriate. Duplicate samples are collected for the laboratory to use in maintaining quality assurance/quality control standards, as directed by the scope of work. The samples are labeled to include the job number, sample identification, collection date and time, analysis, preservation (if any), and the sample collector's initials. The water samples are placed in a cooler, maintained at 4°C for transport to the laboratory. Once collected in the field, all samples are maintained under chain of custody until delivered to the laboratory.

The chain of custody document includes the job number, type of preservation, if any, analysis requested, sample identification, date and time collected, and the sample collector's name. The chain of custody is signed and dated (including time of transfer) by each person who receives or surrenders the samples, beginning with the field personnel and ending with the laboratory personnel.

A laboratory supplied trip blank accompanies each sampling set. The trip blank is analyzed for some or all of the same compounds as the groundwater samples.

As requested by Chevron Environmental Management Company, the purge water and decontamination water generated during sampling activities is transported by Clean Harbors Environmental Services to Seaport Environmental located in Redwood City, California.

## Quality Control Summary

Client Name: Chevron  
Reported: 09/30/2017 14:33

Group Number: 1854376

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

### Method Blank

\*- Outside of specification

- (1) The result for one or both determinations was less than five times the LOQ.
- (2) The unspiked result was more than four times the spike added.

P##### is indicative of a Background or Unspiked sample that is batch matrix QC and was not performed using a sample from this submission group.

### Surrogate Quality Control

Surrogate recoveries which are outside of the QC window are confirmed unless attributed to dilution or otherwise noted on the Analysis Report. For dual column analyses, the surrogate (at least one surrogate for multi-surrogate tests) must be within the acceptance limits on at least one of the two columns.

Client: California Office

**Delivery and Receipt Information**

Delivery Method:	<u>BASC</u>	Arrival Timestamp:	<u>09/23/2017 10:00</u>
Number of Packages:	<u>1</u>	Number of Projects:	<u>2</u>
State/Province of Origin:	<u>CA</u>		

**Arrival Condition Summary**

Shipping Container Sealed:	Yes	Sample IDs on COC match Containers:	Yes
Custody Seal Present:	Yes	Sample Date/Times match COC:	Yes
Custody Seal Intact:	Yes	VOA Vial Headspace $\geq$ 6mm:	N/A
Samples Chilled:	Yes	Total Trip Blank Qty:	2
Paperwork Enclosed:	Yes	Trip Blank Type:	HCI
Samples Intact:	Yes	Air Quality Samples Present:	No
Missing Samples:	No		
Extra Samples:	No		
Discrepancy in Container Qty on COC:	No		

*Unpacked by Melvin Sanchez (8943) at 10:58 on 09/23/2017*

**Samples Chilled Details**

Thermometer Types: DT = Digital (Temp. Bottle) IR = Infrared (Surface Temp) All Temperatures in °C.

Cooler #	Thermometer ID	Corrected Temp	Therm. Type	Ice Type	Ice Present?	Ice Container	Elevated Temp?
1	DT42-02	3.0	DT	Wet	Y	Bagged	N

# Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

<b>BMQL</b>	Below Minimum Quantitation Level	<b>mg</b>	milligram(s)
<b>C</b>	degrees Celsius	<b>mL</b>	milliliter(s)
<b>cfu</b>	colony forming units	<b>MPN</b>	Most Probable Number
<b>CP Units</b>	cobalt-chloroplatinate units	<b>N.D.</b>	non-detect
<b>F</b>	degrees Fahrenheit	<b>ng</b>	nanogram(s)
<b>g</b>	gram(s)	<b>NTU</b>	nephelometric turbidity units
<b>IU</b>	International Units	<b>pg/L</b>	picogram/liter
<b>kg</b>	kilogram(s)	<b>RL</b>	Reporting Limit
<b>L</b>	liter(s)	<b>TNTC</b>	Too Numerous To Count
<b>lb.</b>	pound(s)	<b>µg</b>	microgram(s)
<b>m3</b>	cubic meter(s)	<b>µL</b>	microliter(s)
<b>meq</b>	milliequivalents	<b>umhos/cm</b>	micromhos/cm
<b>&lt;</b>	less than		
<b>&gt;</b>	greater than		
<b>ppm</b>	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.		
<b>ppb</b>	parts per billion		
<b>Dry weight basis</b>	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.		

**Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.**

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" are not performed within 15 minutes.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

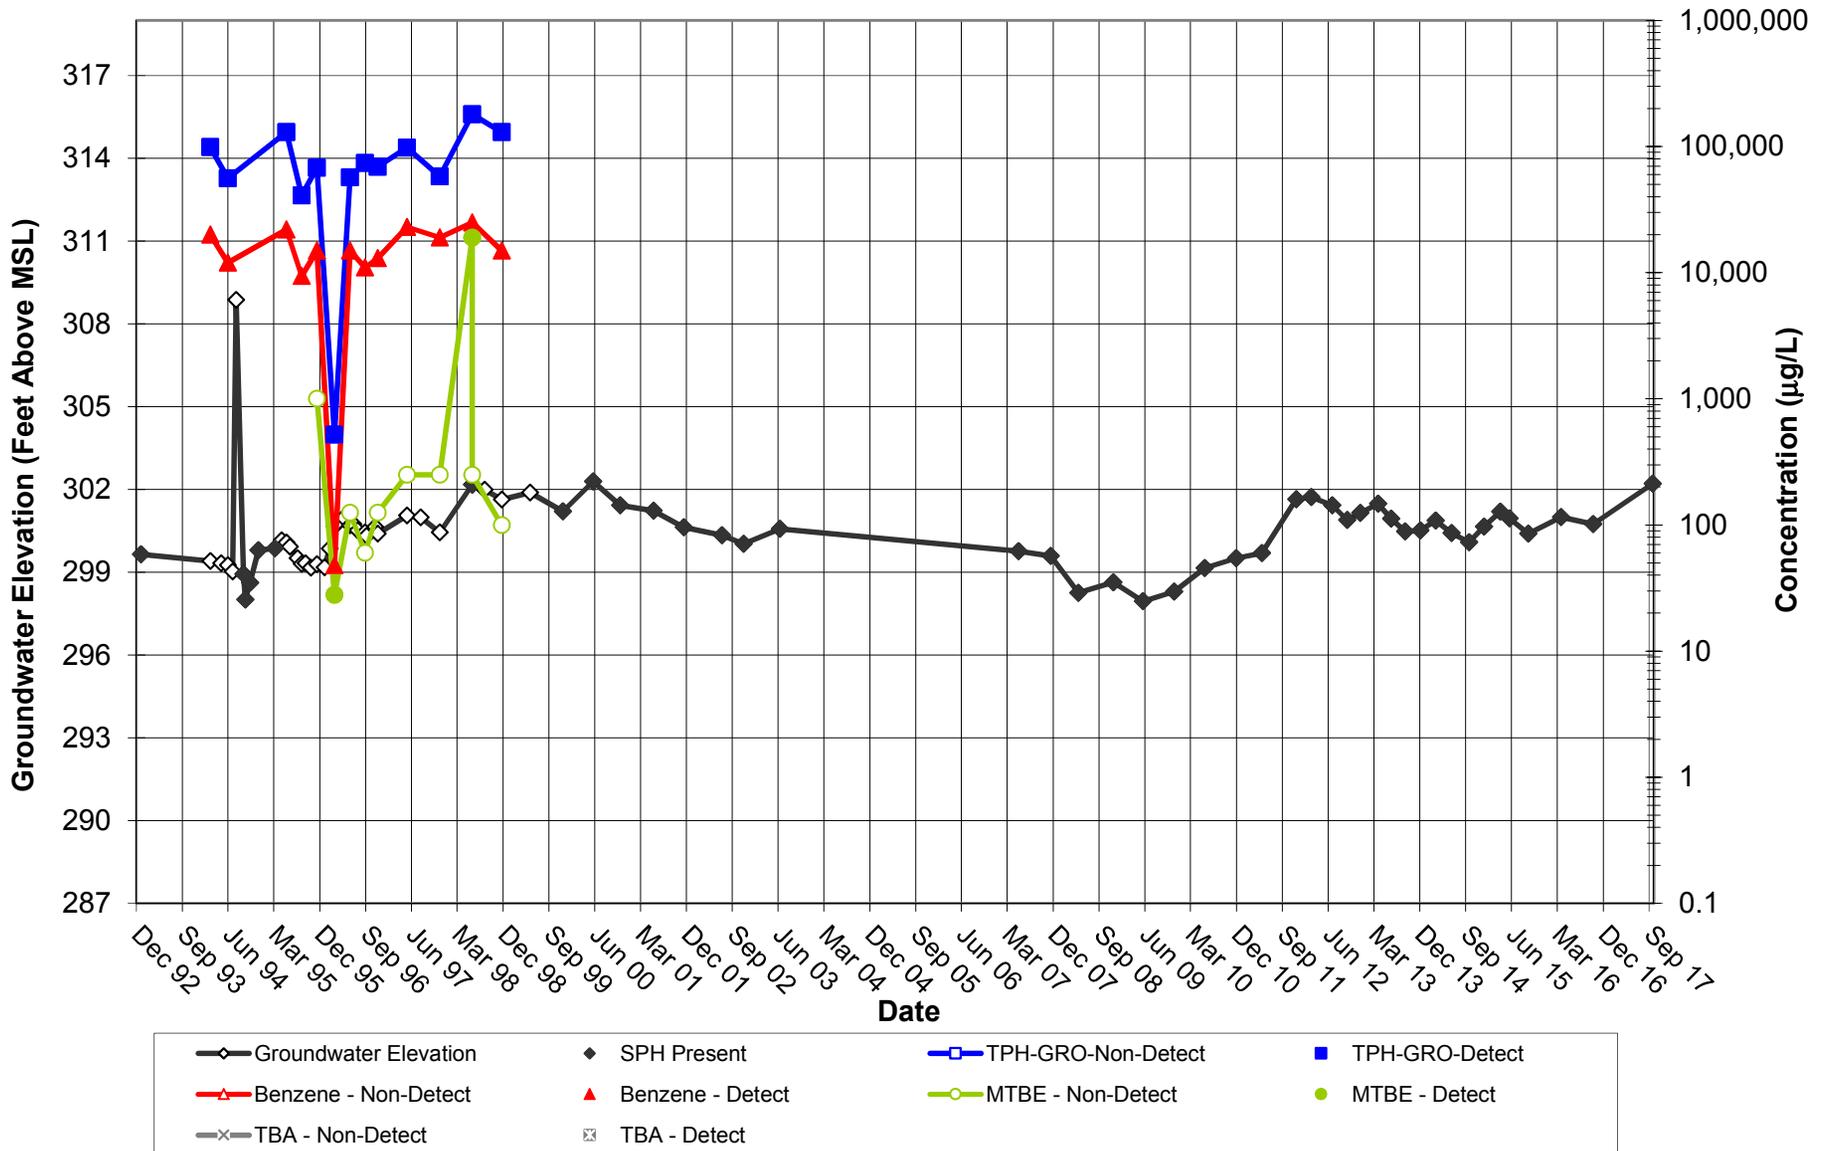

# Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
J (or G, I, X)	Estimated value $\geq$ the Method Detection Limit (MDL or DL) and $<$ the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column $>40\%$ . The lower result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column $>100\%$ . The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods. Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

