Dennis,

ACEH concurs with this approach since those wells have been below the detection limit. Monitoring them in the next monitoring event should suffice.

Ms. Jakub:

As you and I discussed on the phone today, due to difficulties in obtaining an access agreement with the neighboring property owner, monitoring wells MW-7 and MW-8 will likely not be purged and sampled during the fourth quarter 2009. However, if Delta can obtain an access agreement prior to our scheduled groundwater monitoring event (December 17th), monitoring wells MW-7 and MW-8 will be purged and sampled. Delta should be able to obtain an access agreement prior to the next scheduled sampling event for monitoring wells MW-7 and MW-8, second quarter 2010. If you have any question or if I can be of further assistance don't hesitate to contact me.

Thanks,
