Subject: Geotechnical activities at the former Holland Oil site

Jerry,

This e-mail is to inform you of upcoming subsurface activities at the former Holland oil site. The subsurface activities consist of pot-holing into the fill areas up to three feet below ground surface to evaluate the moisture content of the soil. This work will be conducted tomorrow (Tuesday, March 8th) only by DL Falk (General) and Bay Cities (Grading), under the oversight of our geotech group.

Regards,

Kris M. Larson, P.G.