**Hydrographs**

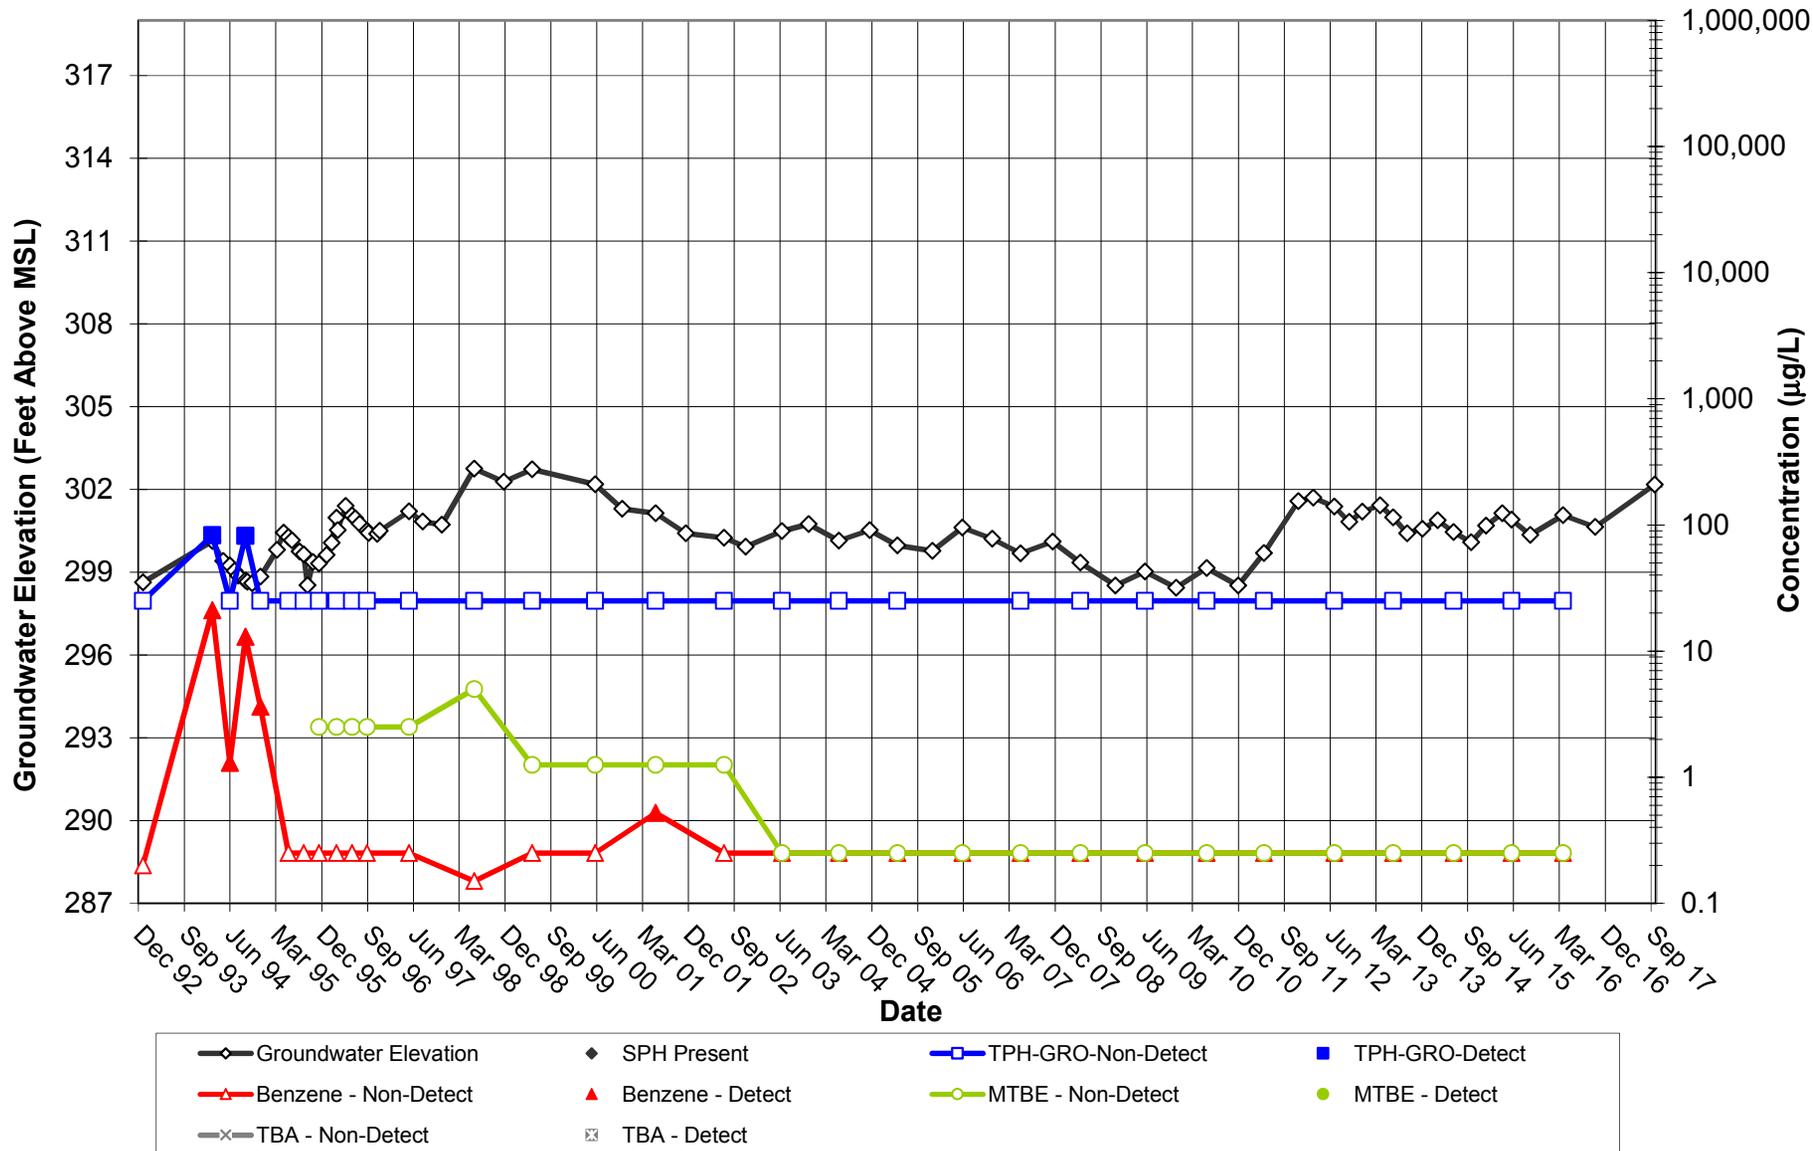

**Former Chevron Service Station No. 97127  
MW-1 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

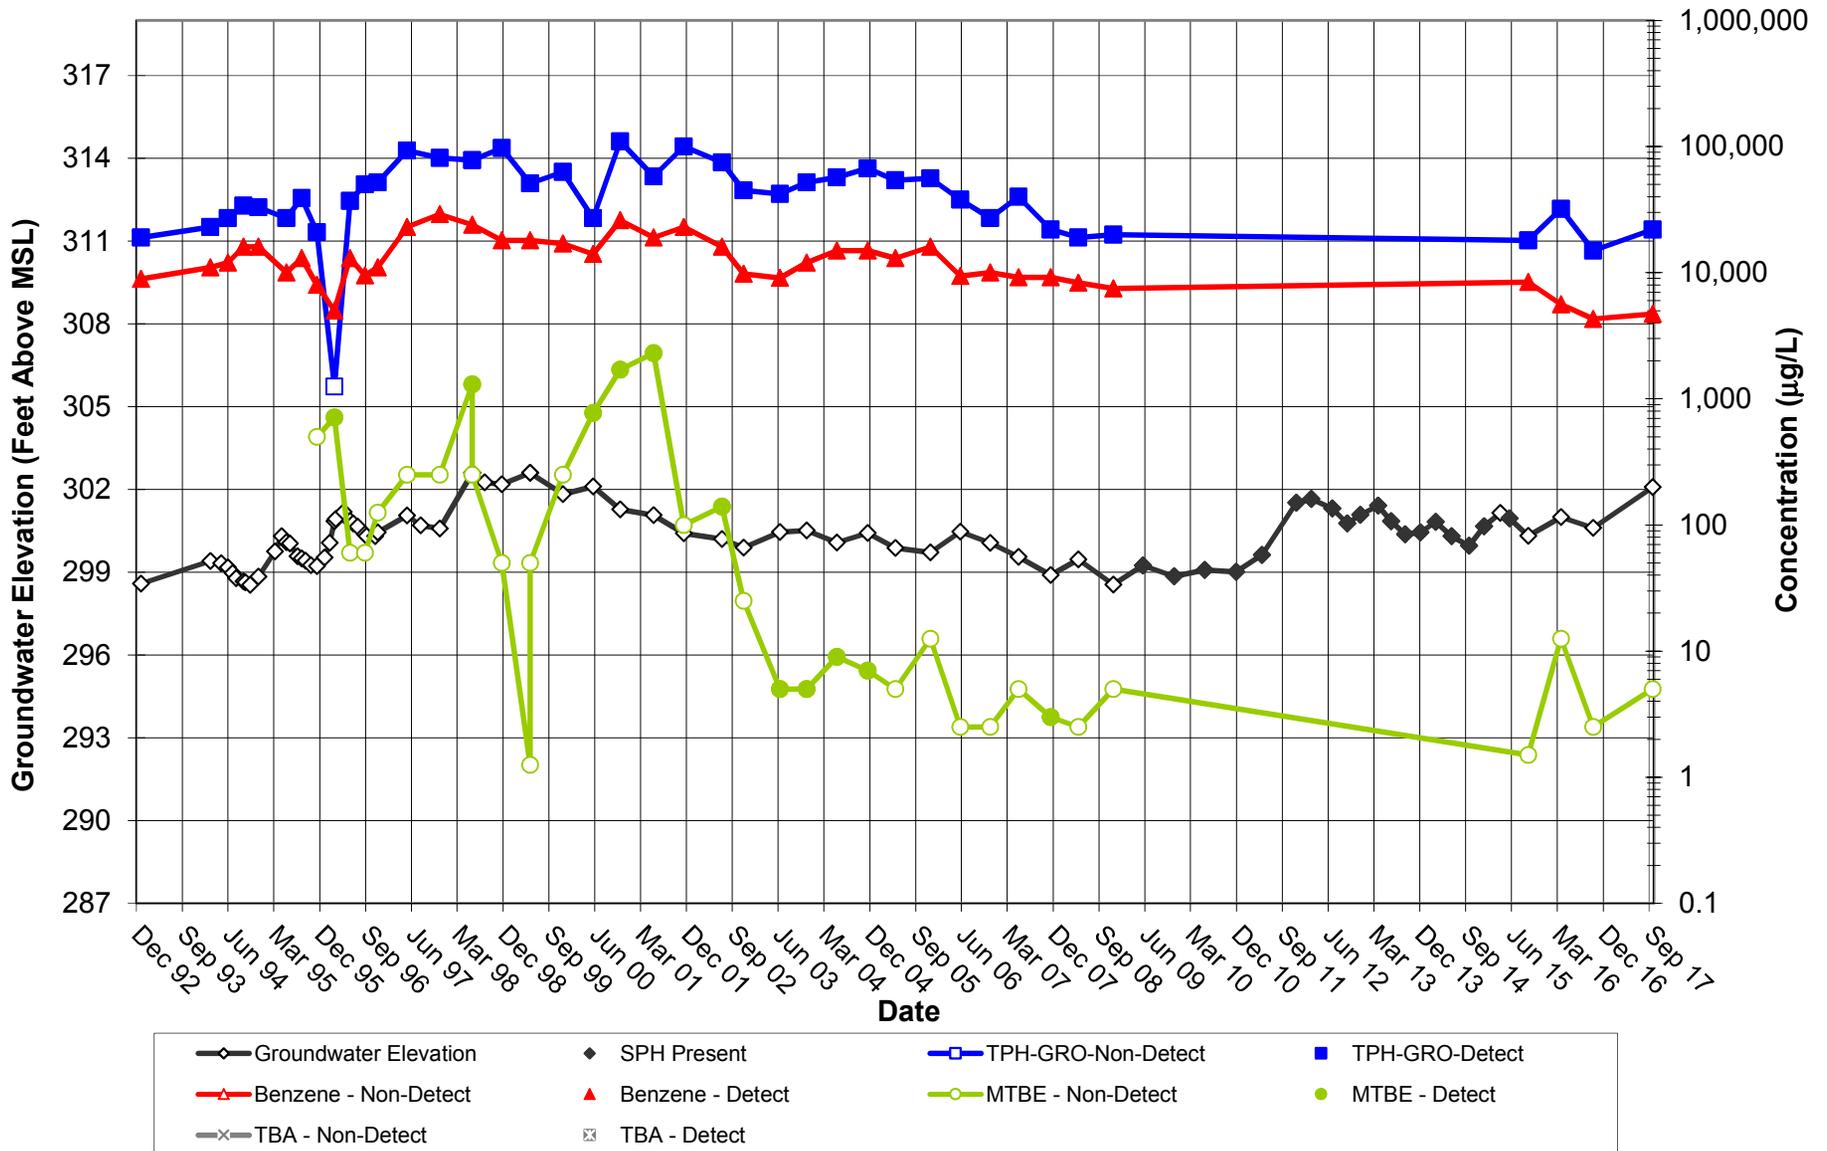

**Former Chevron Service Station No. 97127  
MW-2 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

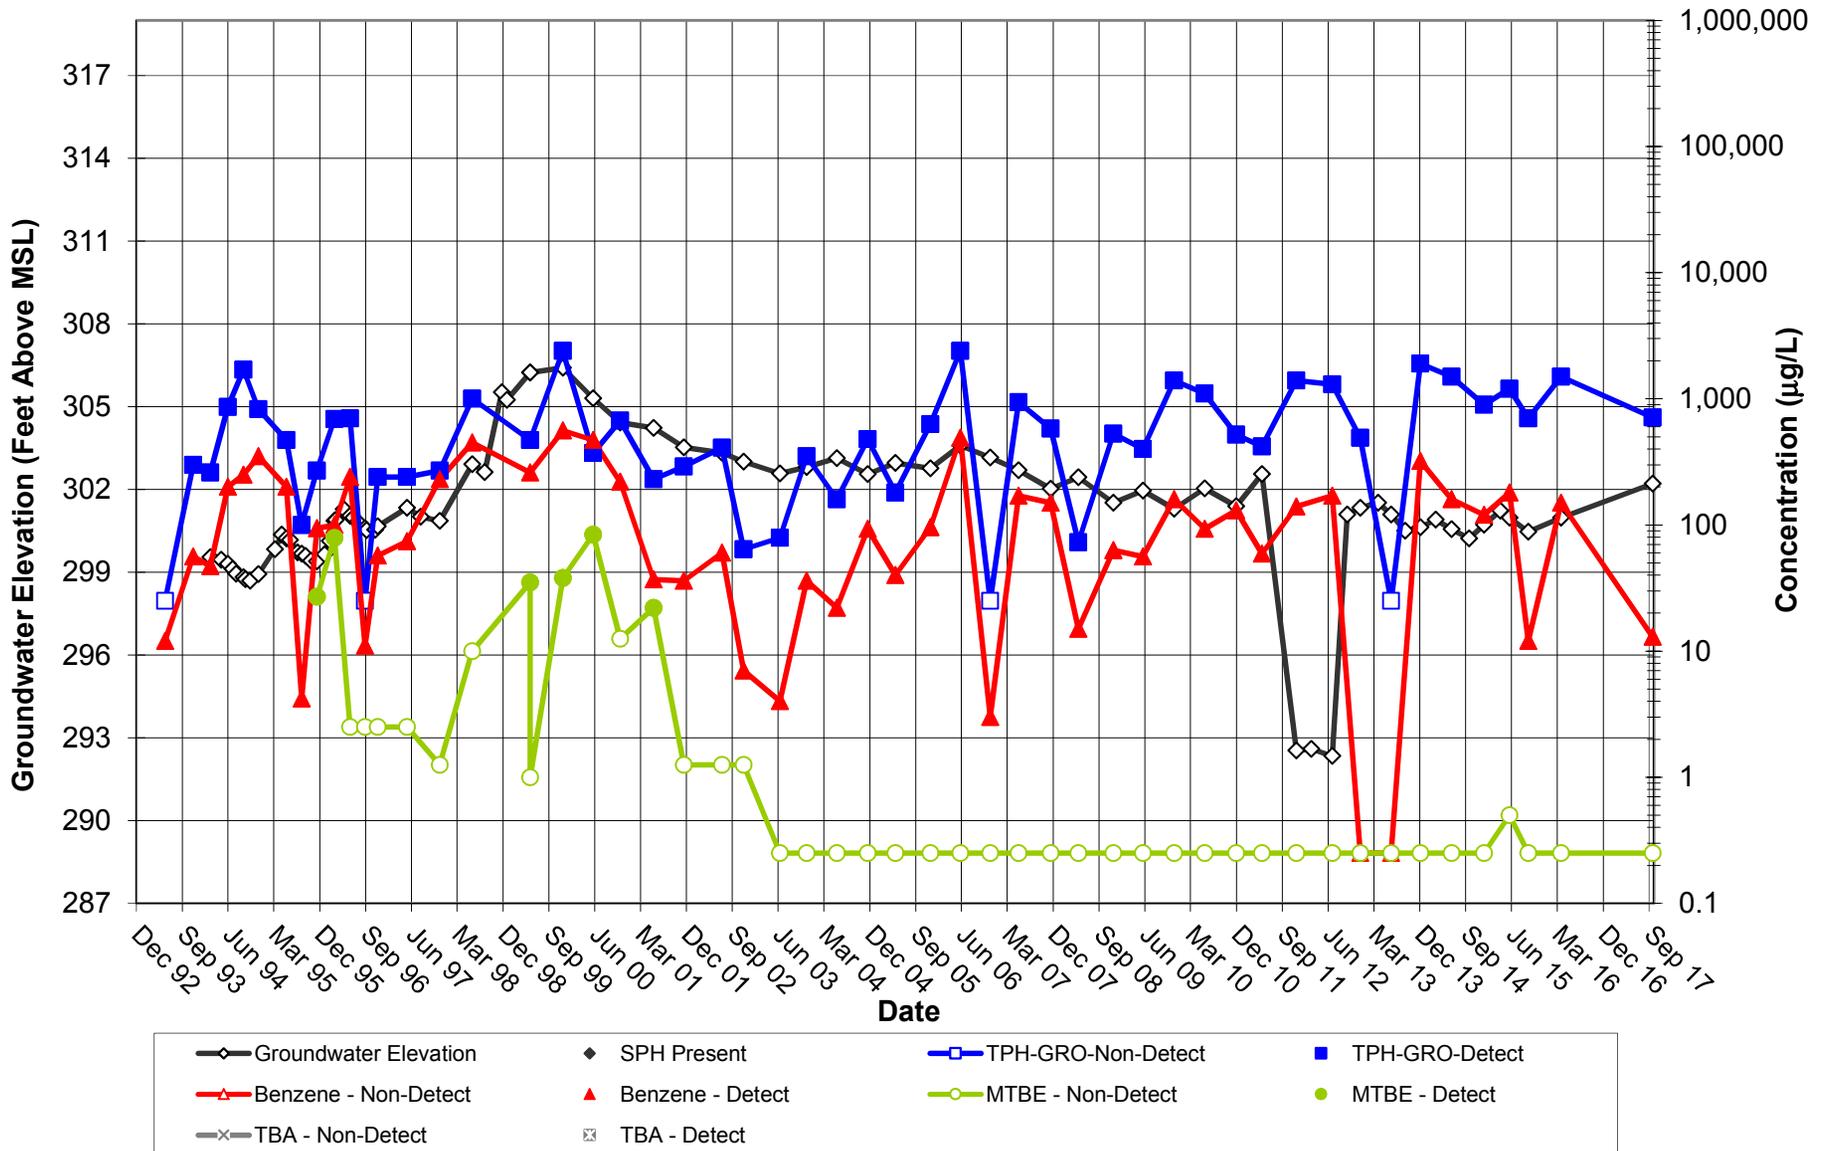

