Phone call with Kris Larson of Ninyo & Moore. In addition to fill material at golf course, they are looking at obtaining fill material from a "Sports Center" site near Hegenberger in Oakland. Baseline Environmental apparently sampled the fill material in place but did not analyze for all the analytes in DTSC guidance. Kris Larson reviewed the results and indicated soil was relatively clean. I indicated that Phase I information was necessary for site in order to assess the sampling results and analytes. No other specifics discussed with regard to the origin of the fill.
