RE: Request for Extension, Former Chevron-branded service station 94612, located at 3616 San Leandro, Oakland, California (Case#: RO0000233)

Dear Mr. Detterman:

On behalf of Chevron Environmental Management Company, Stantec Consulting Services Inc. (Stantec) respectfully requests an extension to complete the Soil and Groundwater Investigation Report for former Chevron-branded service station 94612, located at 3616 San Leandro, Oakland, California (the Site). Conestoga-Rovers & Associates (CRA) prepared the *Work Plan for Additional Investigation*, dated September 8, 2011. Alameda County Health Care Services approved CRA's work plan with provisions in a letter dated March 30, 2012, and requested that documentation of the appropriateness of the proposed Silica Gel Cleanup (SGC) technique be submitted by May 11, 2012, and that the investigation results along with GeoTracker compliance be submitted by June 15, 2012. An additional extension was subsequently approved via email with a due date of August 3, 2012.

As detailed in the October 3, 2012 notification letter, Chevron has recently reassigned this Site from CRA to Stantec. We are actively working to complete the transfer, review case files, evaluate the appropriateness of the work plan, and begin the planning and scheduling of this work. Unfortunately, due to the timing of the transfer, the due dates have passed; therefore, we respectfully request that extensions be granted for the following:

- Notification of Any Work Plan Revisions - November 30, 2012
- Documentation of Appropriateness of proposed SGC Technique - November 30, 2012
- Additional Investigation Report and GeoTracker Compliance – March 29, 2013

If you have any questions, please contact me at (408) 356-6124 or travis.flora@stantec.com.

Respectfully,
Stantec Consulting Services Inc.