**Former Chevron Service Station No. 97127  
MW-3 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

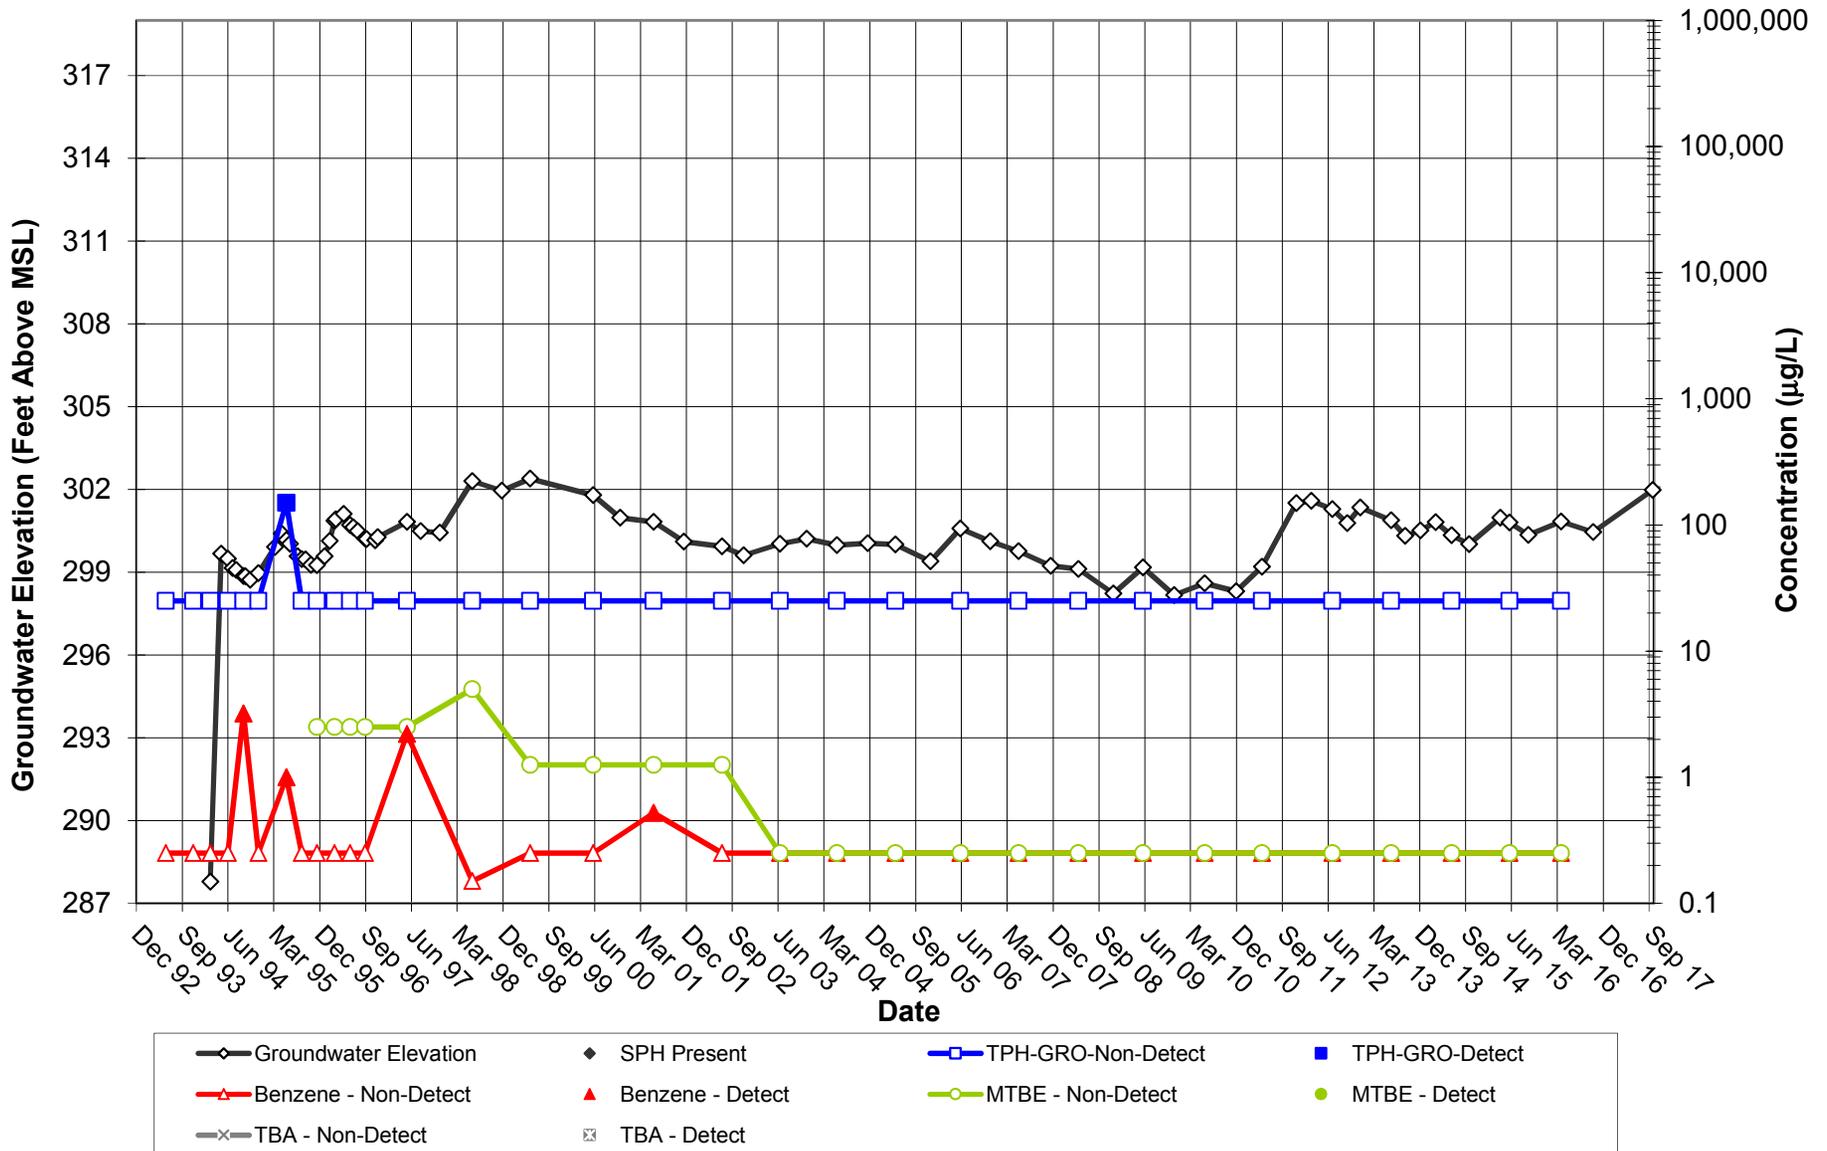

**Former Chevron Service Station No. 97127  
MW-4 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

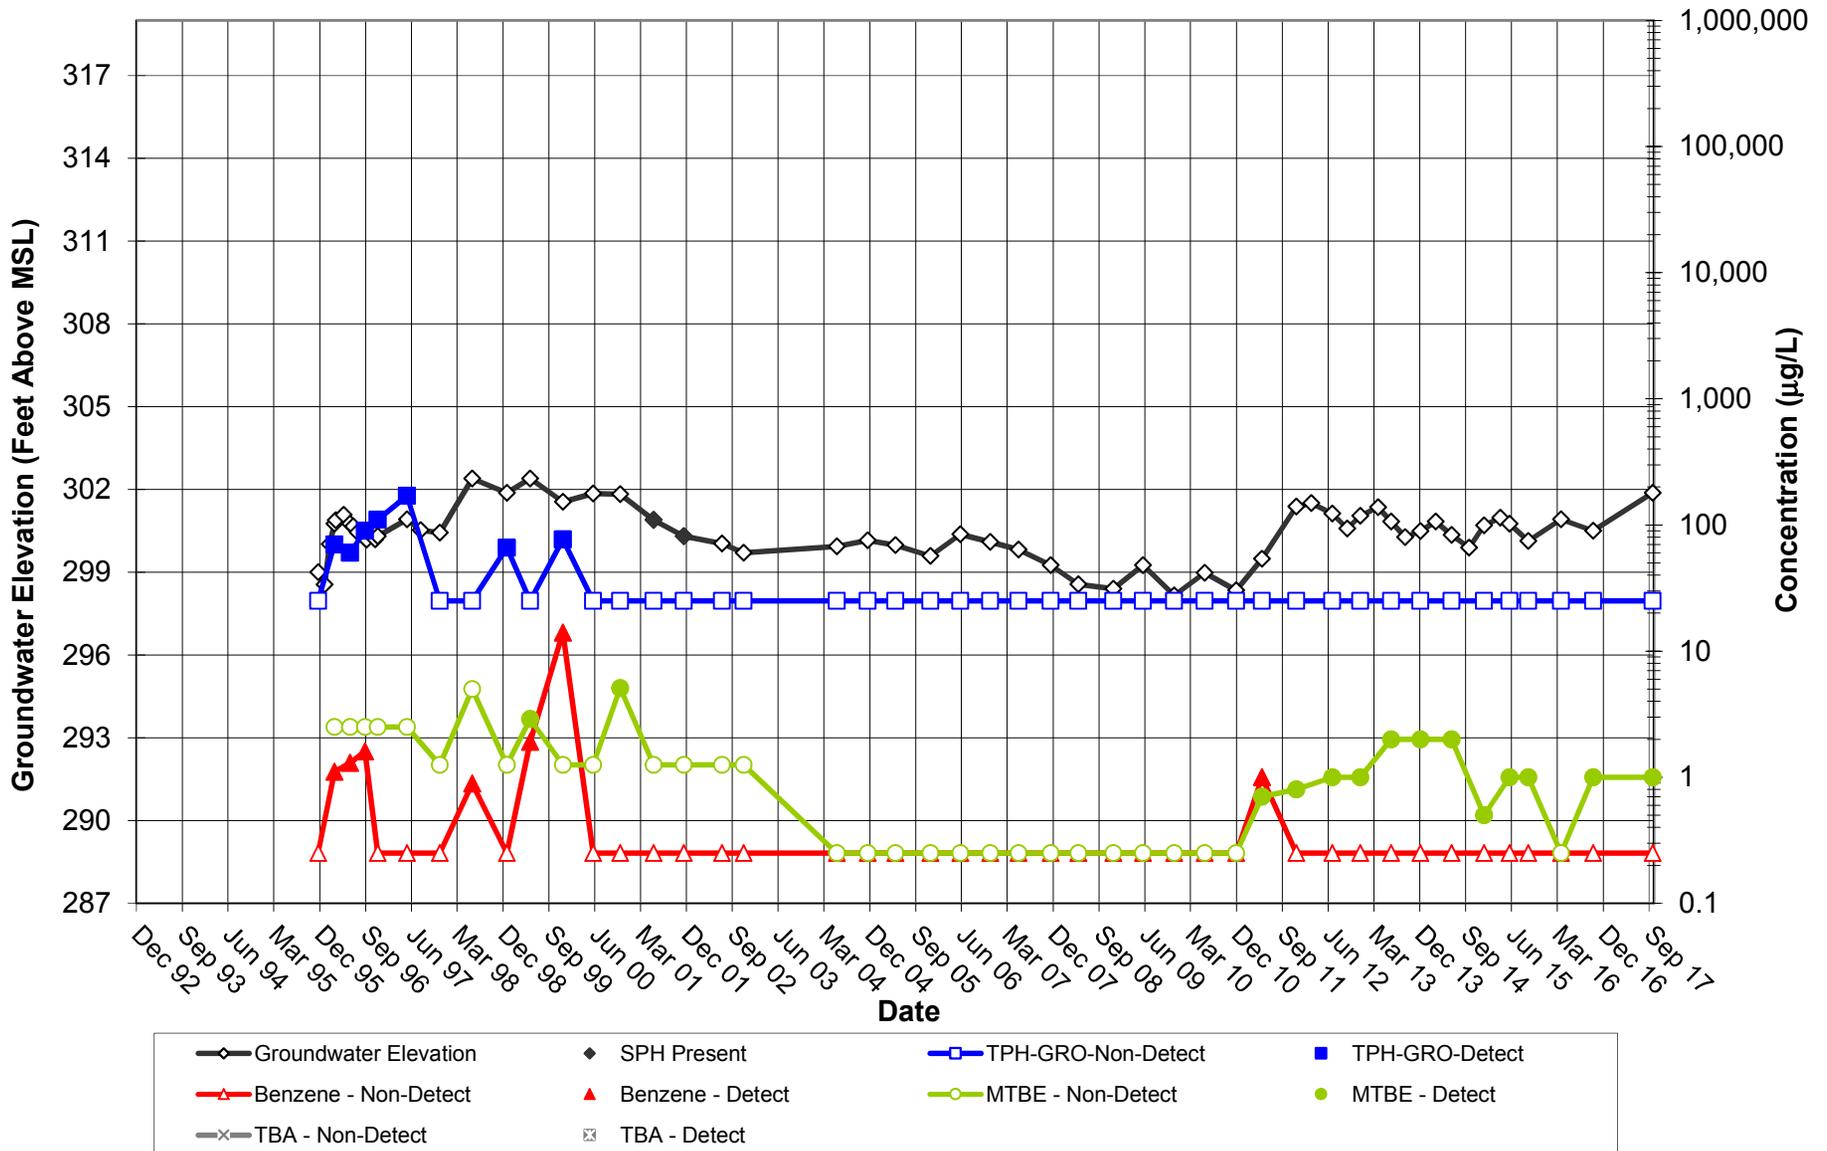

**Former Chevron Service Station No. 97127  
MW-5 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

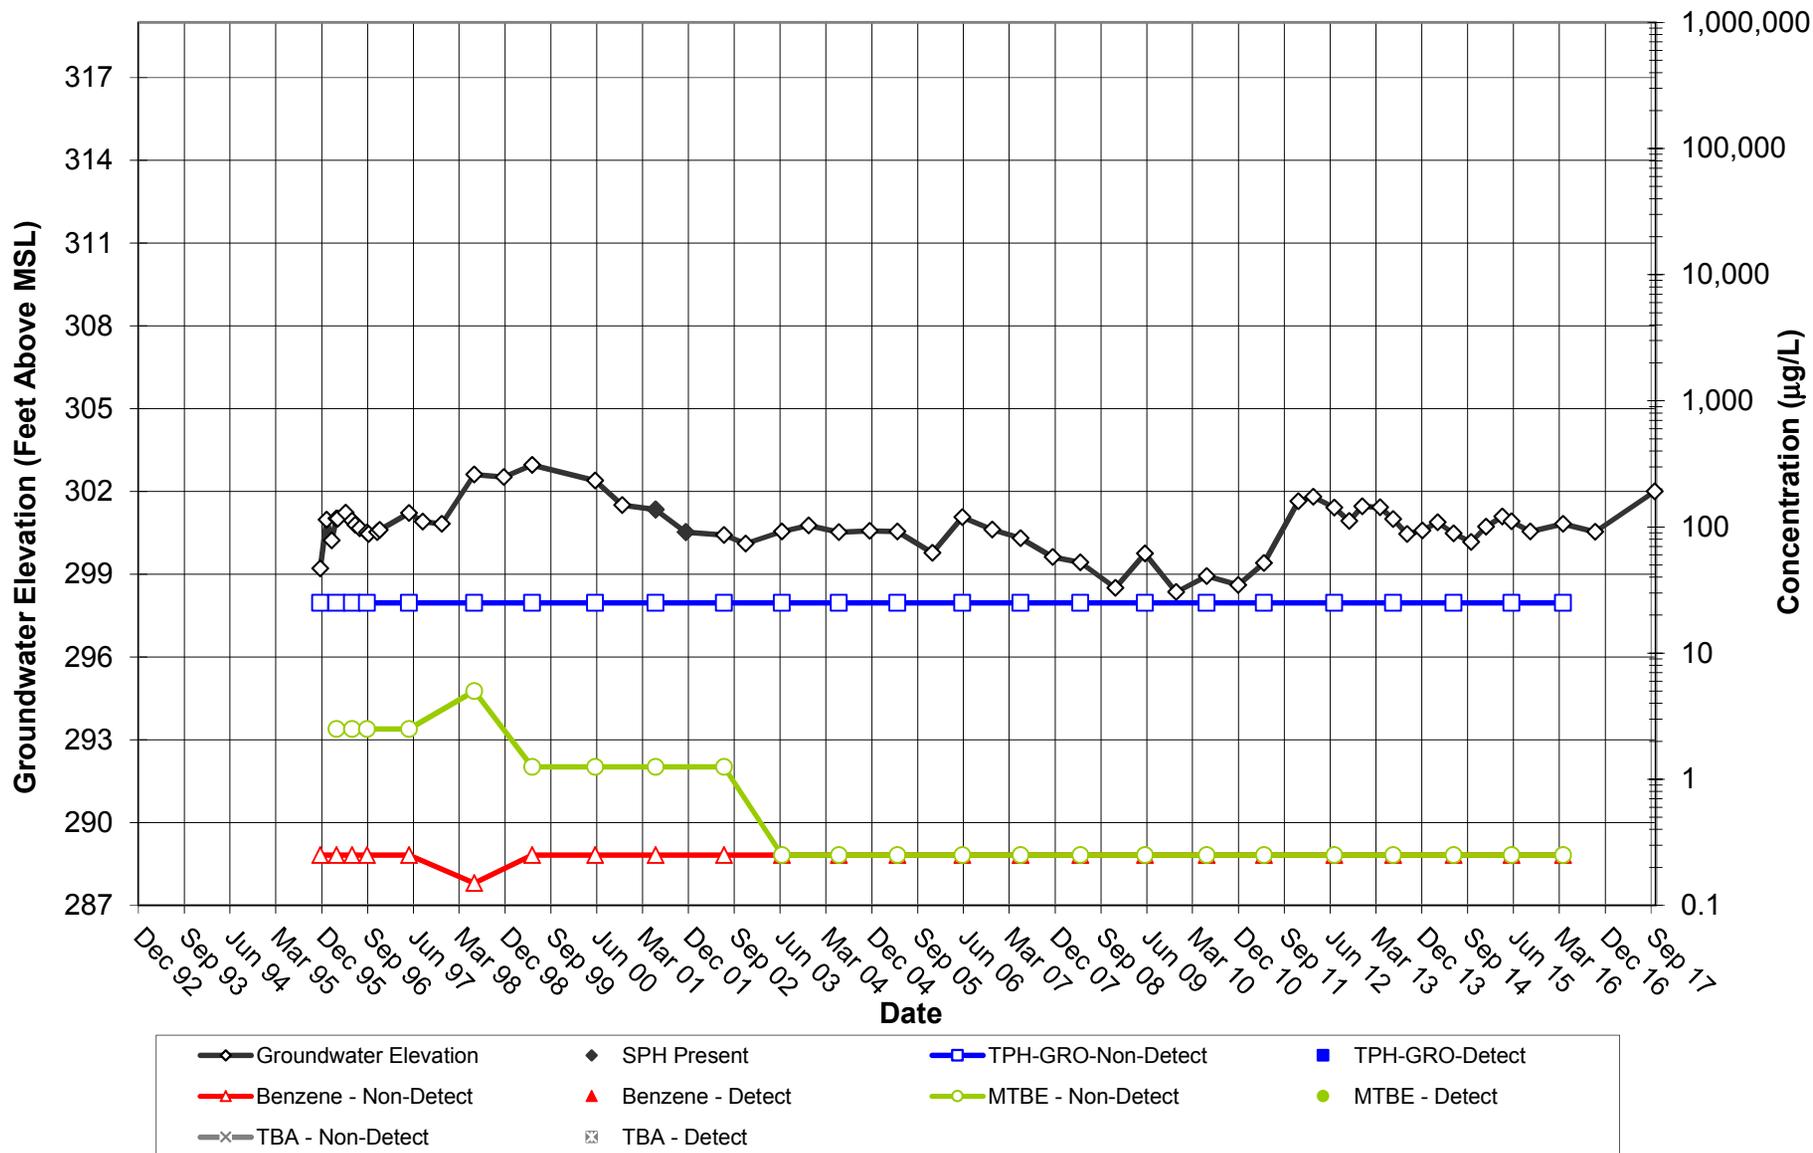

