Phone call with Roya Kambin of Chevron and Aaron Svitana of ARCADIS. They are proposing to move borings GP-9 and GP-10 to park site. GP-8 cannot be advanced due to gas line; they will review nearby wells for soil data to replace GP-8. GP-4 will not be advanced; they believe they have enough data without GP-4. GP-1 is being advanced in area of hydraulic lifts. They will check on whether GP-1 can be advanced in same borehole as EB-11. They may put the proposed modifications in letter to me.
