Incident No. 98995749  
ACHCSA Case No. RO-0220

Dear Mr. Wickham:

Cambria Environmental Technology, Inc. (Cambria) prepared this report on behalf of Equilon Enterprises LLC dba Shell Oil Products US (Shell) in accordance with the quarterly reporting requirements of 23 CCR 2652d.

If you have any questions regarding the contents of this document, please call Ana Friel at (707) 268-3812.

Sincerely,  
**Cambria Environmental Technology, Inc.**

Ana Friel, PG  
Associate Geologist

## **GROUNDWATER MONITORING REPORT – FIRST QUARTER 2007**

<b>Site Address</b>	<u>285 Hegenberger Road, Oakland</u>
<b>Site Use</b>	<u>Shell-branded Service Station</u>
<b>Shell Project Manager</b>	<u>Denis Brown</u>
<b>Consultant and Contact Person</b>	<u>Cambria, Ana Friel</u>
<b>Lead Agency and Contact</b>	<u>ACHCSA, Jerry Wickham</u>
<b>Agency Case No.</b>	<u>RO-0220</u>
<b>Shell SAP Code</b>	<u>135691</u>
<b>Shell Incident No.</b>	<u>98995749</u>
<b>Date of Most Recent Agency Correspondence</b>	<u>May 11, 2006</u>

### **Current Quarter's Activities**

1. Blaine Tech Services, Inc. (Blaine) gauged and sampled wells according to the established monitoring program for this site.
2. Cambria prepared a vicinity map (Figure 1) and a groundwater contour and chemical concentration map (Figure 2). The Blaine report, presenting the analytical data, is included in Attachment A.
3. Cambria completed the geologic cross sections and research activities proposed in our April 14, 2006 *Site Conceptual Model*. Figure 3 is the site plan showing current utility locations and the location of the geologic cross sections. The cross sections are presented as Figures 4, 5, and 6, and a discussion is presented at the end of this submittal.

### **Current Quarter's Findings**

<b>Groundwater Flow Direction</b>	<u>East/Southeast</u>
<b>Hydraulic Gradient</b>	<u>0.04</u>
<b>Depth to Water</b>	<u>3.21 to 7.63 feet below top of well casing</u>

## **Proposed Activities for Next Quarter**

1. No monitoring planned as site is monitored semi-annually during the first month of the first and third quarters, according to the established monitoring program for this site.

## **DISCUSSION**

In our April 14, 2006 *Site Conceptual Model*, Cambria recommended performing a site visit to check for the existance of wells VM-1 through VM-4; a file review to obtain well destruction documentation for MW-5, MW-7, and VM-1 through VM-4, if applicable, and to obtain investigation information for the adjacent site at 295 Hegenberger Road; to obtain current utility maps for Hegenberger Road and provide geological cross-sectional drawings, including nearby utilities.