**Former Chevron Service Station No. 97127  
MW-6 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

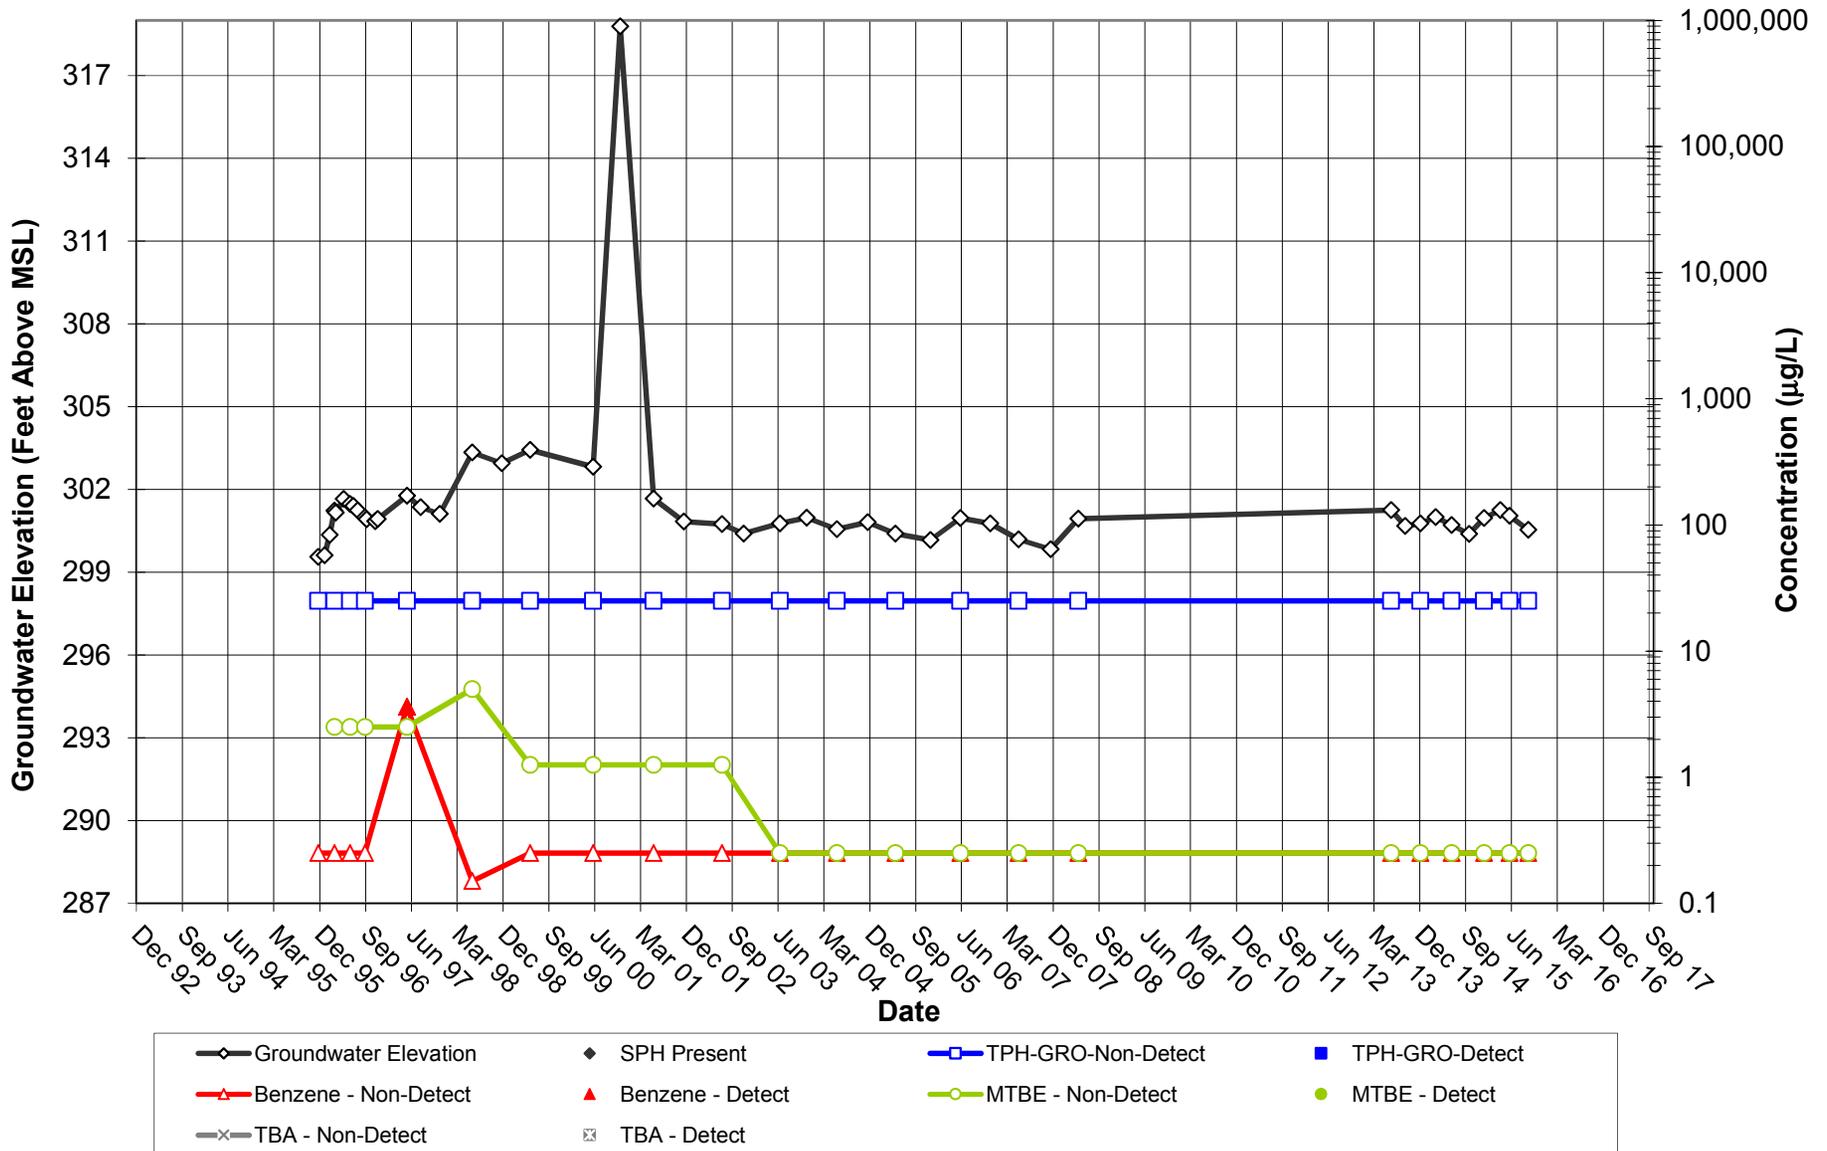

**Former Chevron Service Station No. 97127  
MW-7 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

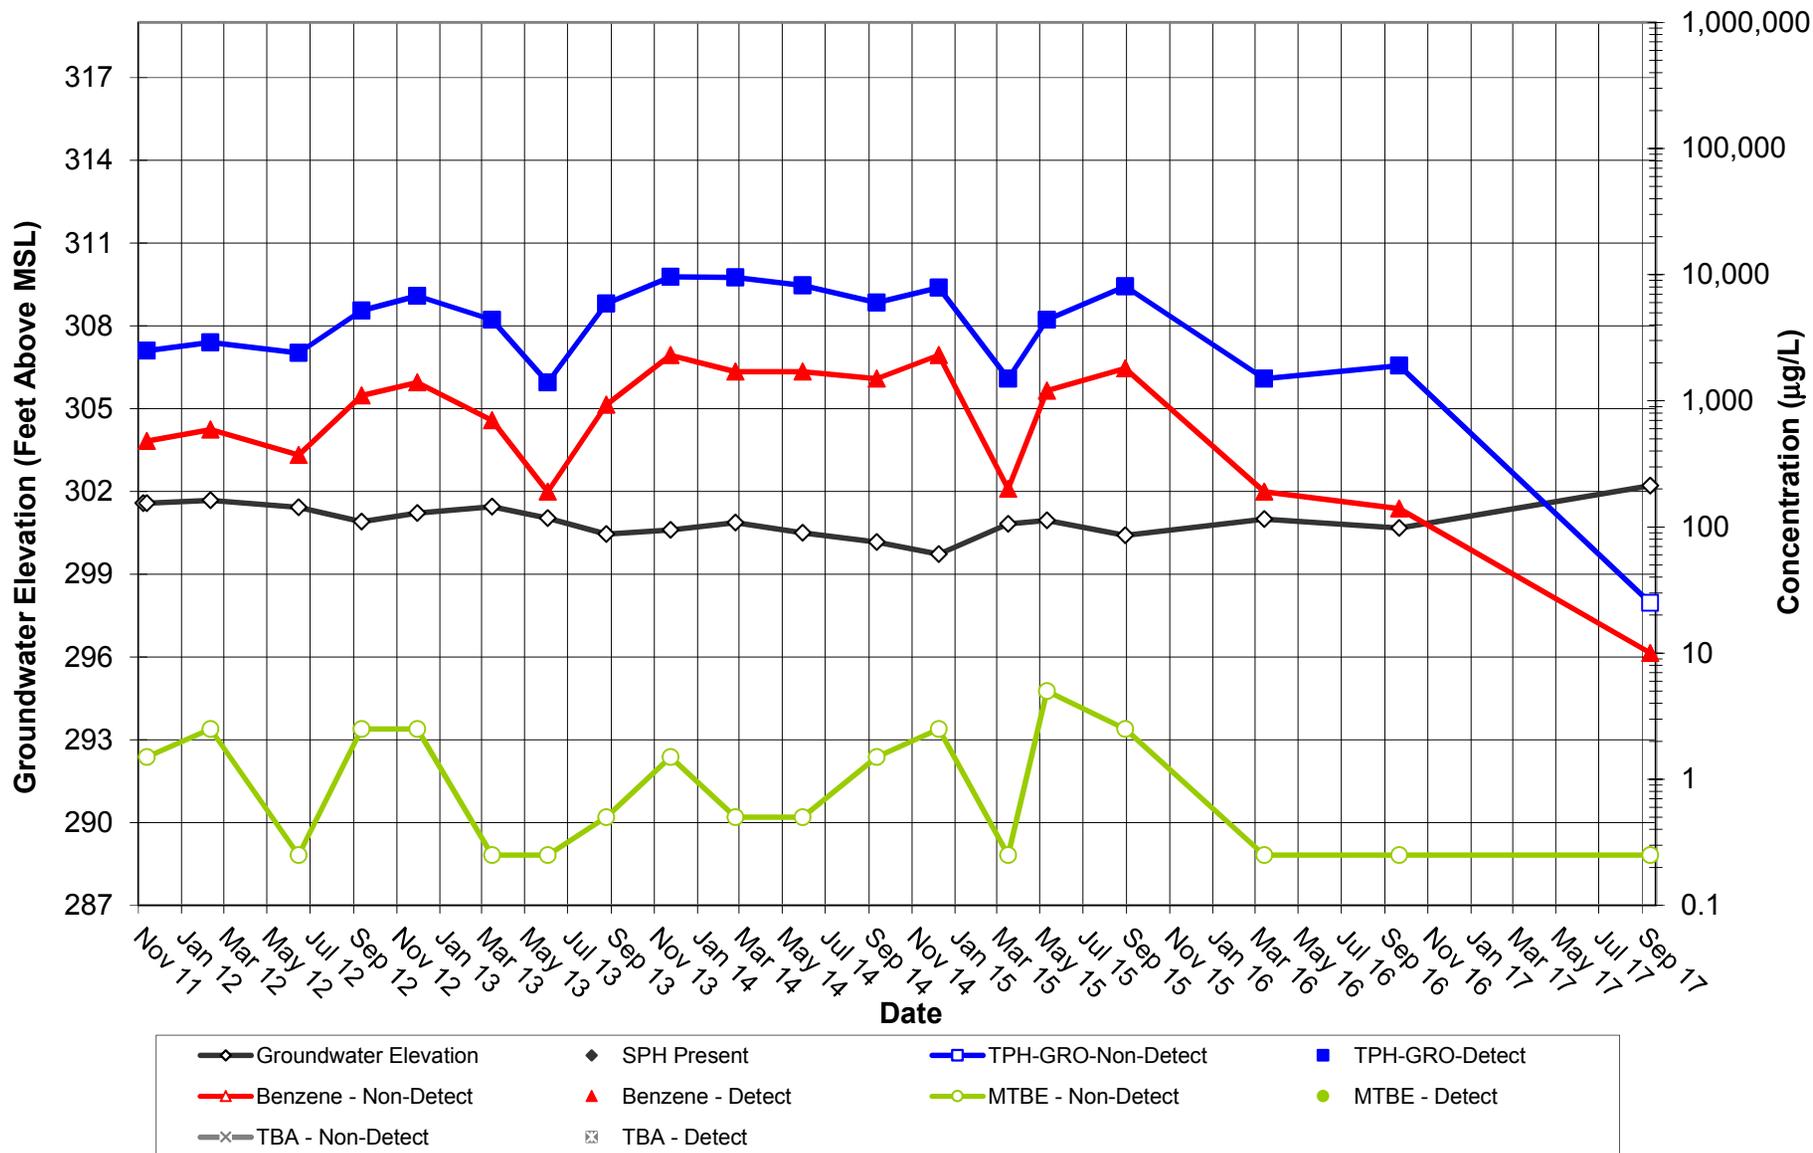

**Former Chevron Service Station No. 97127  
MW-8 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

