San Lorenzo, California 94580

Re: Groundwater Analytical Results
17393 Via Magdalena
San Lorenzo, California

Dear Mr. Whaley:

This letter presents sampling results of the irrigation water-supply well located on the property referenced above. ARCO Products Company (ARCO) and Pacific Environmental Group, Inc. (PACIFIC) would like to express their gratitude for your cooperation in this project.

On behalf of ARCO, PACIFIC performed the groundwater sampling to test for gasoline in the water. The samples were collected on September 15, 1993, and submitted to the laboratory for analysis for total petroleum hydrocarbons calculated as gasoline (TPH-g), benzene, toluene, ethylbenzene, and xylenes (BTEX compounds) in groundwater.

The groundwater samples collected from your well did not contain any detectable TPH-g or BTEX compounds. Groundwater analytical data are presented in Table 1.

Re: Groundwater Analytical Results
17349 Via Magdalena
San Lorenzo, California

Dear Mr. Kast:

This letter presents sampling results of the irrigation water-supply well located on the property referenced above. ARCO Products Company (ARCO) and Pacific Environmental Group, Inc. (PACIFIC) would like to express their gratitude for your cooperation in this project.

On behalf of ARCO, PACIFIC performed the groundwater sampling to test for gasoline in the water. The groundwater samples were collected on September 16, 1993, and were submitted to the laboratory for analysis for total petroleum hydrocarbons calculated as gasoline (TPH-g), benzene, toluene, ethylbenzene, and xylenes (BTEX compounds) in groundwater.

Laboratory analysis of the groundwater samples collected from your well on September 16, 1993, detected TPH-g and benzene at detectable 1,200 and 13 parts per billion, respectively. Toluene, ethylbenzene, and xylenes were also detected. These compounds are indicative of gasoline. Groundwater analytical data are presented in Table 1.