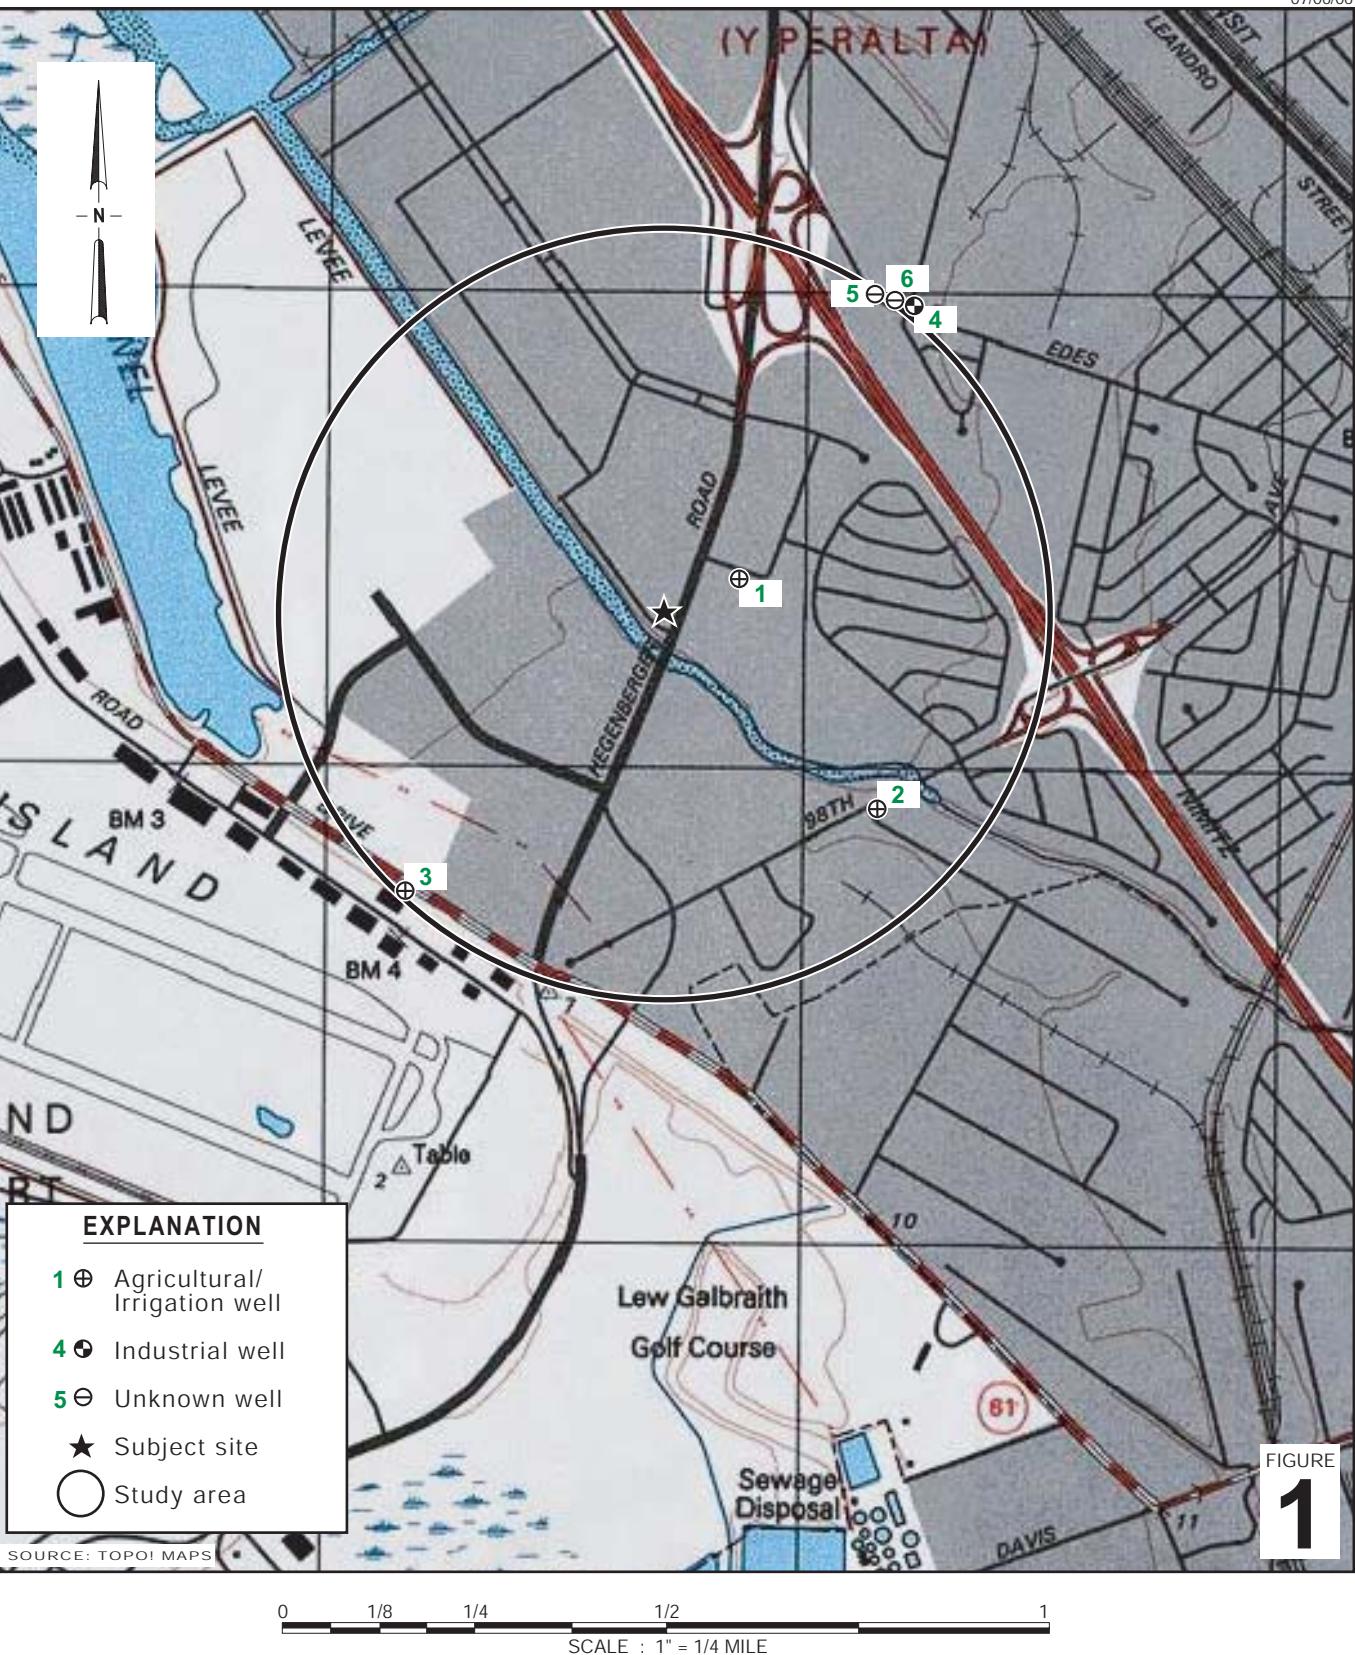

- Based on a site visit, VM-1 through VM-4 were either previously destroyed or have been paved over, as no evidence of them was observed during the visit.
- The file review from both the City of Oakland and Alameda County offices did not result in locating well destruction documentation for MW-5, MW-7, or VM-1 through VM-4.
- In their response letter dated May 11, 2006, the ACEH provided some information concerning the closed UST case at 295 Hegenberger Road which showed no significant impact from TPHg or BTEX, and residual TPHd concentrations at 830 parts per billion in groundwater. The file review provided no additional information for this site.
- The City of Oakland provided a utility location map, and based on that document, the approximate locations of the utilities depicted on Figure 3 herein are located as shown on the City map.
- Cambria prepared three geologic cross sections (A-A', B-B', and C-C'), which are presented on Figures 4 through 6, respectively. Section A-A' crosses the one area of elevated groundwater concentrations (MW-9), and B-B' crosses another area of elevated groundwater concentrations (MW-10). Section C-C' is approximately perpendicular to the other two sections along the downgradient side of the station property. These sections depict the lithology, soil sample data, and the first quarter 2007 groundwater monitoring data.

Groundwater Monitoring Report **070102-DA-1**

This report covers the routine monitoring of groundwater wells at this Shell-branded facility. In accordance with standard procedures that conform to Regional Water Quality Control Board requirements, routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated purge volume (if applicable), elapsed evacuation time (if applicable), total volume of water removed (if applicable), and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater (if applicable) is, likewise, collected and transported to the Martinez Refining Company.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL CONCENTRATIONS**. The full analytical report for the most recent samples and the field data sheets are attached to this report.

At a minimum, Blaine Tech Services, Inc. field personnel are certified on completion of a forty-hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight-hour refresher courses.

Abbreviations:

TPPH = Total petroleum hydrocarbons as gasoline by EPA Method 8260B; prior to November 5, 2001, analyzed by EPA Method 8015.