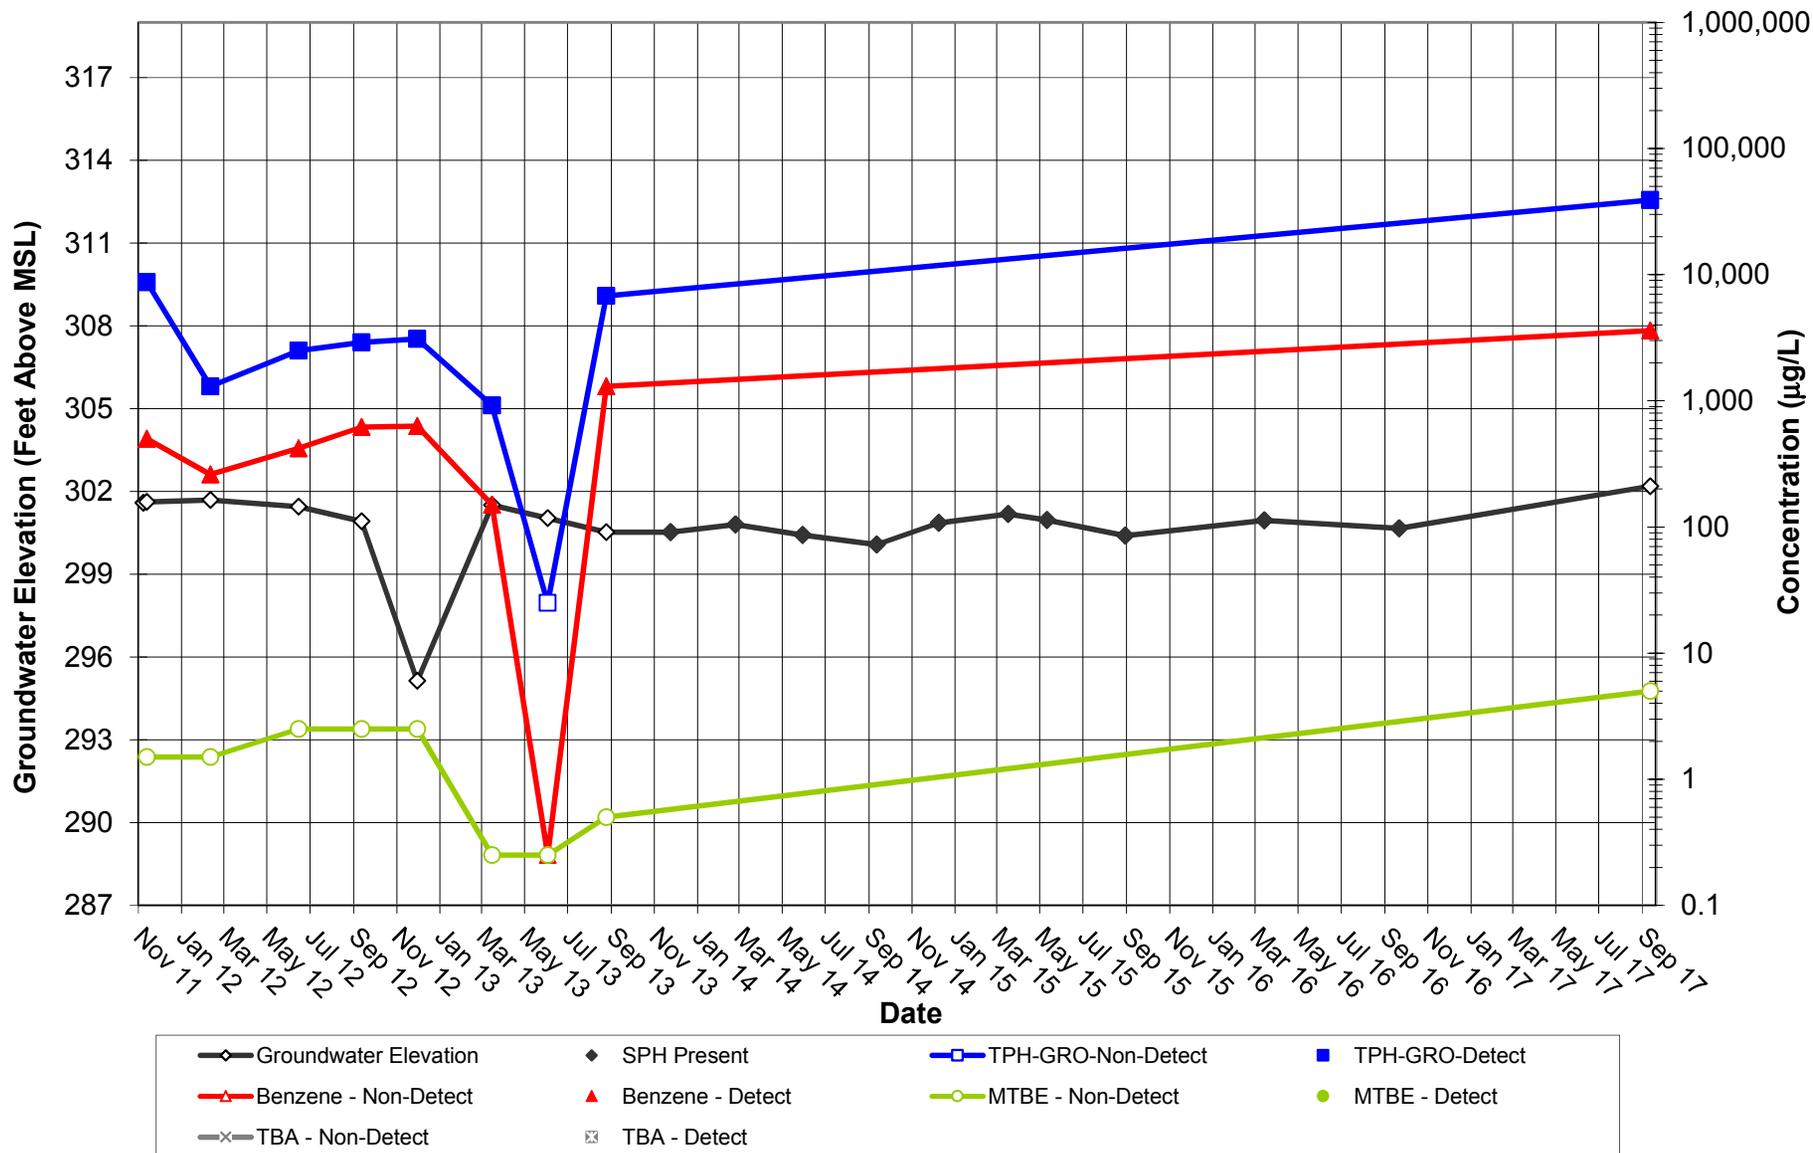

**Former Chevron Service Station No. 97127  
MW-9 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

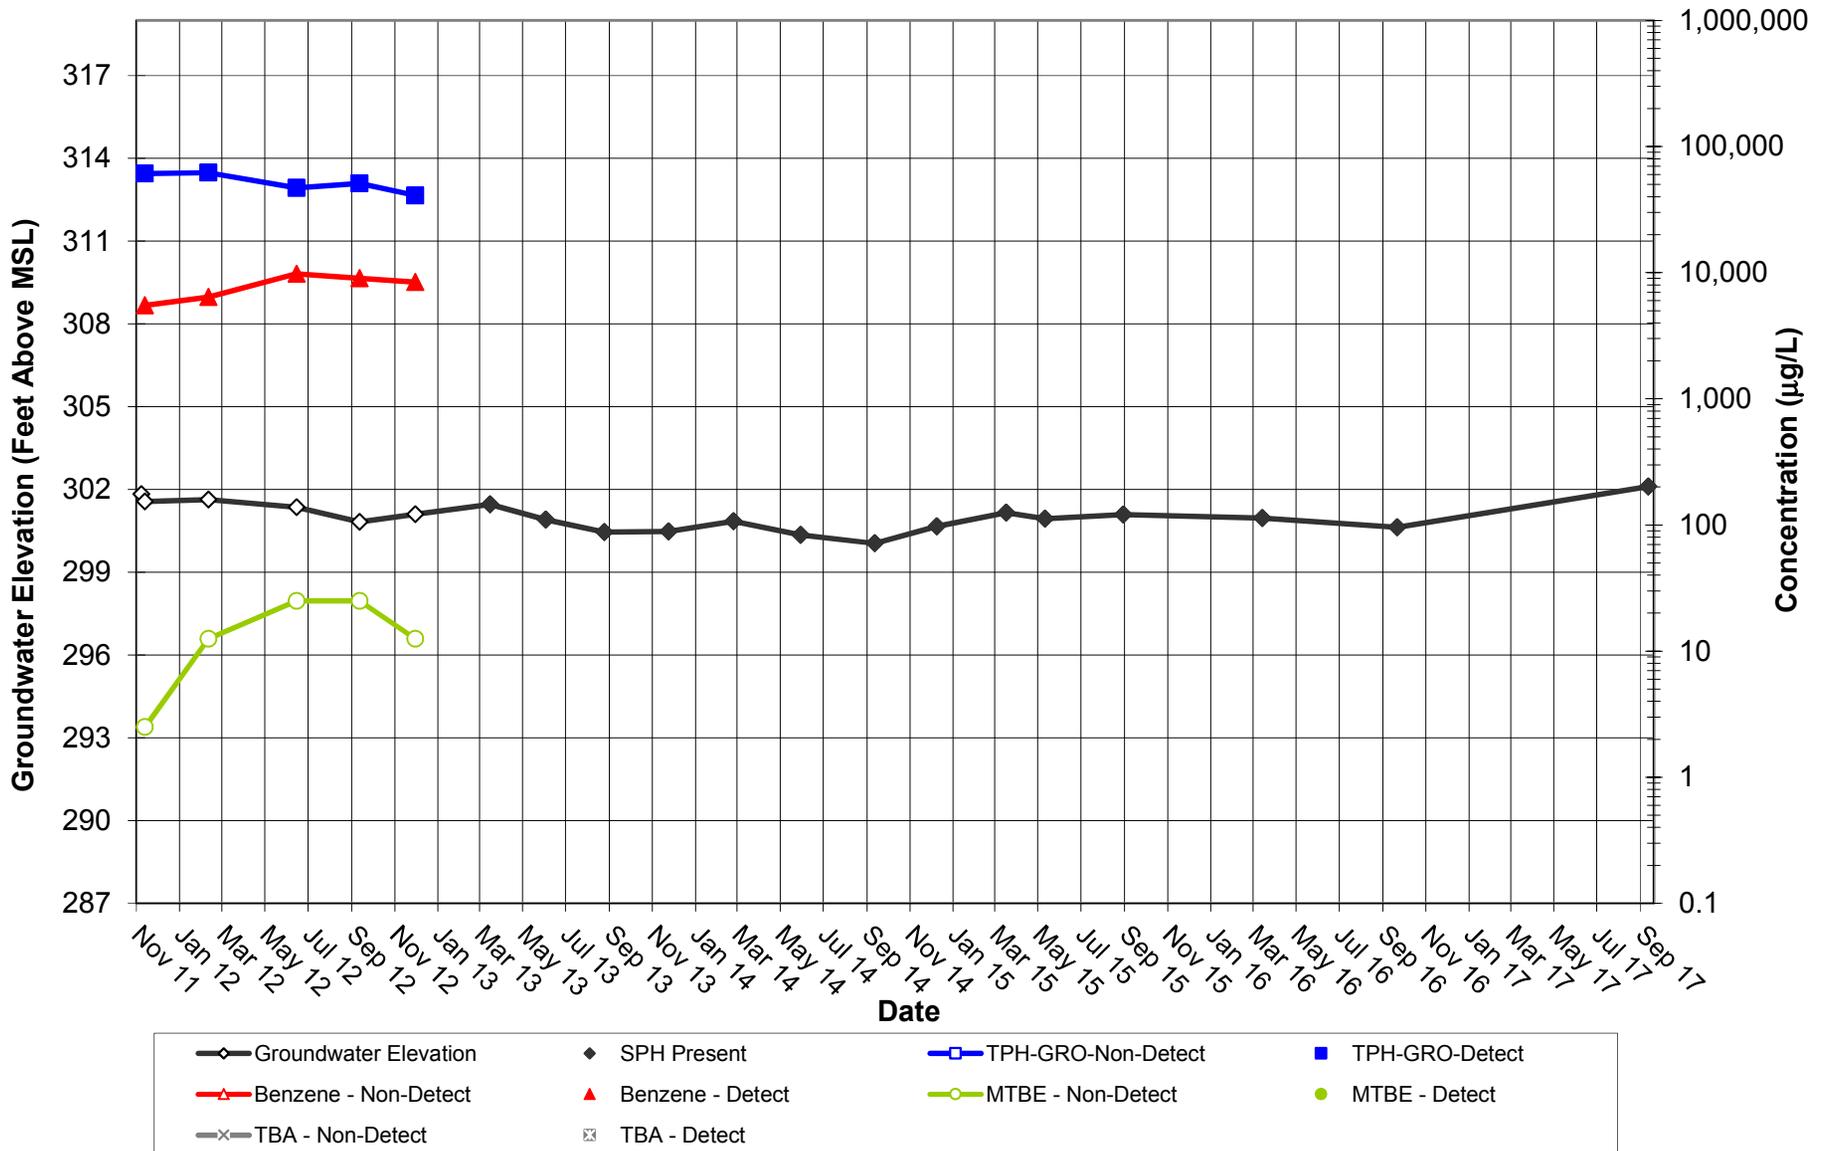

**Former Chevron Service Station No. 97127  
MW-10 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

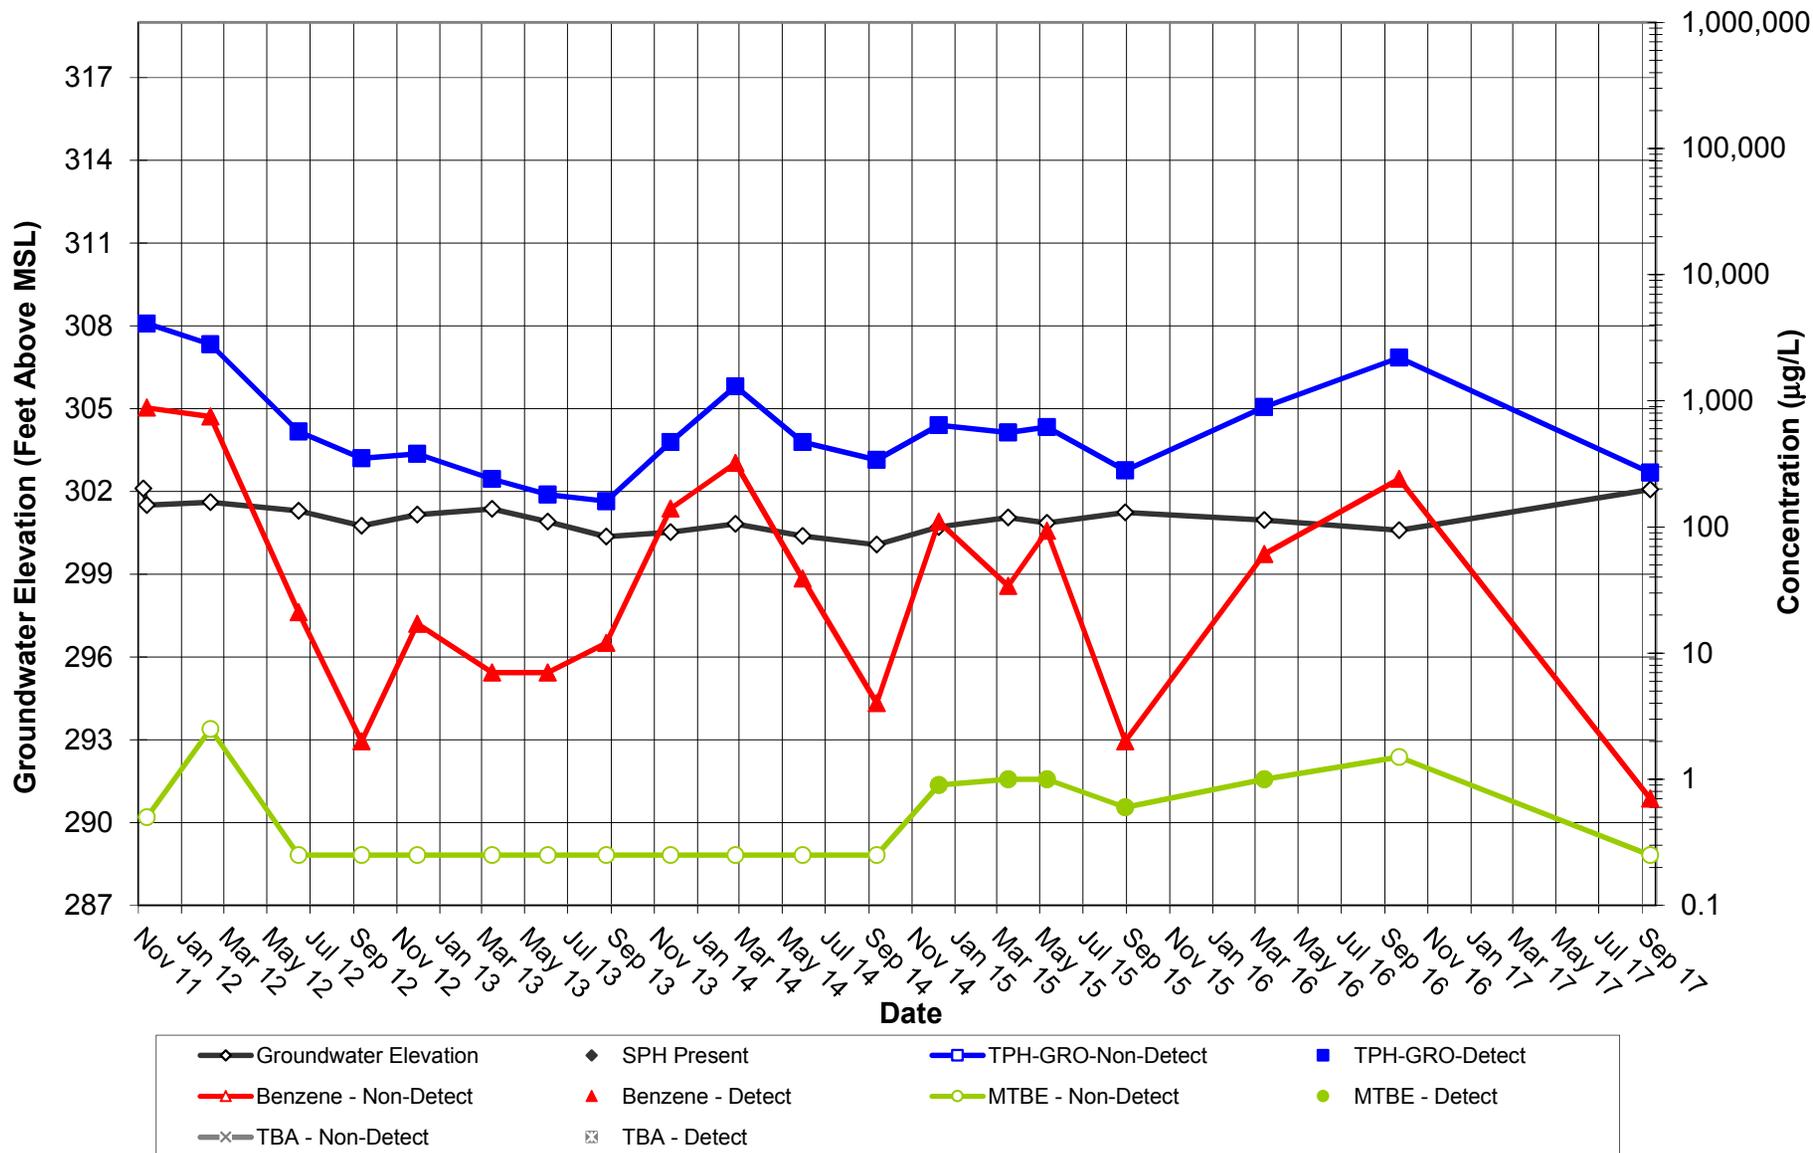

