STATION #2162 QUARTERLY GROUND-WATER STATUS REPORT

Facility: #2162	Address:	15135 Hesperian Boulevard, San Leandro, California
Environmental Business Manager:		Mr. Paul Supple
Consulting Company/Contact Person:		Broadbent & Associates, Inc. (BAI)/Rob Miller & Tom Venus (530)566-1400
Primary Agency/Regulatory ID No.:		Alameda County Environmental Health (ACEH) ACEH Case #RO0000190
Consultant Project No.:		06-08-620

WORK PERFORMED THIS QUARTER (Fourth Quarter 2008):

1. Prepared and submitted the Third Quarter 2008 Status Report.
2. No environmental field work was conducted at the Site during the Fourth Quarter of 2008.
3. Prepared and submitted *Work Plan for On-Site Soil & Ground-Water Investigation* (BAI, 11/25/2008).

WORK PROPOSED FOR NEXT QUARTER (First Quarter 2009):

1. Prepared and submitted this Fourth Quarter 2008 Status Report (contained herein).
2. Implement *Work Plan for On-Site Soil & Ground-Water Investigation* upon approval from ACEH.

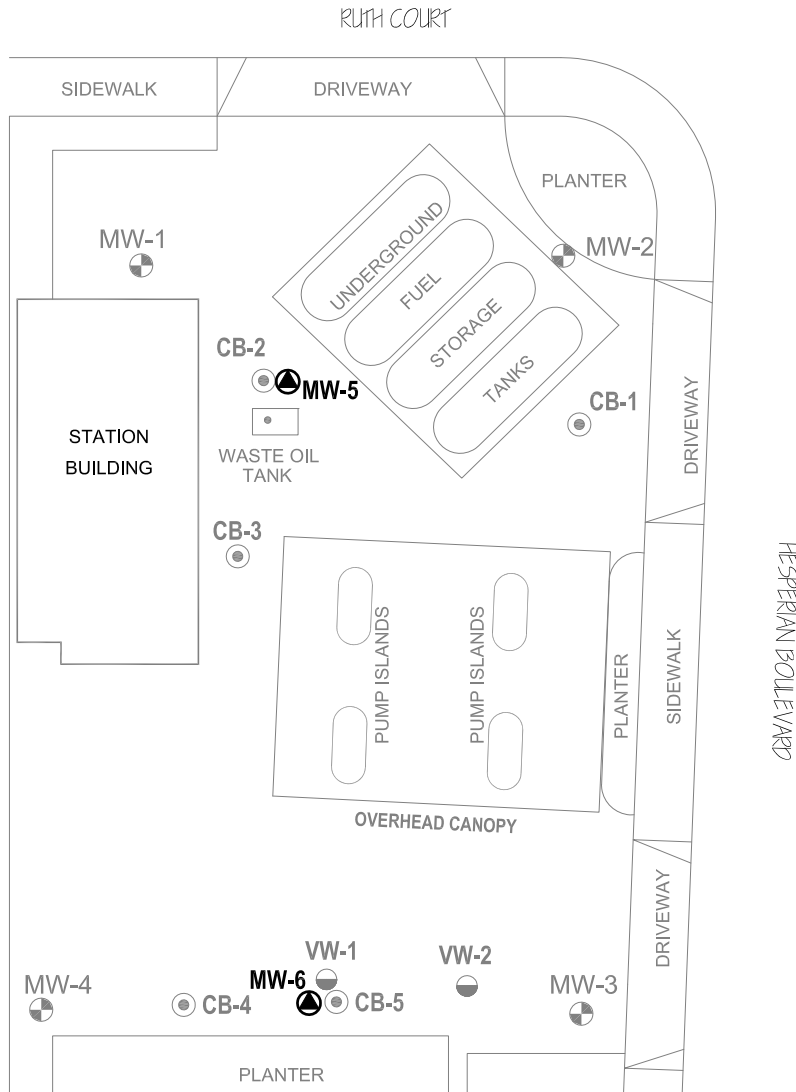

DISCUSSION:

Case closure was requested by BP on 4 June 2004 from ACEH. Ground-water monitoring and reporting was performed during the Third Quarter of 2006 in accordance with the request from ACEH to support the case closure process. Following their review, ACEH determined that in order to facilitate site closure an additional soil and ground-water investigation was required, as relayed in the ACEH letter dated 5 April 2007. The requested work plan was submitted on 15 May 2007. Field work occurred at the Site on 16-17 July 2007. The resulting soil and ground-water investigation report was submitted on 14 September 2007. Also received from ACEH in an email dated 4 April 2007 was a notice to discontinue the current program of ground-water monitoring. Therefore, the annual ground-water monitoring events previously scheduled to occur during the Third Quarter of 2007 and Third Quarter of 2008 were not performed.

In a letter dated 1 October 2008, ACEH requested further source area characterization including the installation of an additional monitoring well in the vicinity of boring CB-2 and resumption of ground-water monitoring. A *Work Plan for On-Site Soil and Ground-Water Investigation* (BAI, 25 November 2008) was submitted in response to the ACEH letter dated 1 October 2008. For reference, a site sketch with proposed monitoring well locations has been included in Drawing 1. BP is currently awaiting a response from ACEH regarding this work plan.
