Hello Barbara,

I want to let you know that the excavation of the 5812 Hollis Street (Fuel leak Case No RO0000201) is almost complete and would like to arrange a meeting to discuss the analytical results of the verification samples and possible Case Closure of the site.

If you could please let me know your if you are available during the first week of May as we would like to have a meeting to discuss our findings and results and to make sure that we have fulfilled all the requirements. If that does not work could you please let me know what times would work. During the first week of May, the construction project will have approximately 2 more weeks prior to pouring the concrete slab so if we need to perform any additional work, we would not impact the construction of the project.

Thank you and I hope all is well.
Peter