**Former Chevron Service Station No. 97127  
MW-11 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

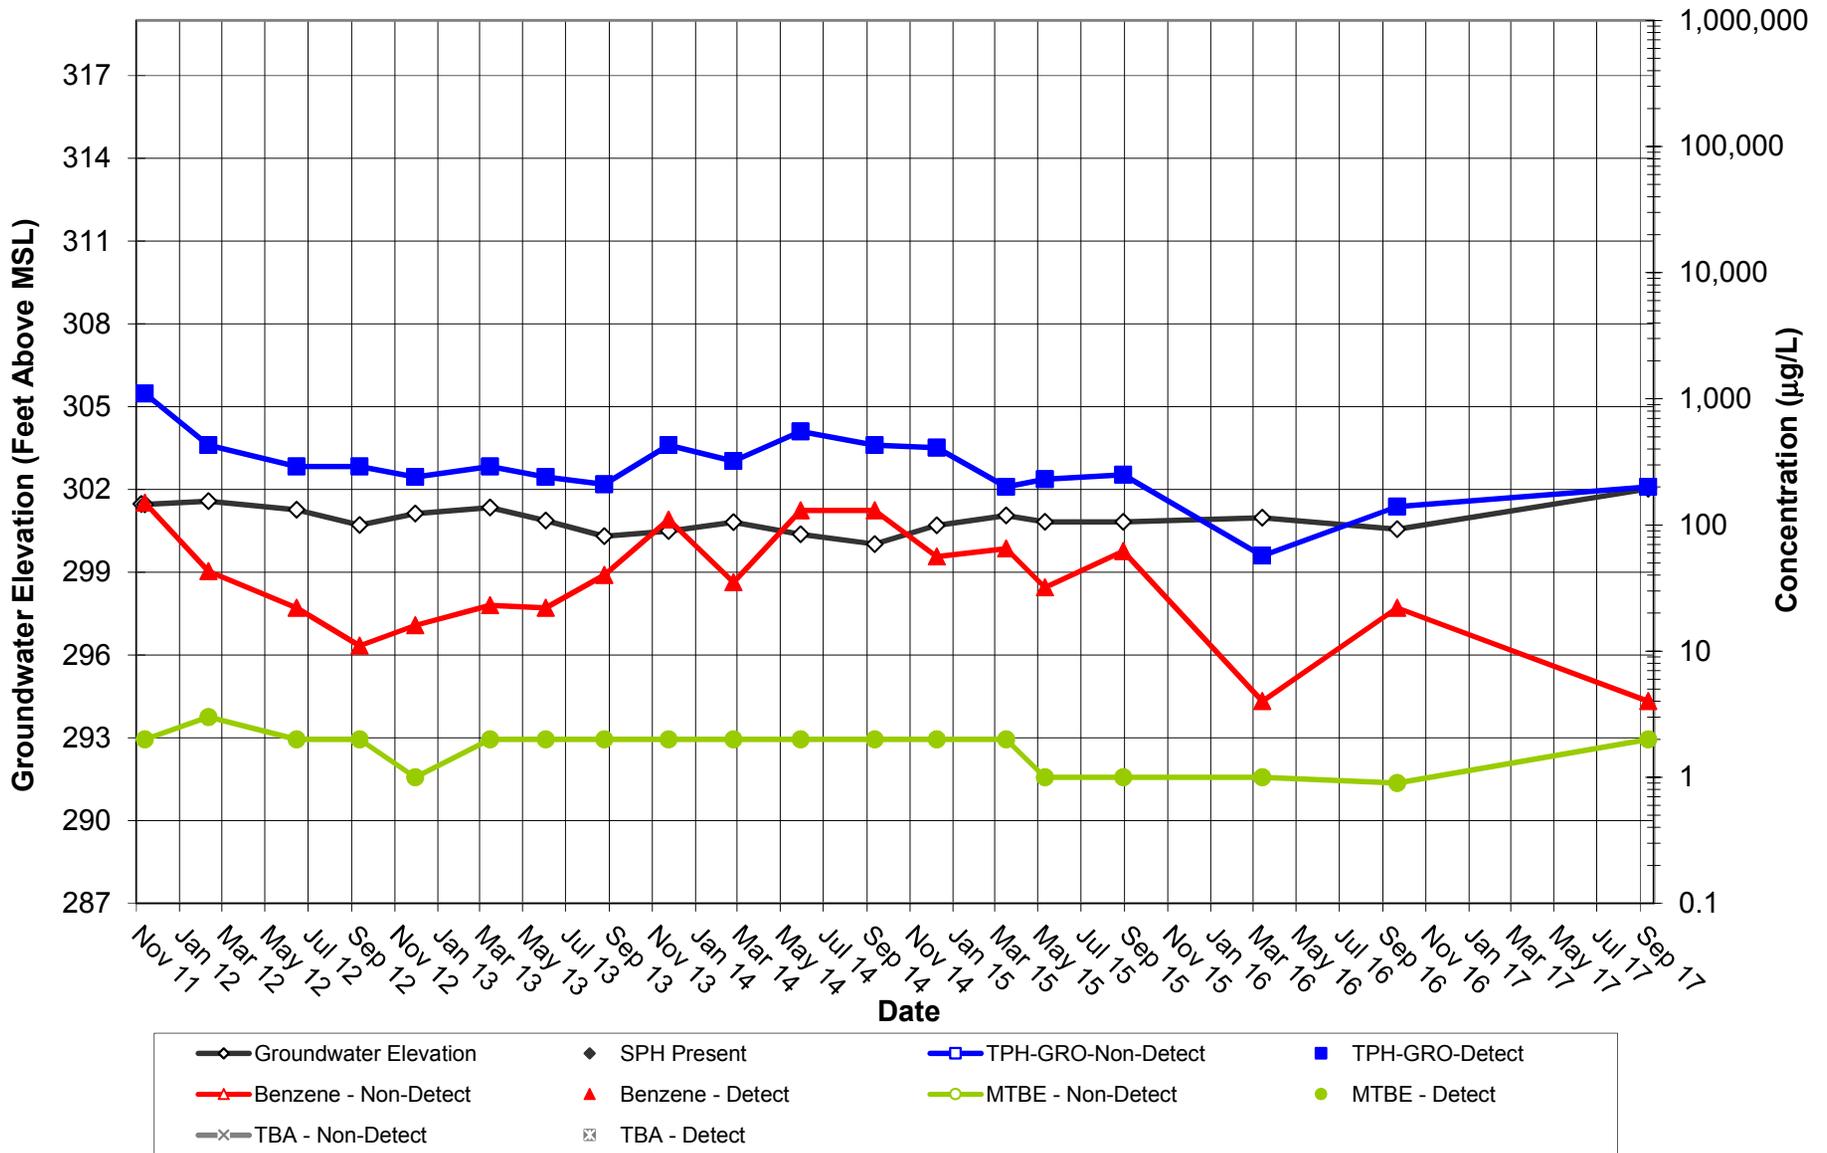

**Former Chevron Service Station No. 97127  
MW-12 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

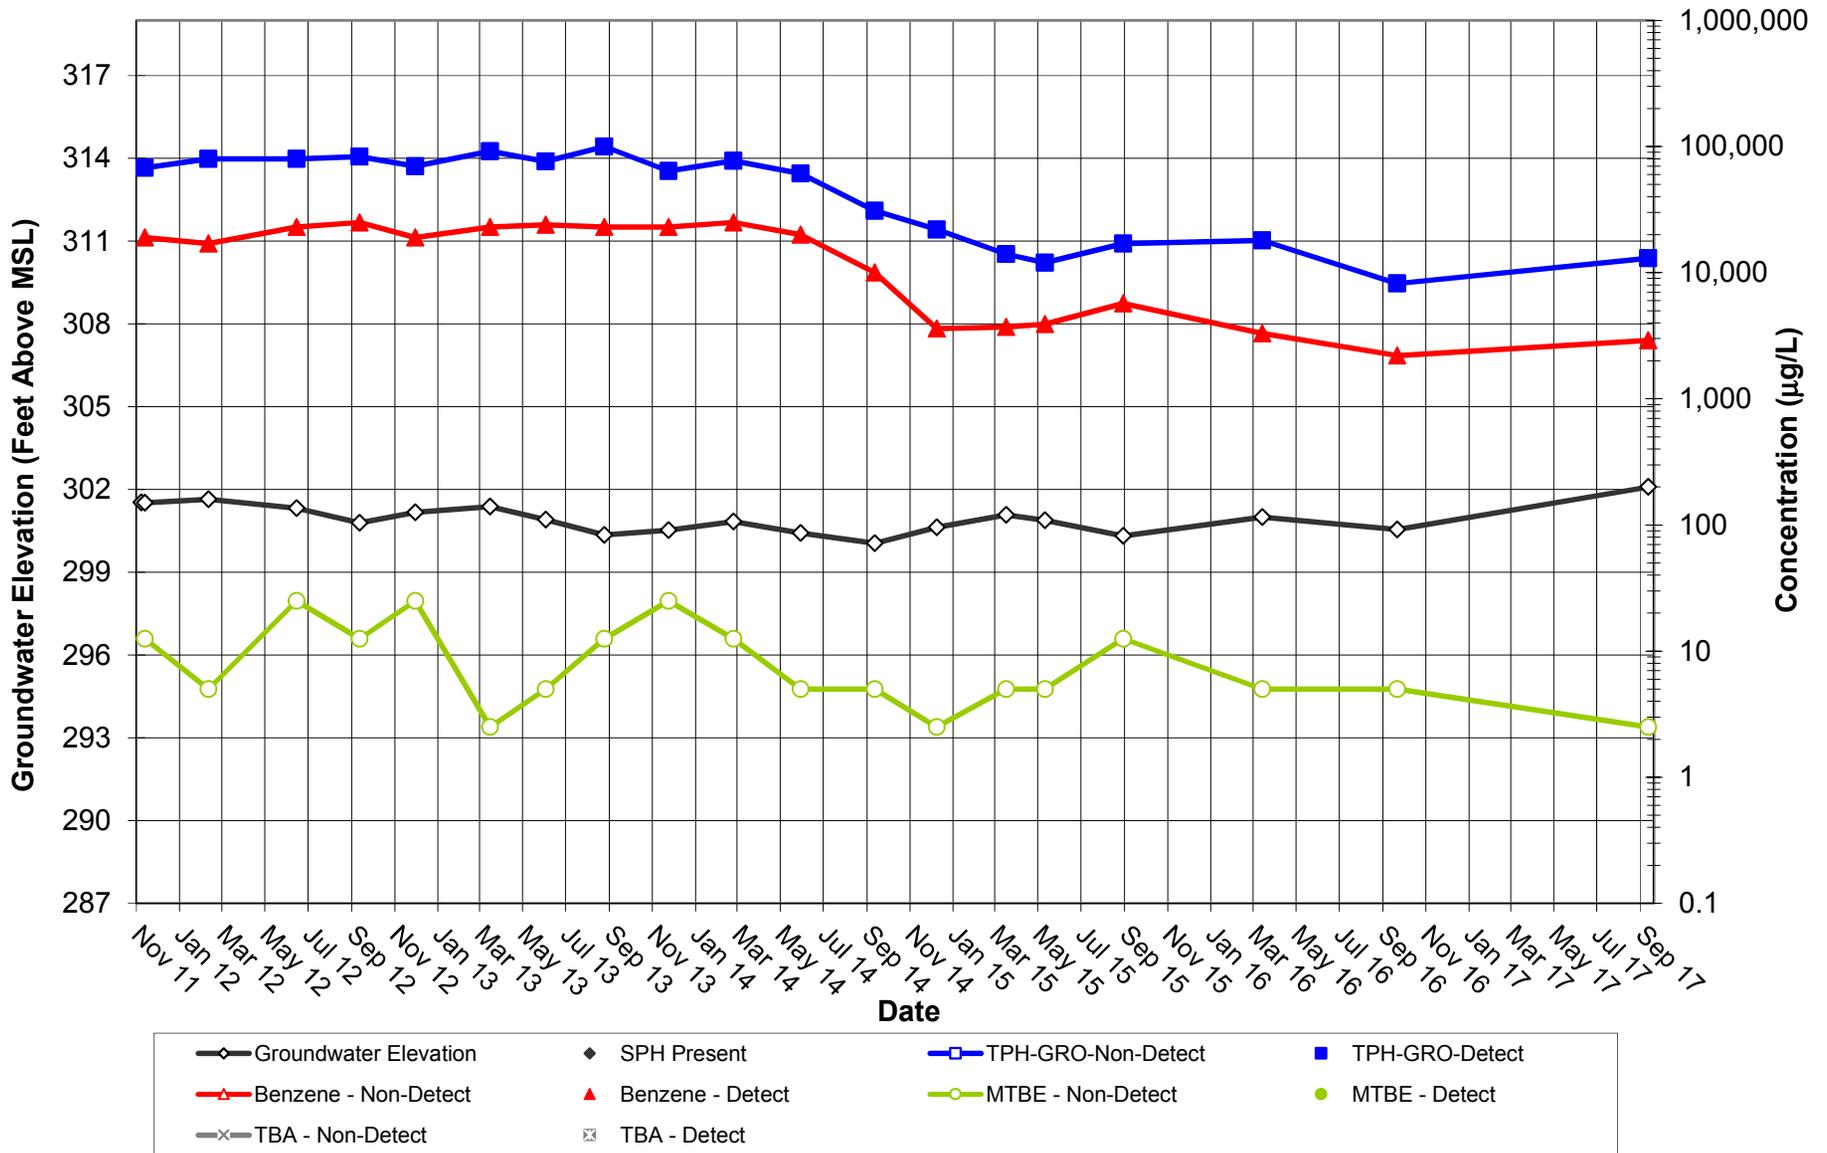

**Former Chevron Service Station No. 97127  
MW-13 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

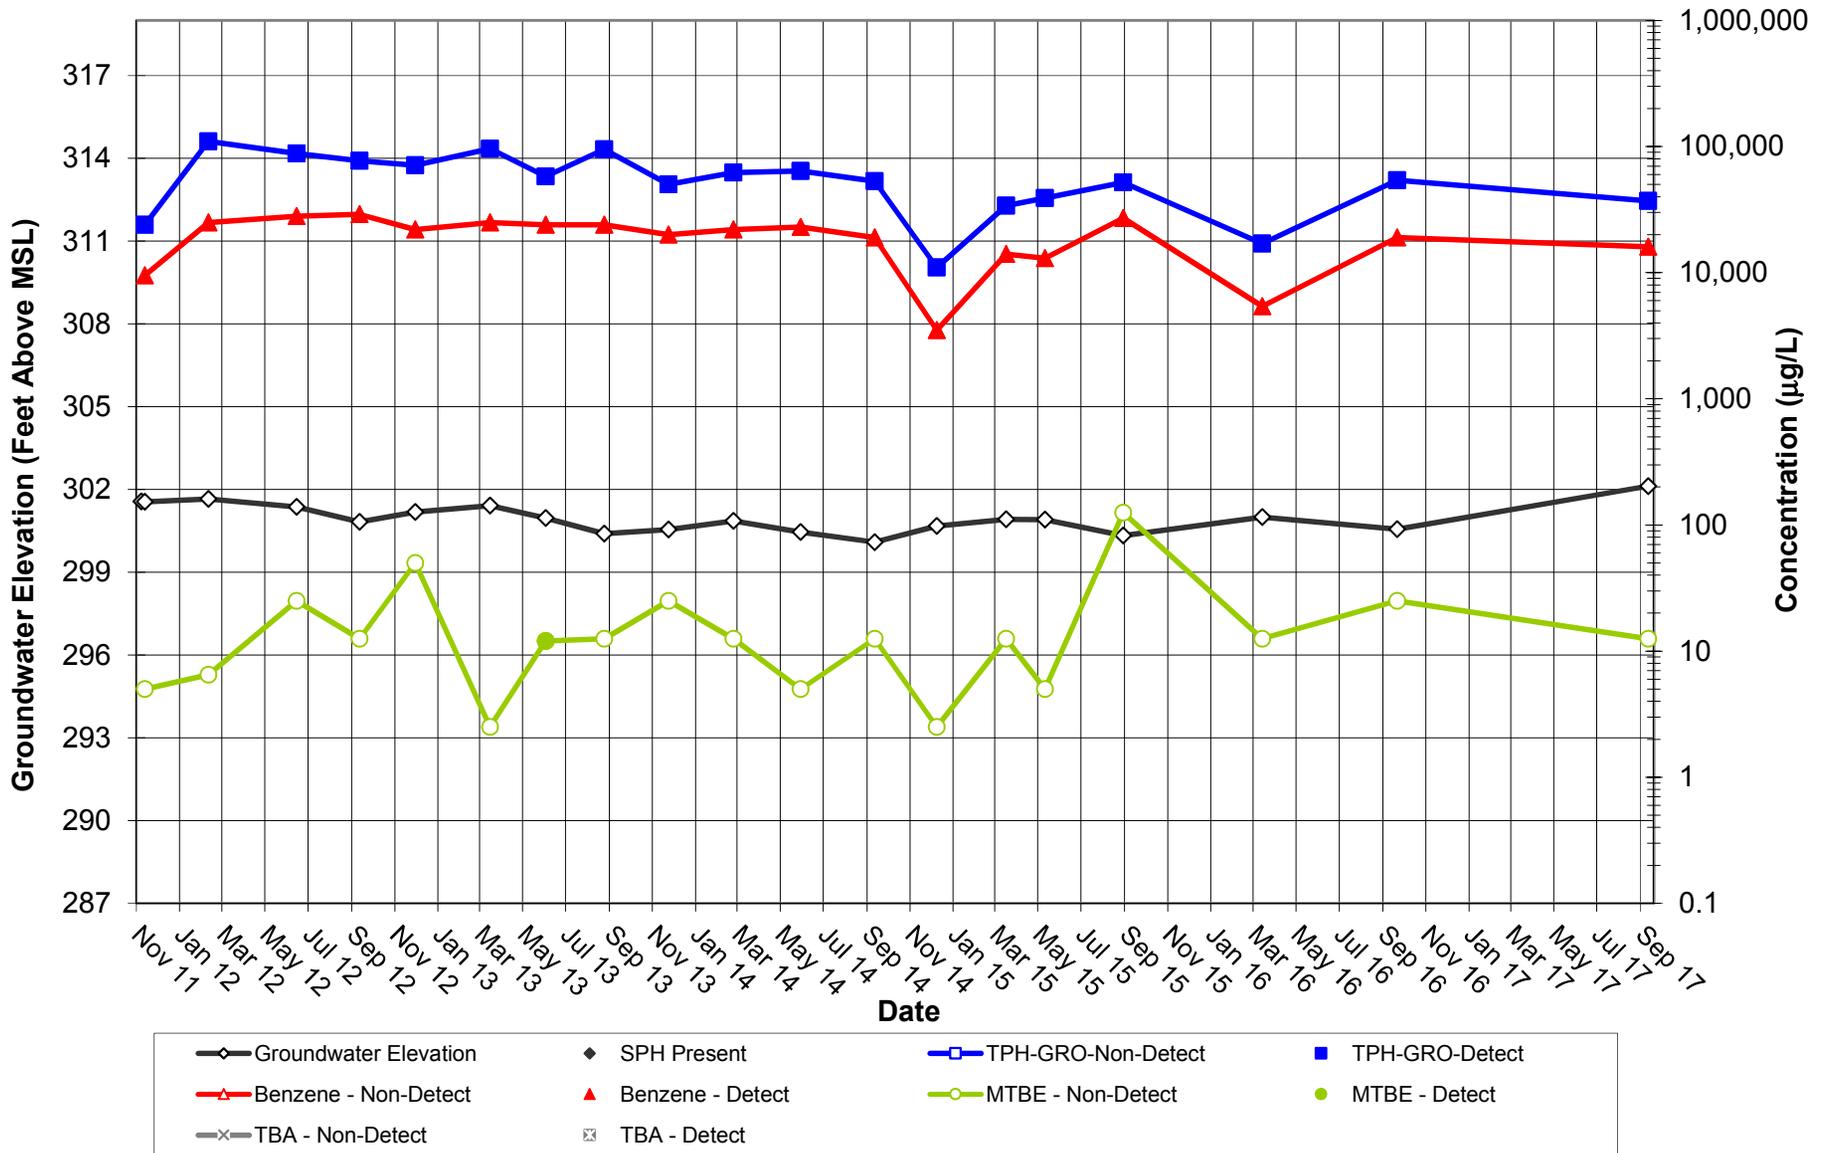