TEPH = Total petroleum hydrocarbons analyzed by EPA Method 8015M.

BTEX = Benzene, toluene, ethylbenzene, xylenes by EPA Method 8260B; prior to November 5, 2001, analyzed by EPA Method 8020.

MTBE = Methyl tertiary butyl ether

DIPE = Di-isopropyl ether, analyzed by EPA Method 8260B

ETBE = Ethyl tertiary butyl ether, analyzed by EPA Method 8260B

TAME = Tertiary amyl methyl ether, analyzed by EPA Method 8260B

TBA = Tertiary butyl alcohol, analyzed by EPA Method 8260B

TOC = Top of Casing Elevation

TOB = Top of Wellbox

GW = Groundwater

DO = Dissolved Oxygen

ug/L = Parts per billion

ppm = Parts per million

MSL = Mean sea level

ft. = Feet

<n = Below detection limit

(D) = Duplicate sample

n/n = Dissolved oxygen reading; pre-purge/post-purge.

NA = Not applicable

Notes:

a = Chromatogram pattern indicates an unidentified hydrocarbon/Hydrocarbon does not match pattern of laboratory's standard.

b = Sample was analyzed outside of EPA recommended holding time.

c = Post-purge DO reading not taken.

d = Lab did not record detected result.

e = Change in casing elevation due to wellhead maintenance.

f = TEPH with Silica Gel Clean-up.

g = Hydrocarbon reported is in the early Diesel range and does not match the laboratory's standard.

h = Hydrocarbon reported is in the late Diesel range and does not match the laboratory's standard.

i = The concentration reported reflect(s) individual or discrete unidentified peaks not matching a typical fuel pattern.

j = Samples were re-extracted past EPA recommended holding time.

k = Surrogate recoveries lower than acceptance limits.

l = Quantity of unknown hydrocarbon(s) in sample based on motor oil.

\* All Diesel and motor oil samples for this event were lost in laboratory fire.

Site surveyed, except wells MW-11 and MW-12, on March 18, 2002 by Virgil Chavez Land Surveying of Vallejo, CA.

Wells MW-1 through MW-4, MW-6, MW-9 through MW-13, VEW-5, VEW-6, and VEW-7 surveyed on September 27, 2005 by Virgil Chavez Land Surveying of Vallejo, CA.

19 January, 2007

Jason Brown

### Notes and Definitions

ZX	Due to sample matrix effects, the surrogate recovery was outside the acceptance limits.
M8	The MS and/or MSD were below the acceptance limits. See Blank Spike (LCS).
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit or MDL, if MDL is specified
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
