Hello Steven,

We are getting ready to submit the third quarter monitoring report for the sites on Harrison Street in Oakland. This is a bit of a unique situation because we are providing one combined report, but the sampling, although coordinated, was still done by three separate firms. For now until we have a signed commingled plume agreement, we are planning on having each RP's consultant upload their own GeoXYZ, GeoWell, and EDF files by site. Will the one GeoMap that we will submit with the combined report be sufficient, or would you prefer that it be uploaded under all three sites?

Thanks,  
Diane
