Subject: RE: Ashland Youth Center - Soils Excavation - Additional Area

Jerry,

Alameda County GSA is evaluating whether they want to perform the excavation on the HARD property. If they decide to proceed with the additional excavation, we will prepare a brief work plan addendum.

Thanks

Sincerely,

Peter Langtry, P.G., C.E.G.

Peter,

Given that the excavation is for soil management purposes, verification sampling would not be required. To formalize the request and approval, I would like to have an addendum in the form of a brief letter with the attached figure.

Regards,

Jerry Wickham

Subject: Ashland Youth Center - Soils Excavation - Additional Area

Hello Jerry, Alameda County GSA is considering excavating soil from an adjacent area on the HARD property where parking lot construction will be performed during construction of the youth center. The approximate area is shown on the attached site map. Excavation to a depth of approximately 3 feet is anticipated to help reduce the potential for construction workers to encounter soil with residual COCs during construction.

The additional area is within the area of the HARD property previously excavated to a depth of approximately 1 foot for the prior cleanup activities, so the new excavation would be more for soil management purposes. Would you want to see verification soil samples from this area after the excavation? In addition, would you need to see an addendum to the soil excavation work plan?

Thanks

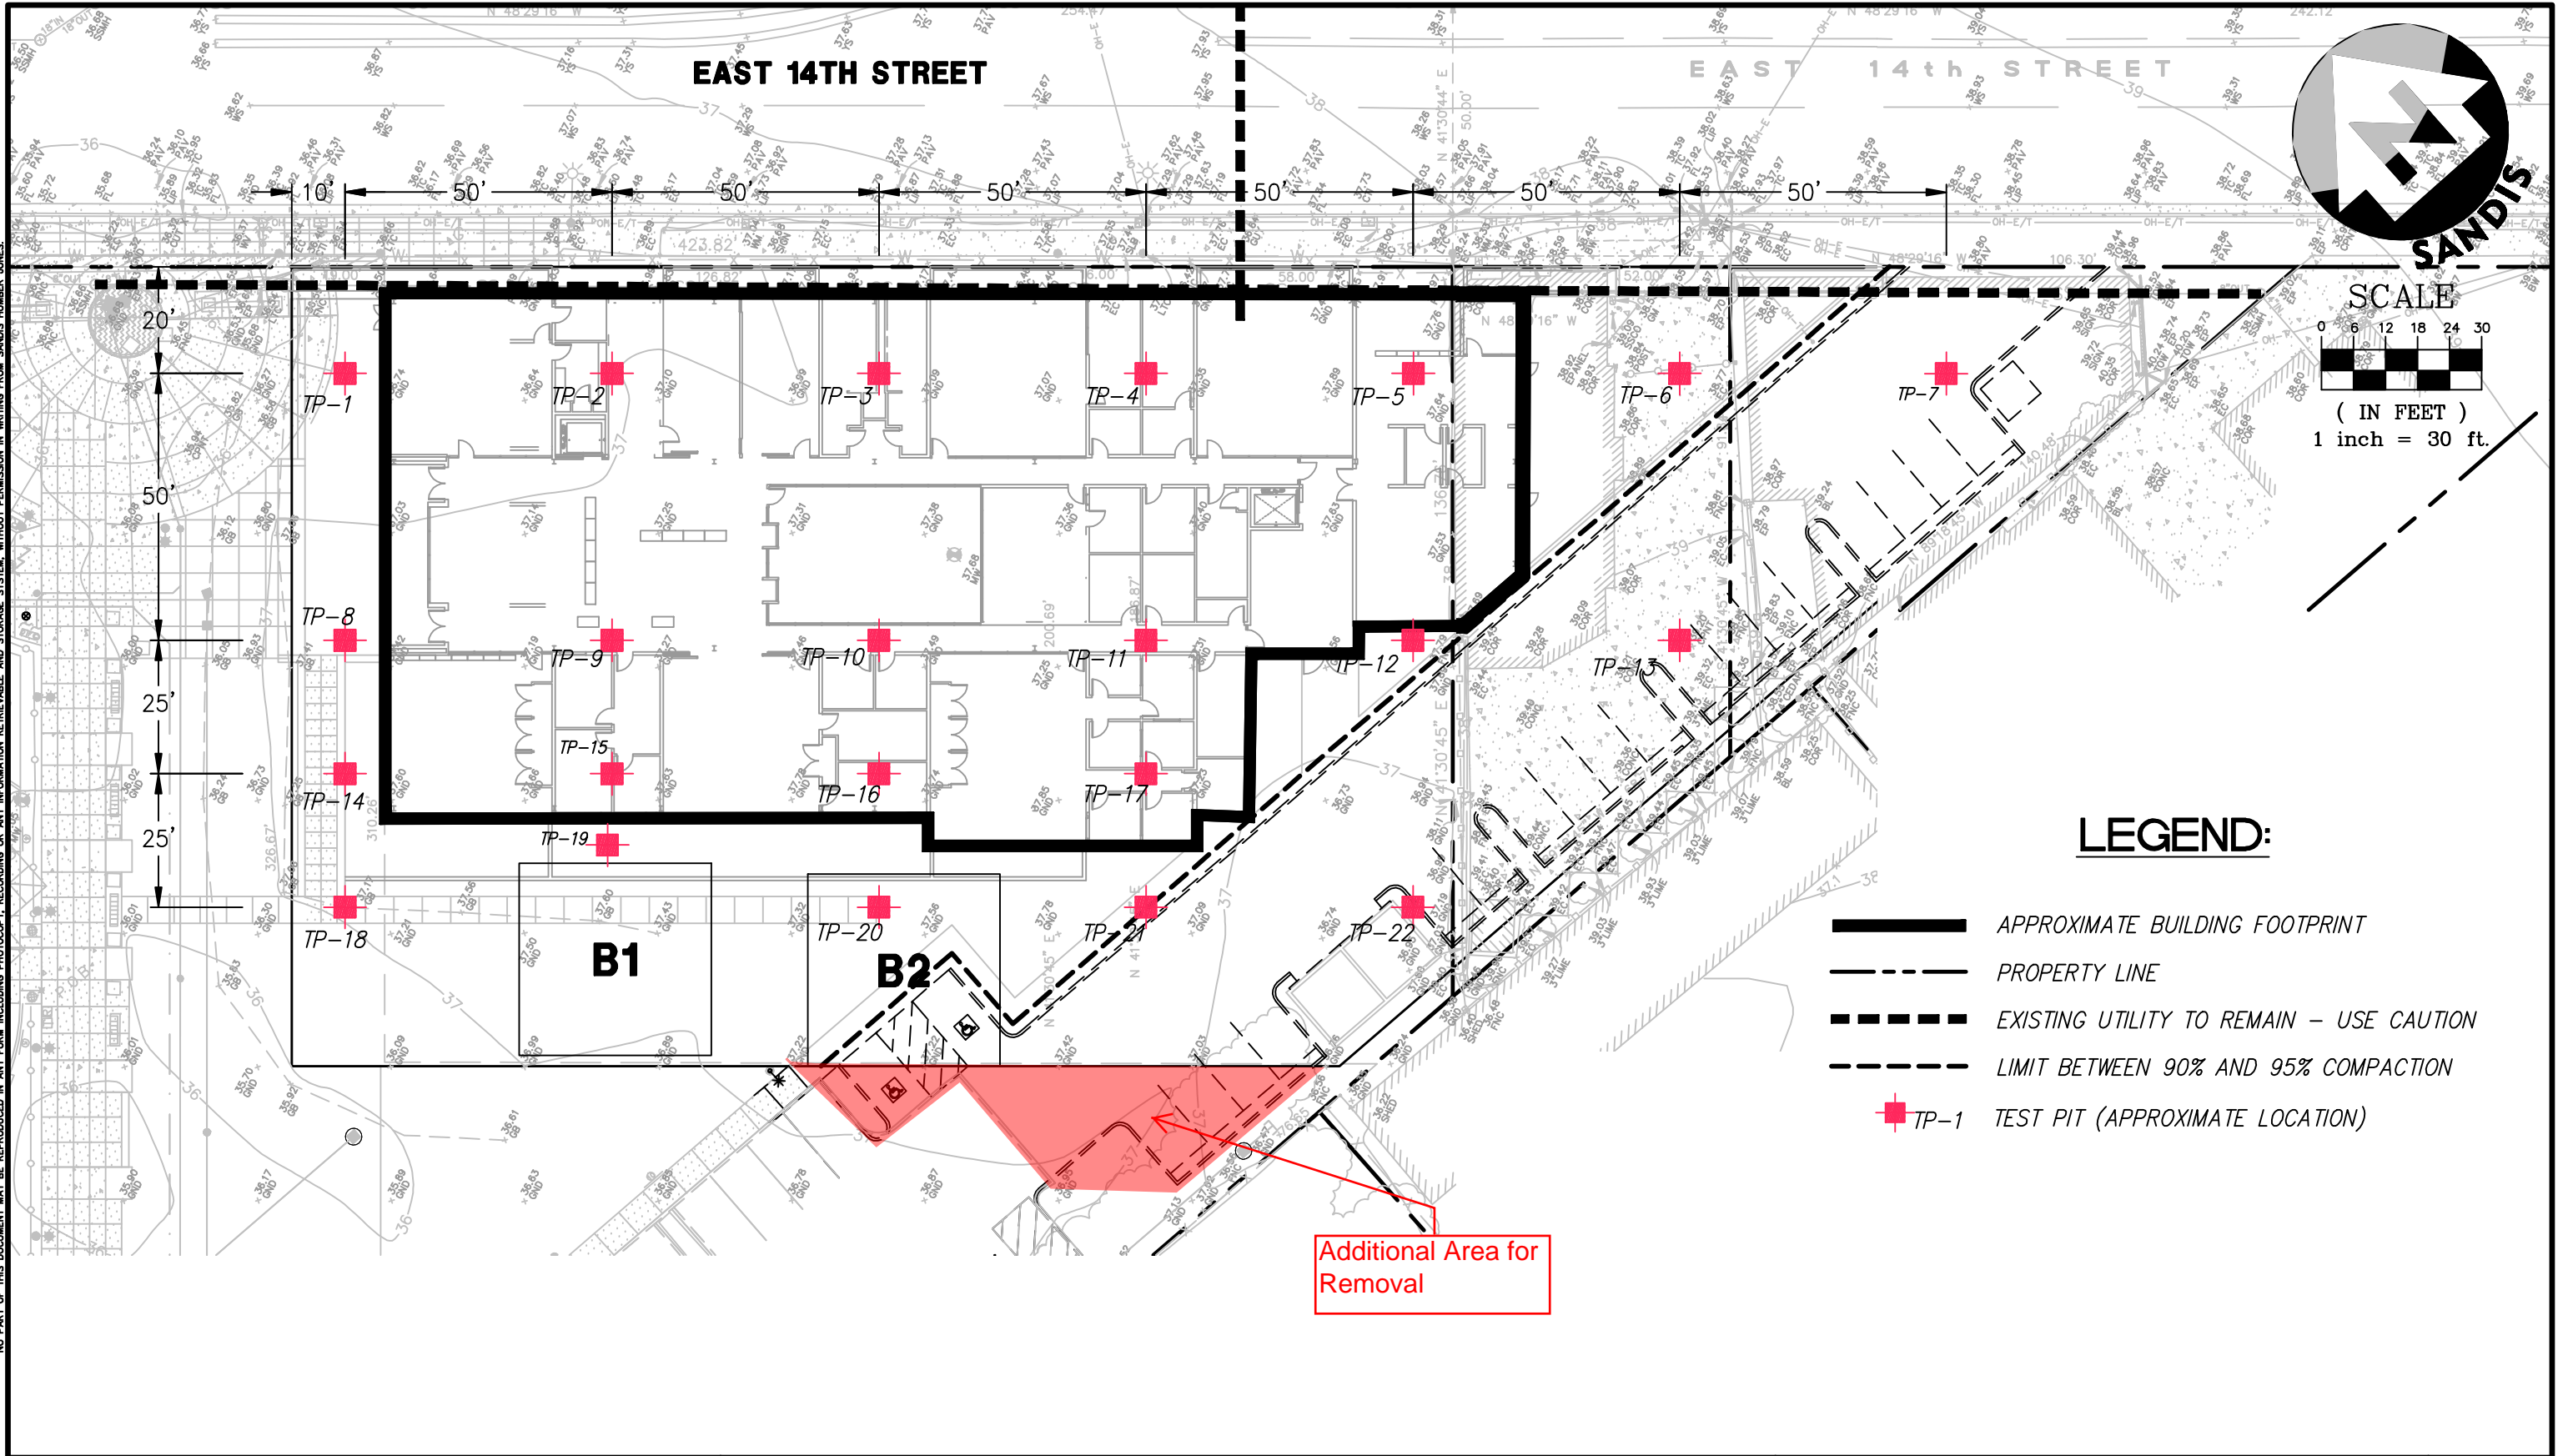

Sincerely,

Peter Langtry, P.G., C.E.G.
