Return voice mail from Rick Marmot (sp) owner of property to north of Palace Garage. Has been requested to allow remedial excavation on his property and is concerned with scope, and impacts to his tenant. We discussed the work, why it will be beneficial to his property, that there should be limited environmental stigma associated with it (but he may need to disclose that is next door to a formerly contaminated site, but the site will have been closed to state standards). He is trying to determine what can be done to keep the impact of the work limited for his tenant. Suggest he talk to the consultant / contractor to see what can be done. We do try to limit impacts, but sometimes it's difficult to manage with work that must be done during the day.
