

MEMO to file:

Brady Nagle (Alisto) called today to request on behalf of BP Oil a reduction in sampling frequencies and/or target analytes at this site. I advised him that such a decision is best left between he and the case worker, Eva Chu, for I would need to review the entire case before I could render a decision. I informed him of Eva's return Sept. 10, 1993.

Spoke w/ Gerald  
Nieder-Westerman  
Prog. Mgr. at  
Altun Geo Science  
re: well screen at  
AW 4 and 5. He  
will call back when he knows  
region for screen length

5/16/92

Talk w/ Kevin Graves  
about AW-6 - is it ok  
not to do add'l SBS -  
is certain localized in  
well.  
Have him explain bad  
down results - they used  
different scales

Questions for Mobil (Randy Begier) re  
~~7197~~ 7197 Village Parkway, Dublin

Question -

- 1) What is cause of high conc. of TPH-G and benzene at AW-6. Tightness test (leaks?)
- 2) will work be with <sup>Former</sup> Shell, ~~Shell~~ Unocal (Arco) and Mobil be coordinated to remediate site?
- 3) AW 4 and 5 screen lengths are too short - not accurate for TPHG, BTEX - Confined aquifer. Water does not go past 15-20 ft.
- 4) Who is contact person at B.P. oil? Pete DeSantis

I will try to get hold of Shell + Unocal reps to coordinate cleanup.

BP Contact. Pete DeSantis (916) 631-6919

5/19/92.

(Randy called. He says mobil is out of picture and Pete DeSantis is handling this BP site.

~~Check report of Samco did soil analysis~~