**Former Chevron Service Station No. 97127  
MW-14 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

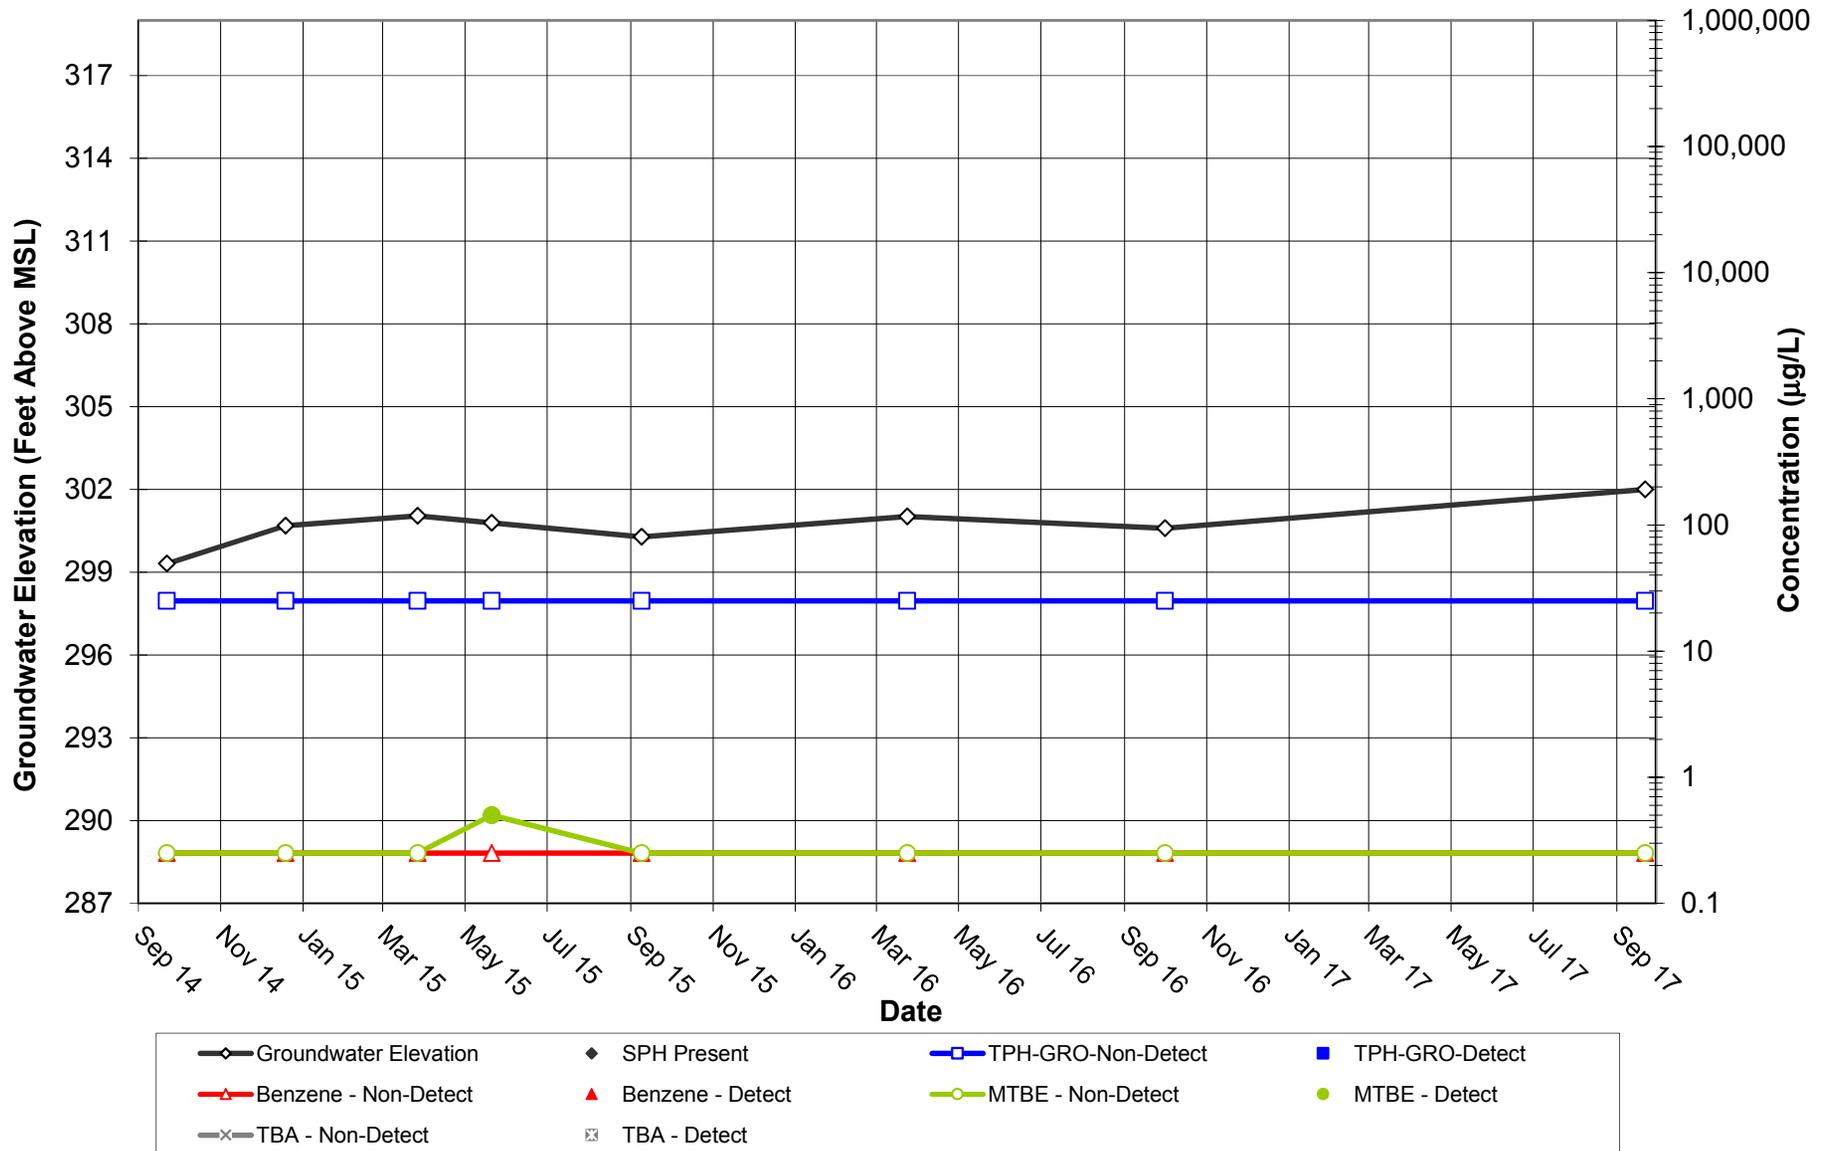

**Former Chevron Service Station No. 97127  
MW-15 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.

**Former Chevron Service Station No. 97127  
MW-16 Hydrograph**

**Notes**

1. No analytical samples were collected if SPH (separate phase hydrocarbons) was present in the well during the sampling event.
2. Non-detected analytical results are graphed at a concentration of one-half of the laboratory reporting limit.
3. Trend lines are presented for reference purposes only and do not represent professional interpretation.
4. For additional information about data for a given sampling event (such as no data plotted), refer to Table 1.
