WORK PERFORMED THIS QUARTER (First Quarter 2008):

1. Prepared and submitted the Fourth Quarter 2007 Status Report.
2. No environmental work was conducted at the Site during the First Quarter of 2008.

WORK PROPOSED FOR NEXT QUARTER (Second Quarter 2008):

1. Prepared and submitted this First Quarter 2008 Status Report (contained herein).
2. No environmental work is scheduled for the Site during the Second Quarter 2008.

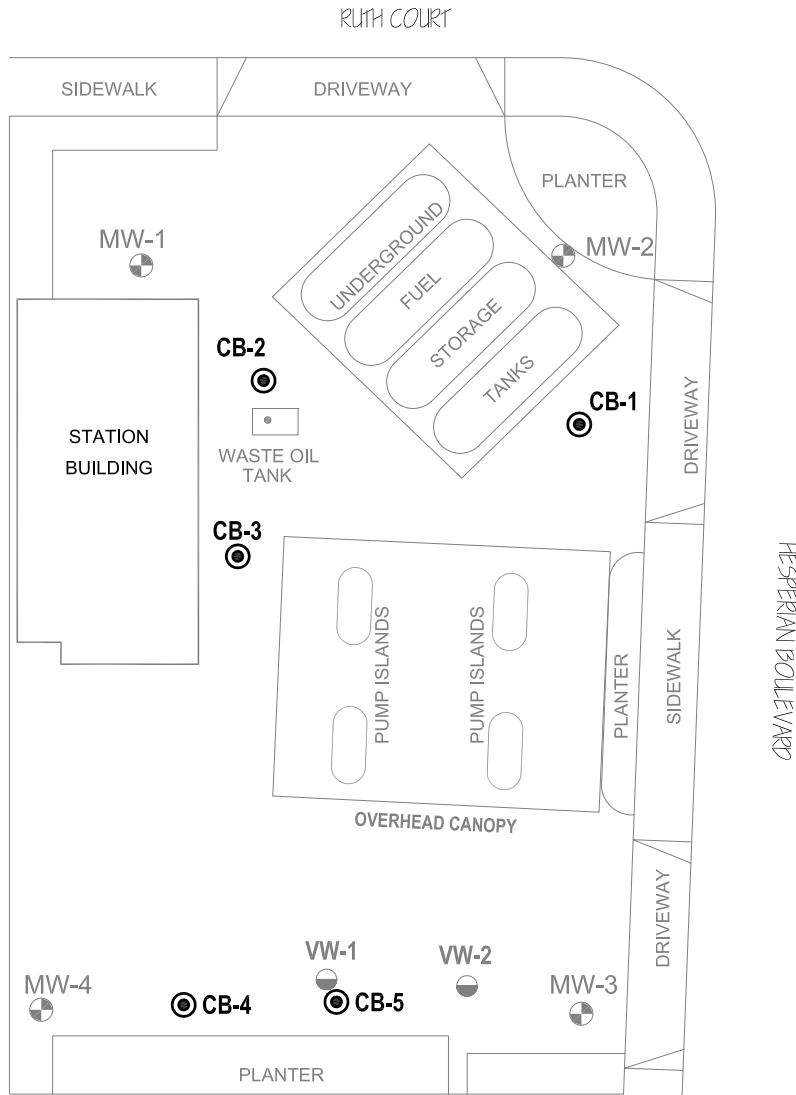

DISCUSSION:

Case closure was requested by BP on 4 June 2004 from ACEH. Ground-water monitoring and reporting was performed during the Third Quarter of 2006 in accordance with the request from ACEH to support the case closure process. Following their review, ACEH determined that in order to facilitate site closure an additional soil and ground-water investigation was required, as relayed in the ACEH letter dated 5 April 2007. The requested work plan was submitted on 15 May 2007. Field work occurred at the Site on 16-17 July 2007. The resulting soil and ground-water investigation report was submitted on 14 September 2007. For reference, a site map with the locations of the on-site soil and ground-water investigation borings is provided in Drawing 1.

Also received from ACEH in an email dated 4 April 2007 was a notice to discontinue the current program of ground-water monitoring. Therefore, the annual ground-water monitoring event previously scheduled to occur during the Third Quarter of 2007 was not performed. BP is currently awaiting a response from ACEH regarding the *On-Site Soil and Ground-Water Investigation Report* (BAI, 14 September 2007).
